RELIANCE LETTER

September 6, 2023

To: First Commonwealth Bank (“Lender”)
6015 Mountain View Drive
West Mifflin Pennsylvania 15122
and
U.S. Small Business Administration (“SBA”)

Re: Borrower Name: Lainey Hope Events, LLC
Project Address (“Property”): 3836 William Penn Avenue, Johnstown, PA
Environmental Investigation Report Number(s): LHE-2023-211

Dear Lender and SBA:

Stephen A Zbur, PG (“Environmental Professional”) meets the definition of an Environmental Professional as defined by 40 C.F.R. § 312.10(b) and has performed or supervised the performance of the following “Environmental Investigation(s)” (check all that apply):

_____ A Transaction Screen of the Property dated _____, 20____, and any addendum(s) thereto, conducted in accordance with ASTM International’s most recent standard (currently ASTM E1528-14);

A Phase I (or an Updated Phase I) Environmental Site Assessment of the Property dated September 6, 2023, and any addendum(s) thereto, conducted in accordance with ASTM International’s most recent standard (currently ASTM E1527-13). In addition, the Environmental Professional has addressed the performance of the “additional inquiries” set forth at 40 C.F.R. § 312.22;

_____ A Phase II Environmental Site Assessment of the Property dated _____, 20____, and any addendum(s) thereto, conducted in accordance with generally-accepted industry standards of practice and consisting of a scope of work that would be considered reasonable and sufficient to identify the presence, nature and extent of a Release as it impacts the Property.

Reliance by SBA and Lender. Environmental Professional (and Environmental Professional’s firm, where applicable) understand(s) that the Property may serve as collateral for an SBA- guaranteed loan, a condition for which is an Environmental Investigation of the Property by an Environmental Professional. Environmental Professional (and Environmental Professional’s firm, where applicable) authorize(s)

Lender and SBA to use and rely upon the Environmental Investigation. Further, Environmental Professional (and Environmental Professional's firm, where applicable) authorize(s) Lender and SBA to release a copy of the Environmental Investigation to the Borrower for information purposes only. This letter is not an update or modification to the Environmental Investigation. Environmental Professional (and Environmental Professional's firm, where applicable) makes no representation or warranty, express or implied, that the condition of the Property on the date of this letter is the same or similar to the condition of the Property described in the Environmental Investigation.

Insurance Coverage. Environmental Professional (and/or Environmental Professional's firm, where applicable) certifies that he or she or the firm was covered as of the date of the Environmental Investigation by errors and omissions liability insurance with a minimum coverage of \$1,000,000 per claim (or occurrence) and that evidence of this insurance is attached. As to the Lender and SBA, Environmental Professional (and Environmental Professional's firm, where applicable) specifically waive(s) any dollar amount limitations on liability up to \$1,000,000 as well as any time limitations on liability, other than state or Federal statutes of limitation.

Waiver of Right to Indemnification. Environmental Professional and Environmental Professional's firm waive any right to indemnification from the Lender and SBA.

Impartiality. Environmental Professional certifies that (1) to the best of his or her knowledge, Environmental Professional is independent of and not a representative, nor an employee or affiliate of seller, Borrower, operating company, or any person in which seller has an ownership interest; and (2) the Environmental Professional has not been unduly influenced by any person with regard to the preparation of the Environmental Investigation or the contents thereof.

Acknowledgment. The undersigned acknowledge(s) and agree(s) that intentionally falsifying or concealing any material fact with regard to the subject matter of this letter or the Environmental Investigations may, in addition to other penalties, result in prosecution under applicable laws including 18 U.S.C. § 1001.

Signature of Environmental Professional Printed Name: Stephen A. Zbur

(Note: The Environmental Professional must **always** sign this letter above. If the Environmental Professional is employed or retained by an Environmental Firm, then an authorized representative of the firm must also sign below).

Signature of representative of firm who is authorized to sign this letter Printed Name & Title: Stephen A Zbur, President

Name of Environmental Firm: CORE Environmental Services, Inc.

Enclosure: Evidence of Insurance

EXECUTIVE SUMMARY

CORE Environmental Services, Inc. (CORE) was retained by Lainey Hope Events, LLC (referred to as the User and Borrower) to conduct a Phase I Environmental Site Assessment (ESA) for the subject property located at 3836 William Penn Avenue, Johnstown, Cambria County, Pennsylvania (PA) (referred to as the “subject property”). First Commonwealth Bank requested the Phase I ESA in anticipation of the User securing a loan for purchasing the subject property. The Phase I ESA was performed in general conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) Standard E1527-21 (*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*).

The subject property consists of five Cambria County tax parcels (34-008.-114.000, 34-008.-145.001, 34-027.-107.000, 34-027.-115.000 and 34-027.-107.001)) which are approximately 18-acres total. The property is a vacant commercial lot.

The subject property is owned by Timothy Laughard, who purchased it in November 2019. According to Mr. Laughard, the property was a driving range from approximately 2004 to 2011. Prior to the driving range, the property was used as a staging area for highway equipment and vehicles. Review of an aerial photograph from 1981 indicates that earth moving activities possibly associated with strip mining is occurring in the southeast portion of property. The 1993 aerial photograph does not show any evidence of strip mining and review of a topographic map from 1981 and 1984 does not identify mining or coal dump operations on or near the property. Additionally, DEP’s eMapPA was accessed to search for mining files associated with the property. Review of eMap identified potential deep mining operations from the 1950s beneath portions of the subject property and adjacent properties.

The property is undeveloped. Fill is present throughout the property and was brought in by Mr. Laughard to begin development in 2019. The location of the fill is unknown; however, Mr. Laughard believes it was obtained from a property that was undeveloped. Mr. Laughard indicated some fill was present when he purchased the property and is not aware of the location the historical fill was obtained from.

An unnamed tributary to South Branch Blacklick Creek is present in the northeastern portion of the property. No sheen or evidence of environmental impact in the vicinity of the stream was observed. No petroleum products were observed to have been stored or sold on the subject property based on the site reconnaissance and the nature of historical operations. No underground or aboveground storage tanks currently exist at the property and no known USTs or ASTs are known to have existed at the property.

As of the date of this report, the Environmental Lien, Activity and Use Limitations (AULs), and Title Records Report (going back to 1980) has not been received by the User. The lack of these reports and the title search constitutes a data gap. However, the information that would have been provided in these reports, is unlikely to impact the findings of this report and are not considered significant data gaps.

