1.0 EXECUTIVE SUMMARY

Advanced Environmental Technologies, LLC (AET) has completed a Phase I Environmental Site Assessment (ESA) of the property located at 1315 South 8th Street, Fernandina Beach, Nassau County, Florida (herein referred to as the Site or Subject Property). This ESA was performed in general conformance with the scope and limitations of ASTM E1527-13. Any deviations from this procedure and/or limitations are identified within the appropriate sections of the report. The following conclusions are provided based on the findings of this Phase I ESA:

The Subject Property consists of one parcel located at 1315 South 8th Street, Fernandina Beach, Nassau County, Florida. The Site occupies Parcel Number 00-00-31-1800-0308-0050 as listed with the Nassau County Property Appraiser. Historical information indicates the Subject Property was developed in 1952.

This assessment revealed no Recognized Environmental Conditions (RECs) in connection with the Subject Property or adjoining parcels. The risk of contamination is so minimal that no further investigation is warranted.

This summary does not contain all the information that is found in the full report. The report should be read in its entirety to obtain a more complete understanding of the information provided and to aid in any decisions made or actions taken based on this information.

2.0 INTRODUCTION

2.1 Purpose

The Phase I ESA is designed to make the client aware of recognized environmental conditions as defined under ASTM 1527-13, which may have an adverse environmental impact upon the Subject Property. This ESA was designed to identify, to the extent feasible, the presence or likely presence of RECs in connection with the property.

The purpose of this Phase I ESA is to allow the User to benefit from one of the defenses referenced in Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability: the innocent landowner defense, the contiguous property owner defense, or bona fide prospective purchaser defense. These defenses are collectively referred to as the “landowner liability protections,” or “LLPs”. ASTM International Standard E1527-13 constitutes “all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice” as defined at 42 U.S.C. §9601(35)(B).

The goal of this Phase I ESA is to identify RECs in connection with the subject property consistent with ASTM International Standard 1527-13. A REC is defined as:

The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

2.2 Scope of Services

This Phase I ESA was conducted in accordance with the authorization received from Pineland Bank. The scope of work consists of completing a Phase I ESA in accordance with ASTM International E 1527-13. Please note that our services intentionally did not include inquiries with respect to non-scope items such as building condition, asbestos, lead based paint, lead in drinking water, radon, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, indoor air quality, vapor intrusion, wetlands, or endangered species.

2.3 Limitations of Assessment

The ASTM Standard E 1527-13 includes various limitations. This report is limited in accuracy and completeness in the following areas:

- Access Limitations – None.
- Physical Obstructions to Observations – None
- Outstanding Information Requests – No reply from local government official
- Historical Data Source Failure – See Section 5.4
- Data Gaps – See Section 5.4
- Key Site Manager Contact – Not applicable.
- 50-year chain of title (User Responsibility) – Not reviewed, not provided by User
- Environmental Lien Search – Not reviewed, not provided by User
- Other – No User or Owner Questionnaire received.

2.4 General Limitations and Exceptions

The conclusions and recommendations contained in this report/assessment are based upon professional opinions with regard to the subject matter. These opinions have been arrived at in accordance with currently accepted hydrogeologic and engineering standards and practices applicable to this location and are subject to the following inherent limitations:

Certain information utilized for the preparation of this report/assessment has been obtained, reviewed, and evaluated from various sources believed to be reliable. Although the conclusions, opinions and recommendations are based, in part, on such information, our services did not include verification of its accuracy or authenticity. Should such information prove to be inaccurate or unreliable, we reserve the right to amend or revise its conclusions, opinions and/or recommendations.

The field work and reconnaissance of the Subject Property were performed to document current site conditions. This work focused on areas deemed more likely to exhibit hazardous material conditions while other areas received limited attention or were inaccessible at the time of our field work and reconnaissance.

Because this report is based upon information, the accuracy of which has not been determined, and because observations made during site reconnaissance are limited as provided above, we cannot and do not guarantee that the Subject Property is free of hazardous or potentially hazardous materials or conditions, or that latent or undiscovered conditions will not become evident in the future. Since site activities beyond our control could change at any time after the completion of this report/assessment, our observations, findings and opinions can only be considered valid as of the date hereof. This

report/assessment is prepared in accordance with our proposal and currently accepted industry standards, and no other warranties, representations, or certifications are made. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with the Subject Property.

2.5 Special Terms and Conditions

The client agrees that until payment is made in full, the client shall not have a proprietary interest in this report or the information contained herein.

2.6 User Reliance

Unless stated otherwise herein, this report is intended for and restricted to the sole use of Pineland Bank, New Synergies, LLC, and Parker Contracting, Inc. Any use, interpretation or reliance upon this report/assessment by anyone other than Pineland Bank, New Synergies, LLC, and Parker Contracting, Inc. is at the sole risk of that party, and AET shall not have any liability for such unauthorized use, interpretation or reliance. Any unauthorized use or reuse of report findings, conclusions, or recommendations is at the risk of said user. This report is considered valid under the ASTM International Standard for a period of 180 days from the date of issuance.

3.0 SITE DESCRIPTION

3.1 Site Location and Legal Description

The Subject Property consists of one parcel located at 1315 South 8th Street, Fernandina Beach, Nassau County, Florida. The Site occupies Parcel Number 00-00-31-1800-0308-0050 as listed with the Nassau County Property Appraiser. A copy of the property appraiser information is included in **Appendix A**.

3.2 Subject Property and Vicinity General Characteristics

A site reconnaissance was conducted by AET personnel on March 3, 2020. The Site is located on the west side of South 8th Street (State Road 200/US Highway A1A) just south of the intersection with Lime Street and encompasses a total of approximately 1.57 acres. The Site is currently vacant with all buildings razed. The surrounding area is light commercial and residential properties. **Figure 1** presents a current Aerial Site Map of the Site and vicinity.

3.3 Current Uses of the Subject Property

At the time of the site reconnaissance, the Site was vacant with all buildings razed. Site photographs are provided in **Appendix B**.

3.4 Onsite Structures and Improvements

At the time of the site reconnaissance, the site was vacant with all buildings razed. The majority of the site was paved. Several containment or holding ponds are located on the southern half of the Site.

3.5 Current Uses of Adjoining Properties

<u>North</u>	New Possibilities Antique Store and North Nassau Recycling, then Lime Street.
<u>East</u>	South 8 th Street/US Highway A1A/State Road 200, then Bo N Mike's Detail Shop, Tire Kingdom, and a vacant wooded parcel.
<u>South</u>	Gage Tree Care, MSM Group Brick Pavers, and Cavagnaro Tattoos.
<u>West</u>	Railroad tracks, private residences.

