

Online Branded Lash Extensions & Accessories

This is an established e-commerce lash brand with a live online store and a clean, professional presentation. The business is fully set up and operating, allowing a new owner to step in without needing to build systems from scratch.

Sales are made directly through the website, with low overhead and flexible operations. The business can be run remotely and offers clear room for growth through marketing, content, and expanded product offerings. It is well suited for a beauty professional or entrepreneur seeking a simple, scalable online business.

An optional private beauty studio is available if the buyer chooses to take it. The studio is a rental property and is not required to operate the e-commerce business. It can be used for services, content creation, or product storage. This is a turnkey online brand with growth potential and minimal day-to-day complexity.

Asking \$120,000