CORE has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 for the subject property located at 3836 William Penn Avenue, Johnstown, Cambria County, Pennsylvania. Any exceptions to, or deletions from, this practice are described in Section 1.1.4 of this report. This assessment has revealed no recognized environmental conditions (RECs), controlled RECs, or significant data gaps in connection with the subject property.

Based on the conclusions of this Phase I ESA, it is our opinion that no further environmental assessment and/or remediation is warranted. A Phase II ESA is not recommended.

However, based on historical deep mining activities and the potential presence of mineshafts beneath the subject property, we recommend retaining a geotechnical consulting firm to assist with any future building design(s).

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

**3836 WILLIAM PENN AVENUE
JOHNSTOWN, CAMBRIA COUNTY, PENNSYLVANIA**

CORE PROJECT NO.: LHE-2023-211

1.0 INTRODUCTION

CORE Environmental Services, Inc. (CORE) was retained by Lainey Hope Events, LLC (referred to as the User and Borrower) to conduct a Phase I Environmental Site Assessment (ESA) for the subject property located at 3836 William Penn Avenue, Johnstown, Cambria County, Pennsylvania (PA) (referred to as the “subject property”). First Commonwealth Bank requested the Phase I ESA in anticipation of the User securing a loan for purchasing the subject property. The Phase I ESA was performed in general conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) Standard E1527-21 (*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*).

1.1 Objective and Scope of Services

The objective of the Phase I ESA was to identify recognized environmental conditions (RECs) associated with the subject property. The ASTM E1527-21 standard Section 3.2.73 defines the term “*recognized environmental condition*” as:

“(1) the presence of *hazardous substances* or *petroleum products* in, on, or at a *subject property* due to a *release* to the *environment*; (2) the likely presence of *hazardous substances* or *petroleum products* in, on, or at a *subject property* due to a *release* or likely *release* to the *environment*; or (3) the presence of *hazardous substances* or *petroleum products* in, on, or at a *subject property* under conditions that pose a *material threat* of a future *release* to the *environment*.”

The following activities were conducted as part of this Phase I ESA:

1.1.1 Records Review

A review of the following information was performed for the subject property and parcels located within the approximate ASTM minimum search distance from the subject property:

- historical and current 7.5-minute and 15-minute United States Geological Survey (USGS) topographic maps;
- applicable environmental database information provided by Environmental Data Resources (EDR), a private firm that conducts federal and state database searches;
- aerial photographs provided by EDR;

- city directories provided by EDR;
- Cambria County Property Assessment information;
- land title records for documents recorded between 1980 and the present; and,
- environmental lien search and subject property tax map report provided by EDR.

Whenever possible, supporting documentation has been provided as appendices to this report.

1.1.2 Site Reconnaissance

A site reconnaissance was performed to obtain the following information:

- visual observations of current uses at the subject property likely to involve the use, treatment, storage, disposal, or generation of hazardous substances or petroleum products;
- visual review of adjacent properties to determine if RECs and/or controlled RECs (CRECs) are present and the potential impact on the subject property;
- local topographic conditions were observed to determine if potential pathways exist for hazardous substances or petroleum products to migrate onto the subject property; and,
- photo-documentation of current and adjacent property activities and conditions.

The site reconnaissance included an internal examination of the subject property and an observation of the subject property boundaries. The site reconnaissance did not include entering the adjoining properties.

1.1.3 Interviews

Interviews conducted with individuals familiar with the subject property and adjacent properties located within the ASTM search distance included:

- Mr. Zach Lander, Lainey Hope Events, LLC, borrower.
- Mr. Tim Laughard, subject property owner.

Mr. Laughard has owned the property since 2019.

1.1.4 Deviations from the ASTM E 1527-21 Standard

None of the traditional non-scope considerations listed in the ASTM Standard, E 1527-21, Section 13 were performed as part of the Phase I ESA. However, limited visual observations were made for asbestos-containing building materials (ACBM), lead-based paint (LBP), mold, and wetlands.

1.2 Subject Property Location and Description

The subject property consists of five Cambria County tax parcels (34-008.-114.000, 34-008.-145.001, 34-027.-107.000, 34-027.-115.000 and 34-027.-107.001) which are approximately 18-acres total. The property is a vacant commercial lot.

Based on a review of the 2019 Nanty Glo, PA USGS topographic map (Figure 1), surface elevation at the subject property is approximately 1,835-feet above mean sea level. Topography of the subject property is relatively flat with a gentle downward slope towards the northeast. The inferred shallow groundwater flow direction in the vicinity of the subject property is to the northeast, based on review of topography.

1.3 Subject Property History

The subject property is owned by Timothy Laughard, who purchased it in November 2019. According to Mr. Laughard, the property operated as a driving range from approximately 2004 to 2011. Prior to the driving range, the property was used as a staging area for highway equipment and vehicles.

2.0 RECORDS REVIEW

2.1 Previous Land Use

2.1.1 Historical Aerial Photographs

Historical aerial photographs of the subject property and surrounding area were provided by EDR. Aerial photographs for 1939, 1948, 1958, 1962, 1967, 1972, 1981, 1993, 2002, 2005, 2010, 2013, and 2017 were reviewed for indications of previous uses of the subject property. Copies of the aerial photographs are included in Appendix A and a summary of observations is presented below.

Period	Subject Property Observations	Adjoining Properties Observations
1939	Undeveloped/wooded.	North: Wooded South: Undeveloped/wooded East: Agricultural West: Wooded
1948, 1958	Undeveloped/wooded to the north. Southern portion of property is cleared.	North: Wooded South: Residential East: Undeveloped West: Road, followed by residential
1962, 1967, 1972	Undeveloped/wooded.	North: Road, followed by undeveloped South: Residential East: Undeveloped West: Wooded
1981	Northwest portion is wooded. Earth moving activities possibly associated with strip mining is occurring in	North: Road, followed by undeveloped South: Residential East: Mining activity. West: Road, followed by residential

Period	Subject Property Observations	Adjoining Properties Observations
	the southeast portion of property.	
1993, 2002, 2005, 2015, 2019	Undeveloped/wooded.	North: Road, followed by commercial property South: Residential East: Commercial West: Road, followed by residential and commercial

The potential mining operations identified on the 1981 aerial image could represent a potential concern. However, the topographic map from 1981 does not identify any mining or dump operations on or near the property. The 1993 aerial also does not show any evidence of strip mining.

Additionally, DEP’s eMapPA was accessed to search for mining files associated with the property. Review of eMap identified potential deep mining operations from the 1950s beneath portions of the subject property and adjacent properties.