4.0 USER PROVIDED INFORMATION

In order for the User to qualify for one of the LLPs offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, Section 6 of ASTM International E 1527-13 requires the User to provide the environmental professional the following information:

- The existence of environmental cleanup liens;
- Activity and Use Limitations (AULs) recorded against the subject property;
- Specialized knowledge or experience of the User;
- Relationship of the purchase price to the fair market value of the property if it were not contaminated;
- Commonly known or reasonably ascertainable information about the subject property; and
- The degree of obviousness of the presence of contamination at the subject property.

4.1 Title Records

A historical chain-of-title was not provided by the Users of this report, and therefore was not reviewed as part of this report.

4.2 Environmental Liens or Activity and Use Limitations

No User Questionnaire was received.

4.3 Specialized Knowledge

No User Questionnaire was received.

4.4 Commonly Known or Reasonably Ascertainable Information

No User Questionnaire was received.

4.5 Valuation Reduction for Environmental Issues

No User Questionnaire was received.

4.6 Owner, Property Manager, and Occupant Information

The current owner is Florida Rock Industries, Inc.. Owner information was obtained from the Nassau County Property Appraiser's online records.

4.7 Reason for Performing Phase I ESA

Pineland Bank indicated the reason for performing the Phase I ESA is to assist in the due diligence for potential sale of the property.

4.8 Previous Studies

Pineland Bank provided an October 9, 2014 Phase I Environmental Site Assessment for the Subject Property. No RECs were identified in connection with the Subject Property.

5.0 RECORDS REVIEW

5.1 Standard Environmental Record Sources

Pertinent and reasonably available listings of environmental concerns on or near the Subject Property were reviewed pursuant to the requirements in ASTM 1527-13 for evidence of activities that may have an adverse environmental impact on the Subject Property. Environmental Data Resources (EDR) provided AET with a comprehensive government agency information search in accordance with ASTM International Standard E 1527-13. A copy of the database report is provided in **Appendix C**. A summary of the database findings is as follows:

- a. National Priorities List (NPL) - The NPL is an inventory of facilities and/or locations with confirmed environmental contamination. These sites fall under the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA) and the Superfund Amendments and Reauthorization Act of 1986 (SARA) and are often referred to as "Superfund" sites. The NPL is maintained by the Environmental Protection Agency (EPA) and allows them to rank those sites according to the extent of environmental health and safety concerns and schedule them for remedial action. **No NPL sites were listed within one mile of the Subject Property.**

- b. Comprehensive Environmental Response, Compensation, and Liability Act Index (CERCLIS)/Superfund Enterprise Management System Archive (SEMS ARCHIVE) - CERCLIS is an identification of those facilities and/or locations that are currently being investigated by the EPA or associated state environmental agencies to ascertain the presence of potential or existing contamination. Preliminary site assessments are normally conducted by either the EPA or the appropriate state environmental agency for all sites included in CERCLIS. Many of the sites investigated through CERCLA will be placed on NPL for remedial action and will be included in the Sites Enforcement Tracking System (SETS) for identification of potential liability. CERCLIS sites are classified as FINAL (on the NPL list), NOT PROPOSED (not yet on the NPL list), or NFRAP (no further remedial action planned). **One CERCLIS NFRAP site was listed within one-half mile of the Subject Property. Fabralloy Inc. (706 – 708 South 9th Street) does not qualify for the NPL based on available data and is not considered a REC for the Subject Property.**

- c. Emergency Response Notification System List (ERNS) - The ERNS is a national computer database used to store information on releases of oil and hazardous substances. The ERNS list identifies those facilities and/or locations that have been

reported to U.S. Environmental Protection Agency (EPA) under the ERNS because of the release of potentially hazardous material.

The ERNS database is extremely limited in the location information provided. This database attempts to identify three (3) locations: the location of the spill, the location of the discharge organization, and the location of the individual or organization that reported the spill. **No ERNS sites were listed near the Subject Property.**

- d. Resource Conservation and Recovery Act (RCRA) Index System List and RCRA Corrective Action (RCRA CORRACTS) List - The RCRA Index System List reports those facilities and/or locations that are generating, handling, storing or transporting hazardous substances or waste. This list includes RCRA treatment, storage & disposal (TSD) facilities, RCRA generator (large quantity, small quantity, and conditionally-exempt) facilities, RCRA corrective action (CORRACTS) facilities, and RCRA no longer reporting (NLR) facilities. The Compliance Monitoring and Enforcement List (CMEL) and RCRA Administrative Action Tracking System (RAATS) information is also included. Due to the activities relating to the handling of hazardous substances or waste, these sites possess the potential for environmental contamination. Inclusion on RCRA Index System List does not necessarily indicate contamination but rather the potential due to the presence and handling of hazardous substances. The RCRA COR List is a list of RCRA facilities that have been notified by the EPA to undertake corrective action under RCRA. This list also tracks the specific program events that have occurred at a RCRA facility (e.g., facility assessment or stabilization), as well as corrective action program priority (high, medium, or lows). **Six RCRA very small quantity generators were listed within one quarter mile of the Subject Property. The only one in close proximity to the Subject Property is B&C Tire and Battery (current Tire Kingdom) located across South 8th Street from the Subject Property. There are no open violations associated with this site. Due to the in compliance status, this site is not considered a REC for the Subject Property.**
- e. Federal Institutional Controls/Engineering Controls Registries – This is a listing of sites with engineering and/or institutional controls in place, which create pathway elimination of contamination or restrict use in order to prevent contamination exposure. **No Federal Institutional Controls/Engineering Controls sites were located within one-half mile of the Site.**
- f. State/Tribal Equivalent CERCLIS Site and SHWS (State Hazardous Waste Site) List - The State/Tribal sites list is closely associated with the CERCLIS list and identifies facilities and/or locations that the Florida Department of Environmental Protection

(FDEP) has recognized with potential or existing environmental contamination. **No SHWS sites were found within one mile of the Subject Property:**

