PROPERTY DESCRIPTION

ROUTE 39 | LEXINGTON, VA 24450

The Art Farm in Lexington, VA

Lexington, Virginia is an attractive, multi-venue, destination tourist market. Two of Virginia's most prestigious educational institutions - VMI and W&L University - are located within the downtown Lexington District. Lexington's entire downtown district is listed on the National Register District of Historic Places.

Lexington's bucolic center is located just 2½ miles west of the Client's Site.

Lexington, with it population of 7000, is the county seat and the largest city in Rockbridge County. The next largest city in he County, Buena Vista, with a population of 6300, lies 6 miles to the east of Lexington. The local economy of the larger market area (to include Rockbridge County) has a population of 34000 residents and an employed base of 14000 workers. The market is diversified and not entirely reliant on tourism.

The single most important influence on the local economy and, for that matter, on the Proposed Hotel is the Horse Center (the "Center") located on Route 39 just two miles east of downtown Lexington. Since opening in 1987, the Center has hosted nearly 1,000 events of state, national and international importance - it has attracted 300,000 participants and almost 5 million spectators to its diverse annual programs......and, the Horse Center has contributed \$ 30 million per year to the local economy. In 2002, the Center hosted 81 horse events spread over 242 days. A typical event includes 350 to 400 horses and approximately 4000 participants, spectators or exhibitors. Most events are multi-day programs, many are three or four day events.

The Lexington Area' lodging business has grown significantly since the inception of the Horse Center. Lexington's current lodging (about 1,200 rooms in total) has benefitted from the growth and expansion of the Horse Center. A recent study undertaken by the University of Virginia attributes annual lodging expenditures of \$6.3 million to activities and events at the Center. Hotels located closer to the Center would be expected to capture a significantly greater portion of revenues from activities at the Center.