2.1.2 Certified Sanborn Map

Sanborn Fire Insurance (Sanborn) maps date back to the 1880s and typically identify the type of business, the size of the operation, and the layout of buildings on a given property, and may include the types of materials stored or utilized on-subject property.

Sanborn maps were searched by EDR for the subject property as documented in Appendix B. Map coverage for the subject property was not found.

2.2 Regulatory Data Base Searches

CORE retained EDR to conduct a search of federal, state, and tribal environmental databases to identify facilities of potential environmental concern located within the radius specified by ASTM Standard E1527-21. A copy of the EDR Radius Map report dated August 11, 2023, is included as Appendix C. A complete list and description of all databases searched can be found at the end of the EDR report. A summary of the database findings is presented in the following sections.

2.2.1 Subject Property

The subject property was not identified in any of the databases searched by EDR.

2.2.2 Surrounding Properties

The following table summarizes the sites identified by EDR on ASTM standard environmental record sources within a one-mile radius of the subject property:

Phase I Environmental Site Assessment Report

3836 William Penn Avenue
Johnstown, Cambria County, Pennsylvania

Database	ASTM Minimum Search Distance (miles)	<0.125 Mile	0.125 to 0.25 Mile	0.25 to 0.50 Mile	0.50 to 1.00 Mile
Resource Conservation and Recovery Act (RCRA) – Small Quantity Generator (SQG)	0.25	0	1	Not Requested at this Search Distance (NR)	NR
RCRA Very (V) SQG	0.25	2	1	NR	NR
Leaking Aboveground Storage Tank (LAST)	0.50	0	0	1	NR
Leaking Underground Storage Tank (LUST)	0.50	2	0	0	NR
Underground Storage Tank (UST)	0.25	2	1	NR	NR
Aboveground Storage Tank (AST)	0.25	0	1	NR	NR
Archive UST	0.25	0	1	NR	NR
Abandoned Mines	0.25	0	1	NR	NR
Manifest	0.25	2	1	NR	NR
EDR Historical Auto	0.125	2	NR	NR	NR

The following table details the surrounding properties identified by EDR on ASTM standard environmental record sources within a 0.125-mile radius of the subject property:

Phase I Environmental Site Assessment Report3836 William Penn Avenue
Johnstown, Cambria County, Pennsylvania

Page 6

Detailed Summary	
Site Name	Sheetz Store No 048
Address	115 Pace Street
Databases	Manifest, Historical Auto, RCRA VSQG, LUST, UST
Distance	533 Feet
Direction	North/northwest
Elevation	Higher
Comments	<p>Manifest - Manifests track hazardous waste from the time it leaves the generator facility where it was produced, until it reaches the off-site waste management facility that will store, treat or dispose of the hazardous waste. Generator EPA ID: PAR000525659.</p> <p>Historical Auto – 1996 through 2014, Convenience stores.</p> <p>RCRA VSQG - A generator who generates less than or equal to the following amounts in a calendar month: 100 kilograms (kg) (220 pounds) of nonacute hazardous waste. No violations found.</p> <p>LUST – UST containing diesel fuel, impacted soil, cleanup completed: 02/16/2016.</p> <p>UST – 4/15,000-gallon USTs containing gasoline, currently in-use. 1/15,000-gallon UST containing diesel fuel, currently in-use. 1/30,000-gallon UST containing diesel fuel, currently in-use. 1/6,000-gallon UST containing kerosene, currently in-use.</p>
<p>Due to the lateral distance and the expected groundwater flow direction to the north, this facility is presumed to be located hydraulically cross-gradient to the subject property and does not pose an environmental concern to it.</p>	

Detailed Summary	
Site Name	United Refining Company Kwik Fill S81
Address	3786 William Penn Avenue
Databases	Manifest, Historical Auto, UST, RCRA VSQG, LUST
Distance	643 Feet
Direction	Southwest
Elevation	Higher
Comments	<p>Historical Auto – 1995 through 2014, Gasoline service stations.</p> <p>UST – 2/15,000-gallon USTs containing gasoline, currently in-use. 1/15,000-gallon UST containing diesel fuel, currently in-use.</p> <p>RCRA VSQG - No violations found.</p> <p>LUST – UST containing petroleum, impacted soil, interim or remedial actions initiated: 05/27/2020.</p>
<p>Interim or remedial actions initiated at this facility. Accordingly, this site is not considered a REC.</p>	

None of the sites identified in the table above are located on adjoining properties.

2.2.3 State and County Right-to-Know Requests

On August 11, 2023, CORE requested files for the subject property from the PA Department of Environmental Protection (DEP) Southwest Regional Office (SWRO) and Cambria County as part of a public right-to-know request. Files associated with USTs, spills, cleanups, and fires, and hazardous materials responses were requested for all tax parcels and addresses associated with the property.

On August 14, 2023, DEP SWRO replied stating they have no responsive records. On August 16, 2023, Cambria County responded they have no record of any hazmat calls to this location. Correspondence is included in Appendix D.

2.2.4 Unmappable Sites

No records were identified in the EDR Orphan Summary.

2.2.5 Vapor Encroachment Screen

Vapor encroachment occurs when volatile constituents have the potential to migrate as vapors onto a property and into indoor air as a result of contaminated soil or groundwater on or near the subject property.

Review of the regulatory records provides no evidence of potential off-property environmental concerns affecting the property. Also, no evidence of an on-property vapor intrusion source (e.g., a release of volatile organic compounds) exists based on this Phase I ESA. Therefore, no evidence of a vapor intrusion source to indoor air was identified.

2.3 Property Physical Data

2.3.1 Hydrogeologic

The property is located in the Appalachian Plateau physiographic province. This section is comprised of valleys and ridges, and is characterized as a maturely dissected plateau.

The unconsolidated materials that underlie the property consist of cyclic sequences of limestone, shale, sandstone, and coal. The bedrock underlying the site consists of Pennsylvania age rocks of the Glenshaw Formation.

Groundwater in the Appalachian Plateau physiographic province occurs in two hydrogeologic units comprised of the surficial aquifer (unconsolidated sand, gravels, silts, and clays) and the underlying Paleozoic bedrock aquifer. Occasionally, groundwater may be encountered in perched zones due to the presence of higher, shallow permeable units surrounded by lower permeable units. Groundwater in the unconsolidated unit usually exists under unconfined conditions in intergranular pores. Groundwater within the bedrock exists under confined or unconfined conditions and occurs primarily along bedding features due to a lack of continuous intergranular porosity. Groundwater in the saturated, unconsolidated unit is recharged by the infiltration of rainfall, from losing surface water bodies such as streams and ponds and

from perched water bearing units. The bedrock aquifer is generally recharged by infiltration of groundwater from the overlying unconsolidated aquifer, when present, or in outcropping areas through rainfall.