- g. State/Tribal Solid Waste Facilities (SWF) - The SWF List is concerned with the handling of solid waste. The presence of a site on this list does not necessarily indicate existing environmental contamination but rather the potential. **One SWF site was listed within one-half mile of the Subject Property. The City of Fernandina Beach has a pre-authorized disaster debris management site north of Lime Street and west of South 8th Street. There are no reported violations associated with this facility and it is not considered a REC for the Subject Property.**
- h. State/Tribal Leaking Storage Tanks List - The leaking storage tanks list includes State/Tribal Leaking Underground Storage Tank (LUST) sites and leaking Aboveground Storage Tank (AST) sites. **Eight LUST sites were listed within one half mile of the Subject Property. All eight have No Further Action status and therefore none are considered a REC for the Subject Property.**
- i. State/Tribal Stationary Registered Storage Tank List – Florida regulations require the registration of underground and aboveground stationary petroleum storage tanks. Inclusion on this list indicates the presence of stationary petroleum storage tanks and, therefore, the potential for environmental problems. **Seven UST sites, including the Subject Property, and four AST sites, including the Subject Property, were listed within one quarter mile of the Subject Property. All sites with the exception of the Fernandina Public Works Garage (1017 South 5th Street) are closed. This facility was major out of compliance at the last FDEP inspection on August 4, 2017. However, due to distance, this facility is not considered a REC for the Subject Property.**

All tanks have been removed from the Subject Property. The last tank was removed on April 21, 2011. An FDEP closure inspection at that time noted that the facility was in compliance and that there were no indications of a release. The facility was also found to be in compliance during FDEP inspections in 2006, 2007, 2008, 2009, and 2010. FDEP records indicate that there are no reported discharges and no open violations associated with the Site. Therefore, the former presence of USTs and ASTs is not considered a REC.

- j. State/Tribal Brownfields: Florida has developed a Public Record for properties voluntarily participating in this state response program funded by CERCLA Brownfields provisions. This includes sites where response actions have been completed and where response actions are planned. **No designated Brownfield areas are listed within one-half mile of the Subject Property.**
- k. State/Tribal Voluntary Cleanup Sites: Florida maintains a list of closed and active voluntary cleanup sites. **There was one State/Tribal voluntary cleanup sites listed within one-half mile of the Subject Property. Carriage Cleaners (1722 South 8th Street) is a closed drycleaning facility. The available information indicates that any contamination is confined to the site. This Site is therefore not considered a REC for the Subject Property.**
- l. Other Sites: EDR maintains a list of several other potentially contaminated sites. **All of these sites were either previously discussed as being listed in other databases or are more than one-quarter mile from the Subject Property. These facilities are therefore not considered RECs for the Subject Property.**

5.2 Physical Setting Sources

The topography in the vicinity of the Subject Property is relatively flat. The ground surface elevation is approximately 17 feet above mean sea level. The Amelia River is located approximately one-quarter mile west of the Subject Property and the Atlantic Ocean is located approximately one and three-quarters mile east of the Subject Property.

5.3 Historical Use Information for the Subject Property

The objective of consulting historical sources is to develop a history of the previous uses of the Subject Property and surrounding area, in order to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the Subject Property. The following standard historical sources, as specified in ASTM 1527-13, were researched and utilized for completion of this report.

5.3.1 Aerial Photograph Review

The 1943, 1953, 1960, 1969, 1974, 1977, 1988, 1999, 2007, 2010, 2013, and 2017 historical aerial photographs obtained from EDR were reviewed in preparation of this report. The Subject Property is cleared but undeveloped in the 1943 aerial. Both South 8th Street

and the railroad are visible. Multiple small structures are visible on the Subject Property in the 1953 aerial and properties to the north have been developed. Additional structures are visible of the Subject Property in the 1960 aerial, and properties to the west have been developed. The surrounding area is largely developed by 1982. The Subject Property and the surrounding area are largely unchanged after the 1982 aerial.

Copies of the historical aerial photographs are provided in **Appendix D**.

5.3.2 Sanborn Fire Insurance Maps

A search for fire insurance maps was conducted by EDR using collections from the Library of Congress, University Publications of America, and EDR's Private Collection. No Sanborn maps were available for the Subject Property address. The certified Sanborn search results are provided in **Appendix E**.

5.3.3 Property Appraiser Records

The Nassau County Property Appraiser records indicate the first buildings on the Subject Property were constructed in 1952.

5.4 Data Failure

The objective of the historical research is to develop a history of the previous uses of the property and surrounding area to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the Subject Property. Data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives of the Phase I ESA have not been met. If the data failure represents a significant data gap to the Environmental Professional (EP), ASTM International E 1527-13 requires documentation on the impact of the data gap on the ability of the EP to identify RECs. Information developed through the completion of this Phase I ESA is adequate to satisfy the historical research requirements.

Historical information sources researched in this assessment allowed uses of the property to be traced from the present back to 1943, which does not meet the 1940-minimum research limit, but does predate the property's obvious first developed use per the ASTM Standard. There is therefore no data failure related to historical information for this Site.

6.0 SITE RECONNAISSANCE

An onsite visual reconnaissance of the Subject Property and improvements for indications of possible environmental concerns was conducted March 3, 2020.

6.1 Methodology and Limiting Conditions

The reconnaissance consisted of systematically traversing the reasonably accessible perimeter and interior portions of the Subject Property in a grid-like manner to provide an overlapping field of view. Photographs were taken to document current site conditions. **Appendix B** contains photographs taken during the site reconnaissance.

The onsite reconnaissance typically addresses several items which may pose a potential environmental concern to the Subject Property. These items include, but are not limited to, containers, drums, storage tanks, dumps, areas, ponds, landfills, borrow areas, lagoons, transformers, surface stains, chemically stressed vegetation, and other similar items.

6.2 General Site Setting

A site reconnaissance was conducted by AET personnel on March 3, 2020. The Site is located on the west side of South 8th Street (State Road 200/US Highway A1A) just south of the intersection with Lime Street and encompasses a total of approximately 1.57 acres. The Site is currently vacant with all buildings razed. The surrounding area is light commercial and residential properties.

6.3 Exterior Observations

At the time of the site reconnaissance, the site was vacant with all buildings razed. The majority of the site was paved. Several containment or holding ponds are located on the southern half of the Site. A pile of concrete blocks, a section of aluminum pipe, two panels of Styrofoam insulation, and a minor amount of trash was noted. No environmental concerns were noted. The perimeter of the site is fenced with concrete block and chain link fencing.

6.4 Interior Observations

All buildings have been razed.

7.0 INTERVIEWS

7.1 Interview with Owner/Property Manager

No representative of the owner was available to interview and no User Questionnaire was completed.

7.2 Interview with Local Government Officials

AET made an attempt to contact representatives of the City of Fernandina Beach Fire Department to inquire about any environmental issues, hazardous waste spills, or fires associated with the Subject Property. No response was received prior to preparation of this report.

