Disclosure Statement Additional Information

Line 45 (Encroachments): There is an encroachment by the neighboring property, Heidi's, on the southwest corner of our lot. Part of a deck and stairs as well as a leased propane tank are on our property. Please see the survey for details. Part of the lot on the southeast corner is used by our neighbors with their back yard. We had the previous owners sign a lease to use this corner of the property. We had new neighbors move in and have not discussed with them yet.

Line 56 (survey): There is a partial survey for the south side of the property that has been recorded.

Line 126 (Roof): The roof was replaced in 2020, prior to this the old roof had several leaks. The new roof has a one-time transferable warranty. The gutters were also replaced in 2021.

Lines 134 - 143 (Defects): Ceiling: the parlor ceiling has cracks from previous water damage. The innkeeper's quarters bathroom is missing part of the ceiling due to fixing a previous water leak in the bathroom shower above. The dining room ceiling has a crack from a previous leak in the bathroom shower above. Sidewalks: Many of the original sidewalks have large cracks. Windows: Several of the original single pane windows have issues ranging from broken panes, insufficient glazing leading to small leaks, broken hardware, and/or are nonfunctional (painted shut or ropes cut). Other: During heavy rains and winds we would find puddles of water on the garage floor that we traced to the northeast corner of the garage. We repaired part of the northeast corner wall and replaced the double doors in the northeast corner of the chapel. We have not had any leaks or puddles in the garage since.

Lines 199 and 203 (Flooding and Wetlands): the $\frac{3}{4}$ acre lot to the north of the building often has standing water, particularly in rainy season.

Line 235 (Other Conditions): We have been trying to locate and repair small leaks in two window dormers, one is in room 4 and the other in room 5. We have had professional contractors try to trace and fix the leaks, including adding flashing to the dormers. While this has significantly reduced the leaks there is still some water penetrating the dormers that appears to be around the windows. We have placed buckets to catch the drips that typically occur during strong winds and heavy rains.