2.3.2 Flood Plain

Review of Federal flood plain information provided by EDR indicates no portion of the subject property is within a flood plain. A 100-year flood plain is present approximately 3,150 feet northeast of the subject property.

2.3.3 Wetlands

According to the EDR report, there are no Federally recognized wetlands identified on the property. The nearest wetland area is located approximately 2,460 feet east of the subject property.

2.3.4 Water Wells

The EDR report did not identify Federal USGS well, Federal public water supply system wells, or State water wells on-property. The EDR report identified three Federal public water supply system wells with the nearest located 3,291 feet southwest of the subject property, one public water supply system well located 312 feet southwest of the subject property and 29 State water wells within a one-mile radius of the subject property with the nearest reported to be 983 feet southwest of the subject property.

2.3.5 Oil/ Gas Wells

According to the EDR report, no oil/gas wells are known to exist on the subject property or within an one-mile radius of the subject property.

2.3.6 City Directories

City directories were searched by EDR for the years spanning from 1965 through 2020. The property address of 3836 William Penn Avenue and adjacent properties were not identified in the directories provided by EDR. A copy of the EDR-City Directory Abstract is included as Appendix E.

2.3.7 Topographic Maps

Topographic maps were provided by EDR for the years 1904, 1907, 1964, 1972, 1981, 1984, 2013, 2016, and 2019. Copies of the topographic maps are included as Appendix F.

Year	Subject Property Uses	Adjoining Properties Uses
1904, 1907	Undeveloped with a stream intersecting the northwest portion of property.	North: Undeveloped South: Undeveloped East: Undeveloped West: Undeveloped
1964, 1972, 1981, 1984	Undeveloped with a stream intersecting the northeast portion of property.	North: Road, followed by undeveloped South: Developed

Year	Subject Property Uses	Adjoining Properties Uses
		East: Undeveloped West: Road, followed by developed
2013, 2016, 2019	No structures depicted with a stream intersecting the northeast portion of property.	North: Road, followed by no structures depicted. South: No structures depicted. East: Road, followed by no structures depicted. West: Road, followed by no structures depicted.

The USGS recently discontinued depicting individual structures on topographic maps; therefore, no structures are depicted on any portion of the 2013, 2016, and 2019 USGS topographic map. The topographic maps do not identify any mining or dump operations on or near the property.

2.3.8 Environmental Lien, Activity and Use Limitations, and Title Records,

As of the date of this report, the Environmental Lien, Activity and Use Limitations (AULs), and Title Records Report (going back to 1980) has not been received by the User. Based on the information reviewed during this assessment, the lack of EDRs Environmental Lien, AULs, and Title Record Report is unlikely to impact the findings of this report.

The following title search was provided by Cambria County General GIS Viewer for tax parcels 34-027.-107.000, 34-027.-115.000, 34-027.-107.001, 34-008.-114.000 and 34-008.-145.001.

RECORDED	INSTRUMENT	GRANTEE	GRANTOR
11/15/2019	2019-11866	Laughard Timothy & Jamie	Cambria Holdings LLC

Review of the Cambria County real estate website information for the subject property provides no information indicating environmental concerns.

The documents listed above are included in Appendix G.

3.0 SITE RECONNAISSANCE

3.1 Adjacent Properties

A site reconnaissance addressing adjacent properties was performed by Ms. Ireland Killen of CORE on August 17, 2023. The objective of the visit was to evaluate whether adjacent properties do/do not represent potential RECs and/or CRECs which could impact the subject property. All observations were made from the public right-of-way and did not include accessing off-property buildings.

Adjoining Properties Information			
Direction From Subject Property	Occupant	Use	Comments
North	Route 22	Unimproved	Followed by Sheetz
South	Residential	Residential	
East	Venture Street	Unimproved	Followed by construction storage
West	Commercial Plaza/William Penn Avenue	Commercial	Restaurant and store

No concerns associated with surrounding property use were identified.

3.2 Subject Property Visit

3.2.1 Subject Property Visit Procedures

A site reconnaissance was performed by Ms. Killen of CORE and accompanied by Mr. Lander and Mr. Laughard on August 17, 2023. The objective of the subject property visit was to determine if RECs, CRECs, and/or significant data gaps exist. Visual inspection was performed to identify existence/absence of areas of potential concern which include stained asphalt or concrete, floor drains/trenches, odors, vegetative distress, and absence/presence of groundwater monitoring wells. These characteristics might indicate a previous or recent spill, or release of hazardous substances or petroleum products. Subject property photographs were obtained during the reconnaissance and are included as Appendix H (photos illustrating the boundaries, major site features and locations, RECs, and also de minimis conditions).

3.2.2 Environmental Issues / Findings

3.2.2.1 General Findings

The property is undeveloped. Fill is present throughout the property and was brought in by Mr. Laughard to begin development in 2019. The location of the fill is unknown; however, Mr. Laughard believes it was obtained from a property that was undeveloped. Mr. Laughard indicated some fill was present when he purchased the property and is not aware of the location the historical fill was obtained from.

A trailer is present on the eastern property of the property. The trailer served as a sign for the former golf driving range.

An unnamed tributary to South Branch Blacklick Creek is present in the northeastern portion of the property. No sheen or evidence of environmental impact in the vicinity of the stream was observed.

Property features are identified on Figure 2.

3.2.2.2 Hazardous Substances / Petroleum Products

No petroleum products were observed to have been stored or sold on the subject property based on the site reconnaissance and the nature of historical operations.

3.2.2.3 Past Environmental Testing / Studies / Concerns

No past environmental reports have been prepared for the subject property, according to Mr. Lander.

3.2.2.4 Air Emissions

No sources of air emissions were observed at the time of site reconnaissance.

3.2.2.5 Wastewater Discharges

The property does not produce or discharge wastewater or stormwater under a National Pollutant Discharge Elimination System (NPDES) permit. The property is vacant and a municipal sanitary sewer system is available to assist in future development. No catch basins or drains were identified on the subject property.

3.2.2.6 Solid/ Hazardous Waste

There is no evidence of residual waste generated at the subject property. The property does not currently generate hazardous waste and no hazardous waste was observed on-property.

3.2.2.7 Underground Storage Tanks / Aboveground Storage Tanks

No USTs or aboveground storage tanks (ASTs) currently exist at the property and no known USTs or ASTs are known to have existed at the property.