8.0 FINDINGS

The Subject Property consists of one parcel located at 1315 South 8th Street, Fernandina Beach, Nassau County, Florida. The Site occupies Parcel Number 00-00-31-1800-0129-0030 and 00-00-31-1800-0129-0062, as listed with the Nassau County Property Appraiser. Historical information indicates the Subject Property was developed in 1952.

This assessment revealed no Recognized Environmental Conditions (RECs) in connection with the Subject Property or adjoining parcels.

The regulatory database search identified multiple sites within the Approximate Minimum Search Distance (AMSD) of the property. None of these facilities are considered RECs for the Subject Property due to No Further Action status and distance from the Subject Property.

9.0 OPINION

With reference to the foregoing section of this report (Section 8.0), the following Opinions are provided in connection with this assessment.

1. No RECs were found on the Subject Property.
2. No RECs were found on adjacent properties.
3. With respect to the database findings for properties within the ASTM minimum search criteria, AET believes the potential for off-site contaminants, if present, from these sites to migrate onto the Subject Property is unlikely due to the No Further Action status and distance from the Subject Property. These sites are not considered recognized environmental conditions.

10.0 CONCLUSIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM standard 1527-13 of the Subject Property as described under Section 3.1 of this report. Any deviations from this procedure and/or limitations are identified within the appropriate sections of the report.

This assessment revealed no Recognized Environmental Conditions (RECs) in connection with the Subject Property or adjoining parcels. The risk of contamination is so minimal that no further investigation is warranted.

12.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONAL

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of Title 40 Code of Federal Regulations (CFR) Part 312. I have the specific qualifications based on education, training, and experience to assess a property. I have developed and performed the all appropriate inquiries in general conformance with the standards and practices set forth in 40 CFR Part 312. A resume for the undersigned is provided in **Appendix F**.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

EXECUTIVE SUMMARY

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/30/2020 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/16/2019 has revealed that there are 6 RCRA-VSQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Protection's Facility Directory (Solid Waste Facilities).

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Protection's PCTO1--Petroleum Contamination Detail Report.

A review of the LUST list, as provided by EDR, and dated 10/28/2019 has revealed that there are 8 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. Shortly after the September 11 event, the DEP was instructed to remove the detail about some of the storage tank facilities in the state from their reports. Federal-owned facilities and bulk storage facilities are included in that set.

A review of the UST list, as provided by EDR, has revealed that there are 7 UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

FI Sites: This summary status report is a compilation and revision of other existing lists. It was developed from a number of lists including the Eckhardt list, the Moffit list, the EPA Hazardous Waste Sites list, EPA's Emergency and Remedial Response Information System list (RCRA Section 3012), and existing department lists such as the Obsolete Uncontrolled Hazardous Waste Sites list. The purpose of this list is to track the progress of activities within and outside the department as they relate to the listed sites. It is not a list of uncontrolled sites or sources causing environmental contamination. The Sites List comes from the Department of Environmental Protection.

A review of the FI Sites list, as provided by EDR, and dated 12/31/1989 has revealed that there is 1 FI Sites site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

A1A ISLAND AUTO EPA ID:: FLR000150656	1002 S 8TH ST	N 1/8 - 1/4 (0.246 mi.)	D15	34

DWM CONTAM: A listing of active or known sites. The listing includes sites that need cleanup but are not actively being working on because the agency currently does not have funding (primarily petroleum and drycleaning).

A review of the DWM CONTAM list, as provided by EDR, and dated 01/28/2019 has revealed that there are 2 DWM CONTAM sites within approximately 0.5 miles of the target property.

