ZONING & DEMOGRAPHICS

Commercial Intensive Zoning: The primary aim of this zoning is to foster organized development for various commercial activities catering to local and regional needs, including retail, service, wholesale, light manufacturing, and warehouse uses. These areas are ideally situated with direct access to major thoroughfares to efficiently handle high traffic volumes. Permitted uses range from retail outlets and service establishments to recreational facilities, professional offices, and hospitality establishments like hotels and motels. Special restrictions are imposed regarding the sale of alcoholic beverages near churches and schools, and certain uses are conditional, such as hospitals, boat yards, light manufacturing, and educational institutions. Specific regulations also govern lot requirements, yard dimensions, building heights, lot coverage, and landscaping to ensure orderly and harmonious development within the CI district.