3.2.2.8 Utilities

The subject property is vacant and does not currently have natural gas, water, electrical services or sanitary sewer services. Due to the location and surrounding properties, it is likely that utility services are available for future development.

3.2.2.9 Asbestos & Lead Based Paint

No potential asbestos containing material and lead-based paint were observed during the site reconnaissance since no structures are located on the property. Asbestos and lead-based paint sampling and analysis are beyond the scope of this Phase I ESA.

3.2.2.10 Polychlorinated Biphenyls (PCBs)

Transformers are not present at the property. As a result, transformer dielectric fluid (which could contain polychlorinated biphenyl) is not present.

3.2.2.11 Emerging Contaminants

The property is not located within a one-tenth mile of any known airports, military bases or landfills where perfluoroalkyl and polyfluoroalkyl substances (PFAS) may have been used (e.g., in fire-fighting foam) or disposed. No fires are known to have been reported at the property.

4.0 USER PROVIDED INFORMATION

The User provided the following information regarding the property (pursuant to the Users' responsibility in Section 6 of ASTM E 1527-21):

(1.) Did a search of recorded land title records (or judicial records where appropriate), identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?

Response: No.

(2.) Did a search of recorded land title records (or judicial records where appropriate), identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

Response: No.

(3.) Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Response: No.

(4.) Does the purchase price being paid for this subject property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject property?

Response: Yes.

(5.) Are you aware of commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

(a.) Do you know the past uses of the subject property?

Response: Yes, Golf driving range.

(b.) Do you know of specific chemicals that are present or once were present at the subject property?

Response: No.

(c.) Do you know of spills or other chemical releases that have taken place at the subject property?

Response: No.

(d.) Do you know of any environmental cleanups that have taken place at the subject property?

Response: No.

(6.) Based on your knowledge and experience related to the subject property are there any obvious indicators that point to the presence or likely presence of releases at the subject property?

Response: No.

(7.) The reason why the Phase I is required:

Response: Our bank wants one completed.

(8.) The type of property and type of property transaction (i.e., sale, purchase, exchange, etc.):

Response: Land, purchase.

(9.) The complete and correct address for the subject property (a map or other documentation showing subject property location and boundaries is helpful):

Response: 3836 William Penn Avenue, Johnstown, PA.

(10.) Are there any additional Phase I tasks that are beyond the requirements of Practice E1527 that should be included or considered (i.e. asbestos survey, wetlands evaluation, lead-paint evaluation)?

Response: No.

(11.) Identification of all parties who will rely on the Phase I report?

Response: Lainey Hope Events, LLC.

(12.) Identification of the site contact and how the contact can be reached?

Response: Denis Stover 724-875-6115.

(13.) Any other knowledge or experience with the subject property that may be pertinent to the environmental professional (for example, copies of any available prior environmental site assessment reports, documents, correspondence, etc., concerning the subject property and its environmental condition).

Response: No.

(14.) Any special terms and conditions which must be agreed upon by the environmental professional?

Response: No.

The ASTM User Questionnaire was completed by Zachary Lander, and is included as Appendix I.

5.0 DATA GAPS

Based on the information reviewed during this assessment, the lack of the Environmental Lien and AUL reports and the title search constitutes a data gap. However, the information that would have been provided in these reports, is unlikely to impact the findings of this report and are not considered significant data gaps.

6.0 FINDINGS AND CONCLUSIONS

CORE has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 for the subject property located at 3836 William Penn Avenue, Johnstown, Cambria County, Pennsylvania. Any exceptions to, or deletions from, this practice are described in Section 1.1.4 of this report. This assessment has revealed no RECs, CRECs, or significant data gaps in connection with the subject property.

7.0 OPINIONS

Based on the conclusions of this Phase I ESA, it is our opinion that no further environmental assessment and/or remediation is warranted. A Phase II ESA is not recommended.

However, based on historical deep mining activities and the potential presence of mineshafts beneath the subject property, we recommend retaining a geotechnical consulting firm to assist with any future building design(s).

8.0 LIMITATIONS

The Phase I ESA was conducted in accordance with ASTM Standard E 1527-21 guidelines. Even so, no Phase I ESA can completely eliminate uncertainty about the property's potential for environmental problems. No statement of certainty can be made regarding subsurface conditions from any on-property or off-property sources of contamination.

CORE has relied on information provided by others in assessing the facility; the information has not been independently verified. This report is a prudent, reasonable evaluation of the property's observed environmental condition. CORE assumes no responsibility for conditions or information not practically reviewable, or information that was not accurately disseminated by any party.

This report should not be construed as verifying the present property owner's or operator's compliance with federal, state, and local regulations, or as a recommendation to purchase, sell, or develop the facility.

It is possible that unavailable or undisclosed information may indicate significant environmental compliance liabilities. These liabilities may include:

- Being a potentially responsible party to a Comprehensive Environmental Response Compensation and Liability Act cleanup (holding facility owners or operators liable);
- Being in jeopardy of losing a permit or license that allows the facility to operate; and,
- Allocating significant sums of money to bring the facility into compliance with environmental regulations.

The assessment was prepared under contract for the exclusive use of the User. Any other party's reliance on this report is at their own risk unless CORE provides a "reliance letter" to such party.

This Phase I ESA did not include the sampling of soil, groundwater, surface water or radon. Any information concerning these media is based on publicly available maps or related sources as referenced in the report.

CORE's report is based upon the information provided to CORE and CORE's observations made during the site reconnaissance. Given the inherent limitations of environmental assessment work, CORE does not guarantee that the property is free of hazardous or potentially hazardous materials or petroleum products.

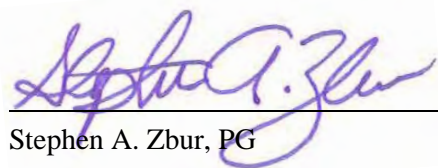

In accordance with the ASTM Standard E 1527-21, this Phase I ESA is presumed to be valid for 180 days from the date of issue. A Phase I ESA that meets or exceeds this practice and was completed more than 180 days previously may be used to the extent allowed in Section 4.6 of the ASTM Standard E 1527-21.

9.0 DECLARATIONS

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. Resumes of the CORE staff that performed the site visit and the Environmental Professional are included as Appendix J.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by CORE Environmental Svcs., Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

EXECUTIVE SUMMARY

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

DOLANS WELDING & STE EPA ID:: PAR000503607	118 VENTURE ST	SSE 1/8 - 1/4 (0.135 mi.)	9	33

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 03/06/2023 has revealed that there are 3 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Resources' Regulated Underground Storage Tank Listing.