Program Site Id: 8629910

RESP PARTY: Open, inactive and closed responsible party sites

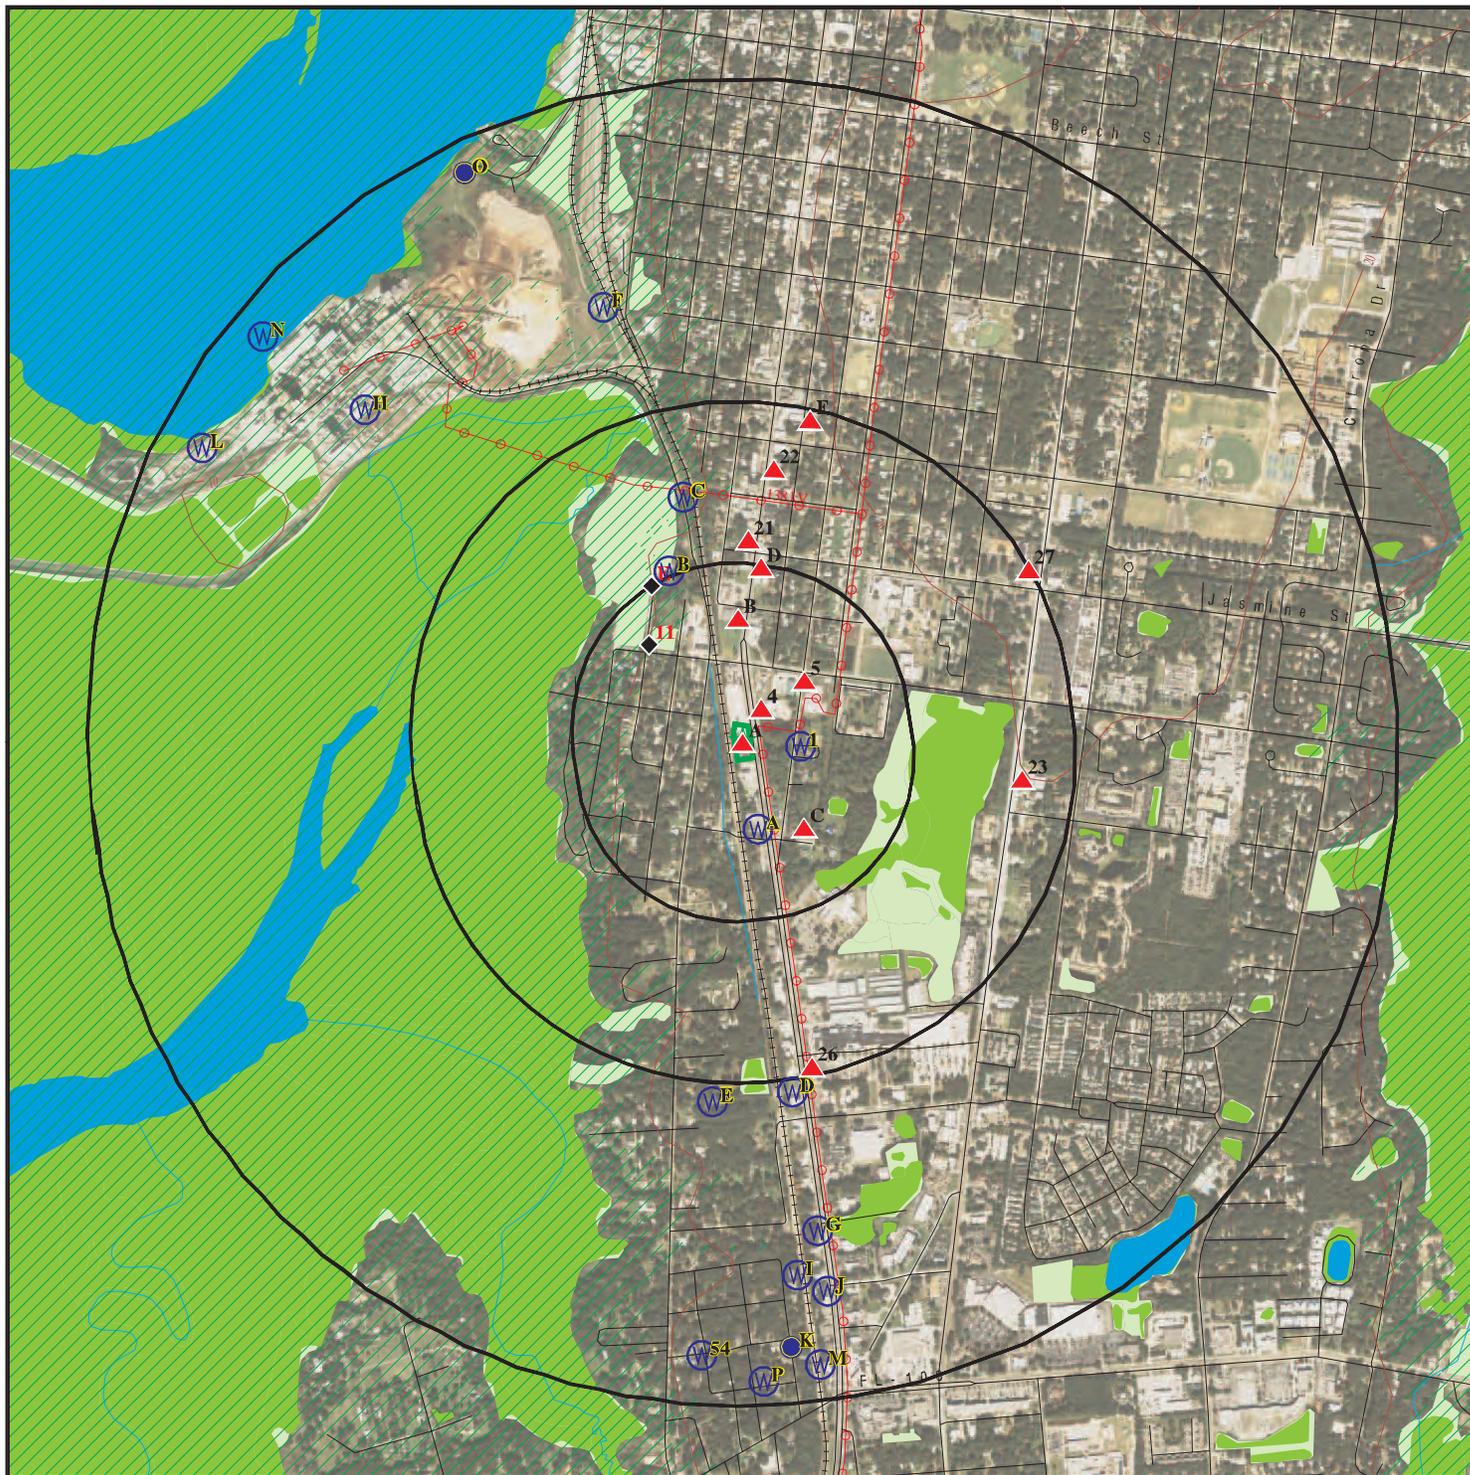

A review of the RESP PARTY list, as provided by EDR, and dated 09/29/2019 has revealed that there are 3 RESP PARTY sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
AMELIA ISLAND MOSQUI Site Status: CLOSED	SOUTH 11 STREET	SE 1/8 - 1/4 (0.134 mi.)	C7	17
FLOYD GARRETT CO INC Site Status: CLOSED	1310 S 14TH ST	E 1/4 - 1/2 (0.418 mi.)	23	70
CARRIAGE CLEANERS Site Status: CLOSED	1722 SOUTH 8TH STREE	SSE 1/4 - 1/2 (0.487 mi.)	26	74

EXECUTIVE SUMMARY

There were no unmapped sites in this report.

OVERVIEW MAP - 5981445.2S

Target Property

Sites at elevations higher than or equal to the target property

Sites at elevations lower than the target property

Manufactured Gas Plants

National Priority List Sites

Dept. Defense Sites

Indian Reservations BIA

Power transmission lines

Special Flood Hazard Area (1%)

