

[illegible]

WALL TO DECK = 8" I.G. GA. METAL STUDS @ 16" O.C. WITH 1/2" GYP BOARD ON BOTH SIDES, FULLY INSULATED WITH WOOD BASE.

ALIGN

SEALANT

EXISTING CONCRETE TILT-WALL PANEL

The diagram illustrates a cross-section of a wall assembly. On the left, a new wall section is shown, consisting of 8-inch I.G. GA. metal studs at 16 inches O.C., with 1/2-inch gyp board on both sides, fully insulated with wood base. This new wall is aligned with an existing concrete tilt-wall panel on the right. A sealant is applied at the joint between the two wall sections. The existing concrete tilt-wall panel is shown with a textured, aggregate-filled appearance.