A review of the UST list, as provided by EDR, and dated 03/01/2023 has revealed that there are 3 UST sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

ARCHIVE UST: The list includes tanks storing highly hazardous substances that were removed from the DEP's Storage Tank Information database because of the Department's policy on sensitive information. The list also may include tanks that are removed or permanently closed.

A review of the ARCHIVE UST list, as provided by EDR, and dated 03/01/2023 has revealed that there is

EXECUTIVE SUMMARY

1 ARCHIVE UST site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
JACKSON TWP Status: Closed Without a Permit Facility Id: 11-12722 Site ID: 568078	513 PIKE RD	SSW 1/8 - 1/4 (0.141 mi.)	10	43

Other Ascertainable Records

ABANDONED MINES: An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

A review of the ABANDONED MINES list, as provided by EDR, and dated 03/17/2023 has revealed that there is 1 ABANDONED MINES site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station,

EXECUTIVE SUMMARY

service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

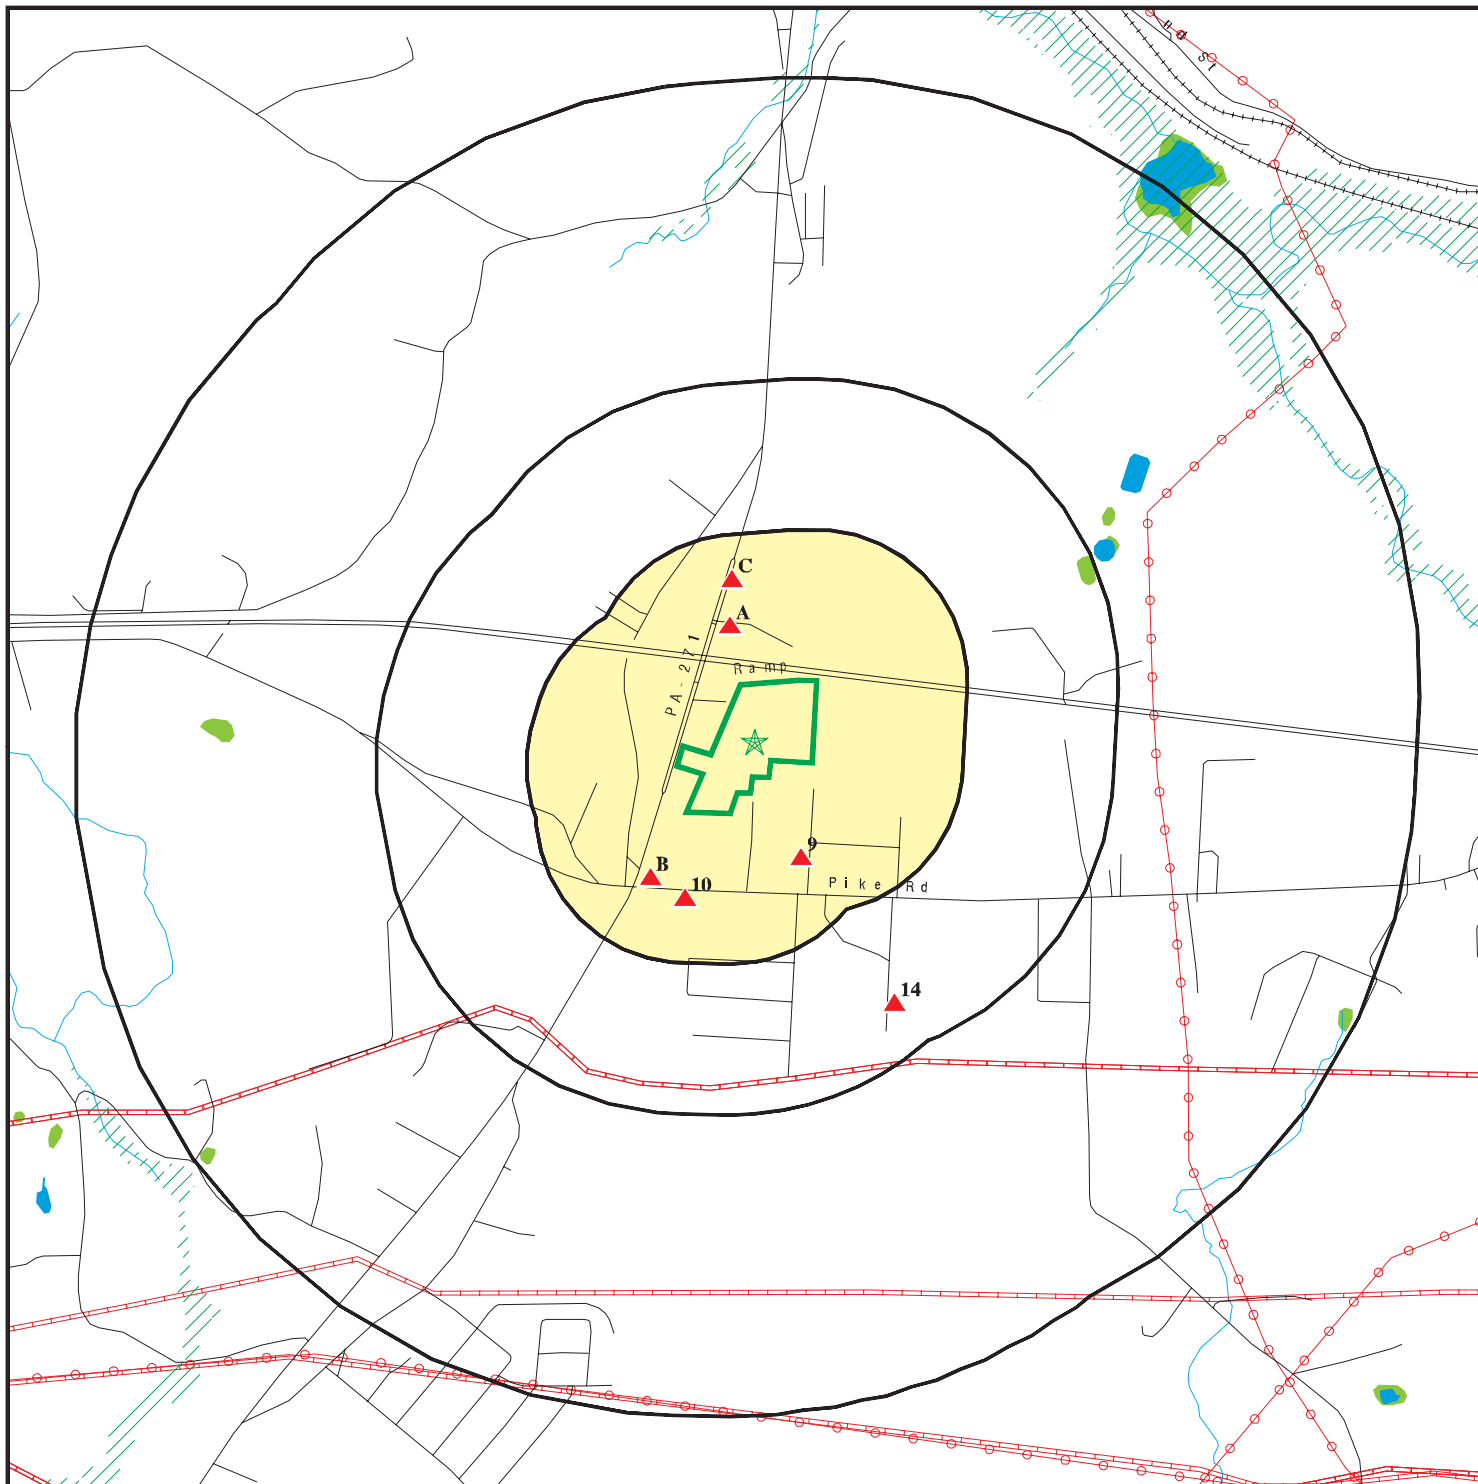

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U154
Waste Description: Methanol (l) (Or) Methyl Alcohol (l)

Waste Code: U210
Waste Description: Ethene, Tetrachloro- (Or) Tetrachloroethylene

Waste Code: U239
Waste Description: Benzene, Dimethyl- (l,T) (Or) Xylene (l)

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: N/A
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/02/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/09/2023
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: N/A
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/02/2023

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/26/2023

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: 800-424-9346
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/02/2023

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2023	Telephone: 800-438-2474
Date Made Active in Reports: 03/20/2023	Last EDR Contact: 07/31/2023
Number of Days to Update: 11	Next Scheduled EDR Contact: 10/02/2023

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2023	Telephone: 800-438-2474
Date Made Active in Reports: 03/20/2023	Last EDR Contact: 07/31/2023
Number of Days to Update: 11	Next Scheduled EDR Contact: 10/02/2023

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2023	Telephone: 800-438-2474
Date Made Active in Reports: 03/20/2023	Last EDR Contact: 07/31/2023
Number of Days to Update: 11	Next Scheduled EDR Contact: 10/02/2023
	Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2023	Telephone: 800-438-2474

MUN WASTE OPER: Municipal Waste Operations Listing

A Municipal Waste Operation is a DEP primary facility type related to the Waste Management Municipal Waste Program.

The sub-facility types related to Municipal Waste Operations that are included are: Composting: Includes facilities that use land for processing municipal waste by composting. Composting is a process that biologically decomposes organic waste under controlled anaerobic or aerobic conditions to yield a humus-like product. Land Application: Includes facilities that uses agricultural utilization or land reclamation of waste. Sewage sludge is land-applied for its nutrient value or as a soil conditioner.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Next Scheduled EDR Contact: 09/04/2023
Data Release Frequency: No Update Planned

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

ACT 2-DEED: Act 2-Deed Acknowledgment Sites

This listing pertains to sites where the Department has approved a cleanup requiring a deed acknowledgment under Act 2. This list includes sites remediated to a non-residential Statewide health standard (Section 303(g)); all sites demonstrating attainment of a Site-specific standard (Section 304(m)); and sites being remediated as a special industrial area (Section 305(g)). Persons who remediated a site to a standard that requires a deed acknowledgment shall comply with the requirements of the Solid Waste Management Act or the Hazardous Sites Cleanup Act, as referenced in Act 2. These statutes require a property description section in the deed concerning the hazardous substance disposal on the site. The location of disposed hazardous substances and a description of the type of hazardous substances disposed on the site shall be included in the deed acknowledgment. A deed acknowledgment is required at the time of conveyance of the property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