0.2% Annual Chance Flood Hazard

National Wetland Inventory

State Wetlands

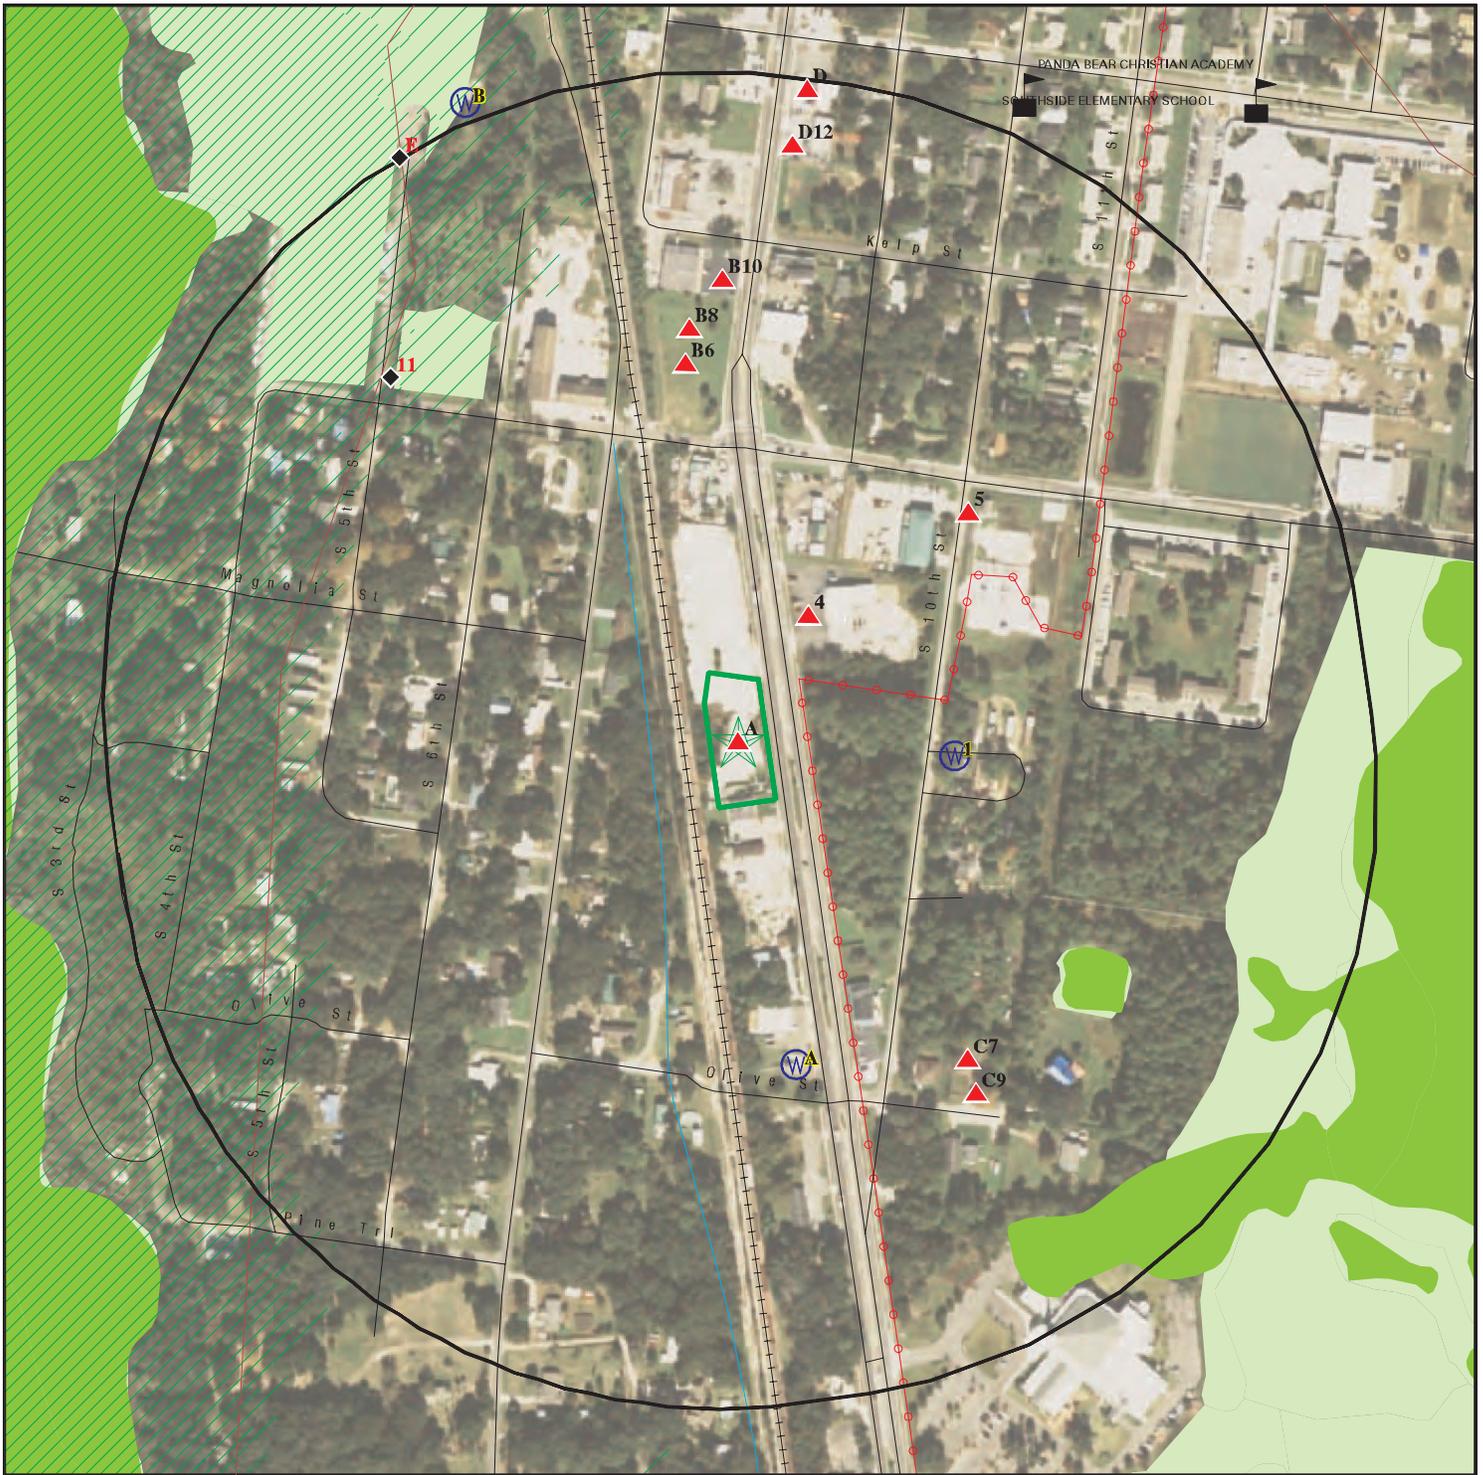

FL Brownfield

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/30/2020	Source: EPA
Date Data Arrived at EDR: 02/05/2020	Telephone: N/A
Date Made Active in Reports: 02/14/2020	Last EDR Contact: 02/05/2020

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 01/30/2020

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 01/30/2020	Source: EPA

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/16/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/16/2019	Telephone: (404) 562-8651

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/16/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/16/2019	Telephone: (404) 562-8651
Date Made Active in Reports: 12/20/2019	Last EDR Contact: 12/16/2019

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/16/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/16/2019	Telephone: (404) 562-8651

Number of Days to Update: 4	Next Scheduled EDR Contact: 04/06/2020
	Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/16/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/16/2019	Telephone: (404) 562-8651

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 11/04/2019	Source: Department of the Navy
Date Data Arrived at EDR: 11/13/2019	Telephone: 843-820-7326
Date Made Active in Reports: 01/28/2020	Last EDR Contact: 02/10/2020
Number of Days to Update: 76	Next Scheduled EDR Contact: 05/25/2020
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 11/22/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/22/2019	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2020	Last EDR Contact: 01/30/2020
Number of Days to Update: 67	Next Scheduled EDR Contact: 03/09/2020
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 11/22/2019	Source: Environmental Protection Agency

Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

SHWS: Florida's State-Funded Action Sites

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

State and tribal institutional control / engineering control registries

ENG CONTROLS: Institutional Controls Registry

The registry is a database of all contaminated sites in the state of Florida which are subject to engineering controls. Engineering Controls encompass a variety of engineered remedies to contain and/or reduce contamination, and/or physical barriers intended to limit access to property. ECs include fences, signs, guards, landfill caps, provision of potable water, slurry walls, sheet pile (vertical caps), pumping and treatment of groundwater, monitoring wells, and vapor extraction systems.

