Twin Springs Bottling Co. is located high in the Rocky Mountains of south eastern Idaho. This area is rich in pioneer history. Being located just off the Oregon Trail, many pioneers, miners, trappers and explorers came through. Soda Springs and the surrounding area are still well known for sparkling mineral waters, hot springs, and the worlds only man-made geyser.

The water source supplying Twin Springs Bottling Co. runs close to a million gallons of water a day. The water temperature is a constant 47 degrees. This temperature and rate flow never fluctuates, even in a dry year.

The natural purity of this water makes it not only an excellent cold drink, but great for cooking. Use it to make your favorite soups, stews and various hot beverages.

We are proud to introduce this fine spring water to the public.

Sincerely,

Randy & Zella Corder

*Twin Springs Bottling Co. is located just off the Oregon Trail, south of Soda Springs, Idaho. It was a favorite campsite of Indians and early pioneers because of the purity of the water. In the 1800's when the railroad came through, it was scheduled to be buried. The pioneer owners held the workers off at gunpoint to force them to reroute the tracks.*

*natural spring water from the Idaho Rockies*
