“The Grain is Delafield’s first mass timber construction project, filling a void within the city making it the destination to work and play.”

### WHAT IS MASS TIMBER?

Mass timber is a state-of-the-art construction method that combines solid wood panels and beams to create a structure that’s **exceptionally stable and versatile**. It’s an **environmentally friendly, low-carbon alternative** to concrete and steel.

The Grain’s exterior brick façade differentiates itself from other mass timber projects in the US, giving it a timeless design that **represents how buildings used to be created while the interior finishes represents the future of modern-day construction**. Exposed columns and ceilings create an open, refined space for tenants, providing a more desirable and appealing office or retail space.