State and tribal Brownfields sites

BROWNFIELDS AREAS: Brownfields Areas Database

A "brownfield area" means a contiguous area of one or more brownfield sites, some of which may not be contaminated, that has been designated as such by a local government resolution. Such areas may include all or portions of community redevelopment areas, enterprise zones, empowerment zones, other such designated economically deprived communities and areas, and Environmental Protection Agency (EPA) designated brownfield pilot projects. This layer provides a polygon representation of the boundaries of these designated Brownfield Areas in Florida.

BSRA: Brownfield Site Rehabilitation Agreements Listing

The BSRA provides DEP and the public assurance that site rehabilitation will be conducted in accordance with Florida Statutes and DEP's Contaminated Site Cleanup Criteria rule. In addition, the BSRA provides limited liability protection for the voluntary responsible party. The BSRA contains various commitments by the voluntary responsible party, including milestones for completion of site rehabilitation tasks and submittal of technical reports and plans. It also contains a commitment by DEP to review technical reports according to an agreed upon schedule. Only those brownfield sites with an executed BSRA are eligible to apply for a voluntary cleanup tax credit incentive pursuant to Section 376.30781, Florida Statutes.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

FL Cattle Dip. Vats: Cattle Dipping Vats

From the 1910's through the 1950's, these vats were filled with an arsenic solution for the control and eradication of the cattle fever tick. Other pesticides, such as DDT, were also widely used. By State law, all cattle, horses, mules, goats, and other susceptible animals were required to be dipped every 14 days. Under certain circumstances, the arsenic and other pesticides remaining at the site may present an environmental or public health hazard.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

DADE MRE: Maimi River Enforcement

The Miami River Enforcement database files were created for facilities and in some instances vessels that were inspected by a workgroup within the Department that was identified as the Miami River Enforcement Group. The files do not all necessarily reflect enforcement cases and some were created for locations that were permitted by other Sections within the Department.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

UTM Y (Meters): 3391153.8
Elevation: 15 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 5656171 FERNANDINA BEACH, FL
Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

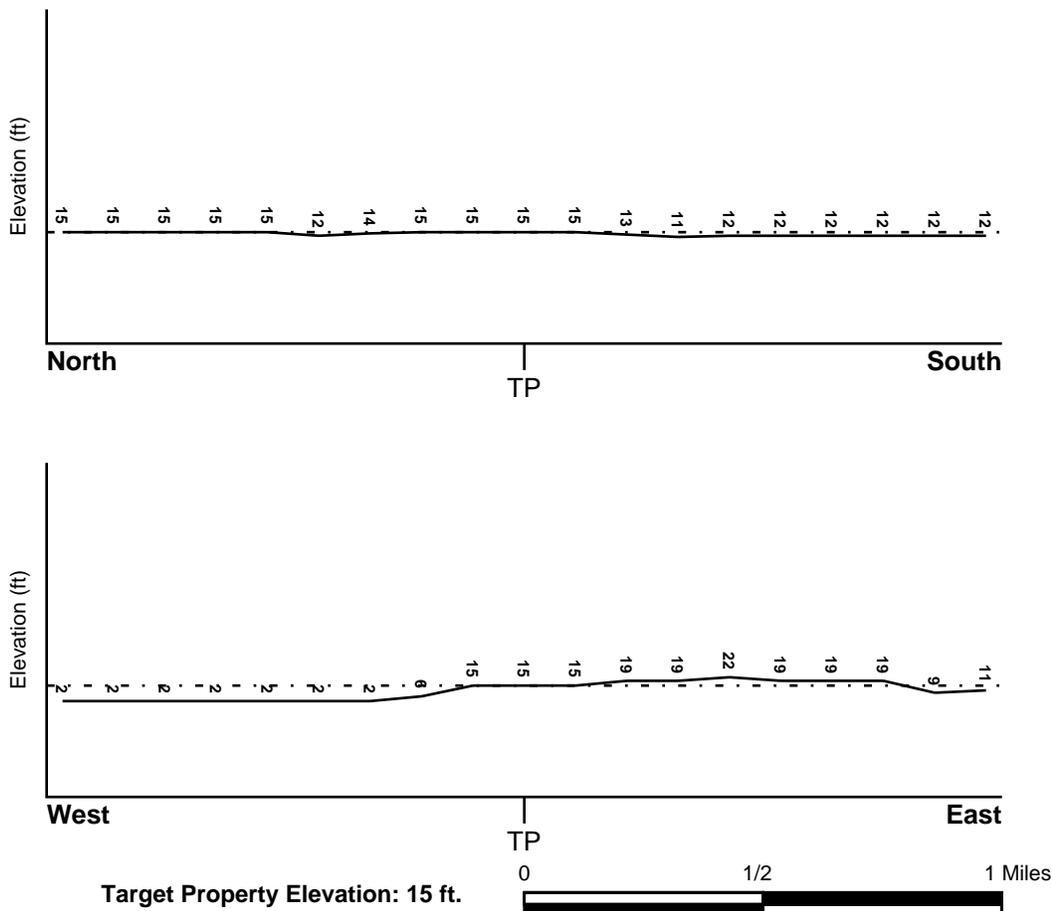

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

12089C0238F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
FERNANDINA BEACH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Holocene
Code: Qh (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: KUREB
Soil Surface Texture: fine sand
Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.
Soil Drainage Class: Excessively. Soils have very high and high hydraulic conductivity and low water holding capacity. Depth to water table is more than 6 feet.
Hydric Status: Soil does not meet the requirements for a hydric soil.
Corrosion Potential - Uncoated Steel: LOW
Depth to Bedrock Min: > 60 inches
Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	80 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Fine Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 20.00 Min: 6.00	Max: 7.30 Min: 3.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: sand

Surficial Soil Types: sand

Shallow Soil Types: sand

Deeper Soil Types: sand
coarse sand

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Advanced Environmental Technologies were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # C83A-4D2E-A4C7