PFAS: Sites With Known PFAS Contamination

Perfluoroalkyl and polyfluoroalkyl substances (PFAS) are man-made chemicals, are resistant to heat, water and oil, and persist in the environment and the human body. PFAS are not found naturally in the environment. They have been used to make cookware, carpets, clothing, fabrics for furniture, paper packaging for food, and other materials that are resistant to water, grease, or stains. They are also used in firefighting foams and in a number of industrial processes.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Universal Tranverse Mercator:	Zone 17
UTM X (Meters):	683359.3
UTM Y (Meters):	4479508.0
Elevation:	1832 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	13972490 NANTY GLO, PA
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
42021C0279D	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
42021C0280D	FEMA FIRM Flood data
42021C0290D	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
NANTY GLO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Brinkerton

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 8 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4.23 Min: 0.42	Max: 6.5 Min: 5.1
2	7 inches	27 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4.23 Min: 0.42	Max: 6.5 Min: 5.1
3	27 inches	40 inches	channery silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4.23 Min: 0.42	Max: 6.5 Min: 5.1
4	40 inches	59 inches	channery silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4.23 Min: 0.42	Max: 6.5 Min: 5.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Dumps

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Wharton

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 69 inches

Soil Map ID: 11

Soil Component Name: Wharton

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 69 inches

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

Telephone: 610-344-6105

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

OTHER STATE DATABASE INFORMATION

Pennsylvania Oil and Gas Locations

Source: Pennsylvania Department of Environmental Protection

Telephone: 814-863-0104

An Oil and Gas Location is a DEP primary facility type related to the Oil & Gas Program. The sub-facility types related to Oil and Gas that are included in this layer are: Land Application -- An area where drilling cuttings or waste are disposed by land application; Well-- A well associated with oil and/or gas production; Pit -- An approved pit that is used for storage of oil and gas well fluids. Some sub facility types are not included in this layer due to security policies.

Re: Right to Know Request

Dear Ms. Sweeney:

I am in receipt of your Right to Know Request dated August 11, 2023, same being received on August 15, 2023, wherein you are requesting certain environmental information with regard to the property located at 3836 William Penn Avenue, Johnstown. As of the above date, Cambria County has no record of any hazmat calls to this location. Please note, with regard to the remainder of the information you are requesting, this is the only information that the County would have. Therefore, there is no additional information available to provide in response to this portion of the request.

Please be advised that this correspondence will serve to close this request with this office, as provided by law. You have the right to appeal this response, in writing, to the Pennsylvania Office of Open Records, 333 Market Street, 16th Floor, Harrisburg, PA 17101-2234, or via email to openrecords@pa.gov. If you choose to file an appeal, you must do so within fifteen (15) days of the mailing date of this letter.