Appendix F:
Qualifications

GORDON DEAN, PE

Vice President

Mr. Dean's areas of specialization include: Contract and Project Management, Soil and Groundwater Sampling and Laboratory Analysis Methodology, Underground and Aboveground Storage Tank Site Assessment, Remediation, Removal and Compliance, Monitoring and Recovery Well Installation, Remedial Action Design and Implementation, Phase I and Phase II Environmental Assessments, Permitting and Regulatory Report Preparation, and Toxic and Hazardous Materials Management. Examples of his work experience include:

- Program Manager responsible for procuring and managing six contracts with Florida Department of Environmental Protection (FDEP) statewide. These contracts were the Petroleum Cleanup Program Team 5, Petroleum Cleanup Program Equipment Management, Drycleaning Solvent Cleanup Program, Division of State Lands Environmental Site Assessments, Division of State Lands Baseline Documentation, and Division of State Lands Conservation Easement Monitoring.
- Program and Contract Manager for the Team 5 contract providing up to 24 technical and administrative personnel to the FDEP as well as oversight of the FDEP Equipment Management contract.
- Program Manager and Sr. Project Engineer for the FDEP Division of State Lands ESA contract, Statewide Florida. In this role, Mr. Dean supervised, signed, and sealed over 4,000 environmental site assessments covering approximately 2% of the total land area of the State of Florida. He was also the design engineer for feasibility studies and pilot testing for toxaphene remediation at the Belle Glade Airport site
- Project Manager/Sr. Design Engineer for the Fairbanks Disposal Pit, Gainesville, Florida. This FDOT site had contaminant impacts to four aquifers. The site was regulated by CERCLA/ RCRA under an Administrative Consent Order. Mr. Dean designed Corrective Action Plans for all four aquifers, including the use of innovative, high-volume horizontal wells for the surficial aquifer.
- Design Engineer, USEPA Region IV Emergency Response Contract. Mr. Dean served as the design engineer for a 2-mile long potable water pipeline. The pipeline provides potable water to families impacted by the Ram Leather Superfund Site in Charlotte, North Carolina. The work was funded by EPA, and connects an existing potable water pipeline from the City of Concord to four houses whose wells have been impacted by chlorinated solvents. The pipeline crosses a county line, the boundary between two DOT districts, and a railroad. Approval of the design was coordinated between all parties.
- Sr. Project Engineer at sites throughout Florida. Mr. Dean designed groundwater and soil treatment systems for over 150 petroleum and 20 hazardous waste sites in Florida. The treatment systems have included pump and treat, groundwater sparging, soil vapor extraction, carbon adsorption, and free product recovery.

EDUCATION:

- *B.S., Chemical Engineering, University of Florida (1983)*

PROFESSIONAL REGISTRATION:

- *Professional Engineer (P.E.) in Florida, Georgia, Alabama, Mississippi, Louisiana, North Carolina, and South Carolina*

PROFESSIONAL ASSOCIATIONS:

- *National Council of Examiners for Engineering & Surveying (NCEES)*
- *Designated as a Model Law Engineer by NCEES*

ADDITIONAL TRAINING:

- *OSHA 40 Hour Safety Training, Annual 8 Hour Refresher Current*
- *OSHA 8 Hour Site Supervisor Training*
- *OSHA Instructor Training*
- *US Army Corps of Engineers, Construction Quality Management for Contractors, 2004*
- *Design and Construction of Soil Liners and Covers, 1994*
- *Remediation of Chlorinated and Recalcitrant Compounds, 2004*
- *Drycleaning Solvent Cleanup Program Contractor's Workshops, 1997,1998,1999*
- *National Public Land Acquisition and Management Partnership Conference, 2005*
- *Office of Supplier Diversity – One Florida Roundtable, 2001*
- *Approaches to Attenuation and Remediation in Karstic Settings, 2000*

YEARS OF EXPERIENCE: 30

GORDON DEAN, PE

Vice President

- Sr. Project Engineer for Florida DOT, Chadbourne Construction Facility in Pensacola, Florida. Mr. Dean designed a treatment system for remediation of chlorinated solvents. The system consisted of soil vapor extraction, groundwater recovery from four recovery wells and air stripping of the recovered water. This was the first chlorinated solvent site in Florida to obtain a Site Rehabilitation Completion Order.
- Major author of the Water Quality Impact Evaluation Manual (guidance for Part 2, Chapter 20 of the FDOT PD&E Manual). In addition to completing portions of the manual, Mr. Dean also presented the associated course numerous times, training over 200 FDOT employees.
- Sr. Project Engineer for the Nanak Cleaners Site in Winter Park, Florida. This project was completed under the Drycleaning Solvent Cleanup Program administered by FDEP. Mr. Dean designed an air sparging and horizontal soil vapor extraction system.
- Sr. Project Engineer at the Town and Country Cleaners Site in Orange Park, Florida. This project was completed under the Hazardous Waste Cleanup Program administered by FDEP. Mr. Dean designed air sparging and horizontal soil vapor extraction system.
- Sr. Engineer and Technical Support for seven Florida DOT contracts. Services provided by Mr. Dean included contamination assessment, Level I and II assessments, impact to construction assessment, initial remedial action, remedial design, underground storage tank (UST) removal and closure, supervision of treatment system installation, O&M, permitting, and community relations.
- On-Scene Coordinator at sites throughout Florida. Mr. Dean served as the on-scene coordinator at over 30 CERCLA and hazardous waste sites throughout the State.
- Design Engineer at the Florida DOT Goldenrod Road Project in Orlando, Florida. Mr. Dean designed a groundwater contamination plume capture system which involved counter pumping and water table flooding to create a series of hydraulic divides to complement the dewatering system effect and overcome its hydraulic loading characteristics. This system allowed construction to proceed with little or no downtime, and is believed to be the first such application in the United States.
- Project Engineer/Manager at fueling station sites throughout Florida. Mr. Dean designed and supervised installation of over 30 aboveground fuel storage and dispensing systems for various Florida DOT maintenance yards.
- Project Coordinator/Engineer at the Brown Wood Preserving Site in Live Oak, Florida. Mr. Dean coordinated and reviewed plans for remediation activities at the site. This project was one of the only known successful bioremediation clean-closure sites in the state at that time.

INVITED SPEAKER:

- Florida Remediation Conference, 2009, *Innovative Uses of Large Diameter Augers in Site Remediation*
- NISTM Florida and National Conferences, 2008, *Basics of Site Assessment and Remediation*
- NISTM Aboveground Storage Tank Conference, 2008, *Basics of AST Site Remediation*