Very truly yours,

A handwritten signature in purple ink, appearing to read "MAK", written over a horizontal line.

Melissa A. Kestermont

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by CORE Environmental Svcs., Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:**Coordinates:**

P.O.#	NA	Latitude:	40.447918 40° 26' 53" North

APPENDIX I

USER QUESTIONNAIRE
ASTM E1527-21

- (1.) Did a search of land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?

no

- (2.) Did a search of land title records (or judicial records where appropriate) identify any activity use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded against the subject property under federal, tribal, state or local law?

no

- (3.) Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No

- (4.) Does the purchase price being paid for this subject property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject property?

yes

- (5.) Are you aware of commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

- (a.) Do you know the past uses of the subject property?

Yes, Golf Drivng Range

- (b.) Do you know of specific chemicals that are present or once were present at the subject property?

no

- (c.) Do you know of spills or other chemical releases that have taken place at the subject property?

no

- (d.) Do you know of any environmental cleanups that have taken place at the subject property?

No

(6.) Based on your knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of releases at the subject property?

No

(7.) The reason why the Phase I is required:

Our bank wants one completed

(8.) The type of property and property transaction (i.e., sale, purchase, exchange, etc.):

Land, Purchase

(9.) The complete and correct address for the property (a map or other documentation showing property location and boundaries is helpful):

3836 William Penn Avenue, Johnstown, PA

(10.) Are there any additional Phase I tasks that are beyond the requirements of Practice E1527 that should be included or considered (i.e. asbestos survey, wetlands evaluation, lead-paint evaluation)?

No

(11.) Identification of all parties who will rely on the Phase I report?

Lainey Hope Events, LLC

(12.) Identification of the site contact and how the contact can be reached?

Denise Stover 724-875-6115

(13.) Any other knowledge or experience with the subject property that may be pertinent to the environmental professional (for example, copies of any available prior environmental site assessment reports, documents, correspondence, etc., concerning the subject property and its environmental condition).

no

(14.) Any special terms and conditions which must be agreed upon by the environmental professional?

no

Completed by:

Print Name Zachary Lander

APPENDIX J

Experience Summary

Stephen A. Zbur is President and Owner of CORE Environmental Services, Inc. He has over 37 years of experience in performing characterization and remediation of sites where releases of petroleum products have occurred. His specialties include project management and negotiations with regulatory agencies, and performing technical oversight and review of all required reports.

Education

B.S. Geology - Indiana University of Pennsylvania

40-Hour HAZWOPER Training Course & Associated 8-Hour Refresher Training to Date Complying with OSHA Standard 29 CFR 1910.120.

Professional Affiliations & Registrations

Pennsylvania Registered Professional Geologist #PG-338-G

North Carolina Licensed Geologist #1090

South Carolina Professional Geologist #1131

Virginia Certified Professional Geologist #775

Tennessee Registered Geologist #TN219

Representative Experience

Provides oversight as the Professional Geologist to project teams with respect to all aspects of petroleum-related site characterization and remediation projects.

Have received a Release of Liability for 24 sites in accordance with the requirements of Pa Code Title 25, Chapter 245.

Assisted buyers and sellers in negotiating and executing Buyer/ Seller Agreements to assist in transactions of sites where petroleum products have been released.

Directed site characterizations and implemented remedial actions at over 100 sites in accordance with the Pennsylvania (Pa) Title 25 Chapter 245, Corrective Action Process for Owners and Operators of Storage Tanks and Storage Tank Facilities and Other Responsible Parties. Responsibilities included directing the investigative and remedial study and managing the project team responsible for the installation and maintenance of the recovery and treatment system and negotiating closure criteria.

Have received a Release of Liability for three sites in accordance with the requirements of Pa Title 25, Chapter 250.

Provides oversight to technical teams while developing site-specific standards. Activities performed include pathway elimination and performing risk assessments to develop risk based numerical standard.

Negotiated 30 fixed price agreements with Underground Storage Tank Indemnification Fund (USTIF) claimants in response to the competitive bid solicitation process.

Perform technical review of Chapter 245 reports to include: Site Characterization Report; Risk Assessment; Remedial Action Plan; Remedial Action Completion Report; and, Post Remedial Care Report.

Managed underground storage tank closures at more than 30 sites in Pennsylvania. Activities included: soliciting and reviewing closure bids from contractors, acting as an on-site liaison between the tank owner, the Pennsylvania Department of Environmental Protection, USTIF, and the contractor.

Provided oversight for dual-phase extraction system pilot tests.

Provided oversight of natural attenuation analysis for petroleum products at various sites. Based on this data, natural attenuation calculations and degradation parameters were calculated and presented to regulatory bodies.

Experience Summary

Ireland Killen is a Staff Scientist for CORE Environmental Services, Inc. and works on remediation-based projects for commercial clients located in Pennsylvania, West Virginia and Ohio.

Ms. Killen works on remediation and site characterization projects through the completion of work plans, coordination and completion of site characterization field investigations, including environmental media data collection, and acts as the on-site safety officer during environmental remediation and investigation tasks. Ms. Killen conducts field investigations for Phase I and Phase II Environmental Site Assessments, and also has experience with site assessments in the underground storage tank field including removal, assessments, and remediation activities in Pennsylvania, Ohio, and West Virginia.

Education & Accreditation

Bachelor's Degree in Geology – California University of Pennsylvania, 2022.

Pennsylvania Geologist-in-Training, #GT000687

40-Hour HAZWOPER Training Course & Associated 8-Hour Refresher Training to Date
Complying with OSHA Standard 29 CFR 1910.120.

Representative Experience

Performs oversight of subcontractors (surveys, excavations, UST pulls, geo-drilling procedures), installation of monitoring wells and soil boring activities, coordinates and conducts environmental media sampling (soil, water, and air sampling)

associated with Phase II Environmental Site Assessment and remediation activities.

Conducted pilot testing to determine the feasibility and effectiveness of groundwater remediation systems and completed operations and maintenance of active groundwater remediation systems including vacuum enhanced groundwater extraction, dual phase extraction, and air sparge remediation technologies.

Completes environmental reports in preparation for project phases ranging from site characterization, through remediation, and site closure.

Other experience includes performing aquifer tests including gauging water level, monitoring natural attenuation parameters and liquid phase hydrocarbon levels, and slug tests. Is responsible for logging lithology and water bearing units during drilling of borings and wells.
