Re: Environmental Site Assessment Limited Phase II
Soil & Groundwater Assessment
4410 Ogeechee Road
Savannah, Georgia 31405

Dear Mr. Walker, Mr. Starling & Mr. Molino:

Our site reconnaissance of this (± 1.50) acre site revealed this property is currently, for the most part, heavily wooded and undeveloped.

However, according to Historical Data Base Searches, this site had been identified within the (1990) Historical City Directory as containing a facility identified as Jack Motors and eventually Savannah Auto Mart.

Based upon the completion of our Phase I Environmental Site Assessment in December of (2020), in our opinion, due to the (± 30) year history of the presence of various used vehicle automotive sales dealerships within the target site, as well as the Historical Recognized Environmental Concerns (HREC's) for the immediately adjacent property, it is possible that releases of petroleum products and/or hazardous substances to soil and/or groundwater could have occurred from on-site and/or migrated from off-site activities.

As such, due to these Recognized and Historical Environmental Conditions (REC's / HREC's), a Limited Phase II Subsurface Soil and Groundwater Contamination Investigation was deemed warranted in search of volatile (VOC) and semi volatile (SVOC) contamination constituents.

This limited assessment of the property began on March 1, 2021 and was completed on that day. Mr. Ralph Perez, Senior Environmental Field Technician and Mr. Bailey Hadel, conducted this inspection under the direction of Donald Martin, Jr., Environmental Professional and Joseph F. Whitaker, PE.

This investigation attempted to determine if any subsurface volatile (VOC) and/or semi-volatile (SVOC) based contaminants could be detected which may have affected soil and/or groundwater as a result of the historic uses of the site as an environmentally sensitive property.

As part of this inspection, two (2), ($\pm 20'$) deep environmental borings, (B-1) and (B-2) were performed within the target site. These borings were triangulated just south of the canal separating Parcel (#2) from the adjacent northern suspect properties. (See the Boring Location Plan in the Appendix for clarity.)

During this limited subsurface investigation, soil samples were collected in one-foot ($\pm 1'$) intervals from the surface to an approximate depth of six feet ($\pm 6'$) below existing grade of each of the two (2) borings, ($\pm 1'$) one foot above where the water table was generally encountered between ($\pm 6'$) and ($\pm 7'$).

All collected soil samples were then field screened using a MiniRAE 3000 organic vapor analyzer (OVA). Typical headspace techniques were employed. As a result of this screening process, no appreciable (OVA) readings of suspect hydrocarbon vapors were detected within any of the collected soil samples.

However, in an effort to further evaluate the subject property, temporary groundwater monitoring wells (TMW-1) and (TMW-2) were installed within environmental boring locations (B-1) and (B-2) for the purpose of collecting groundwater samples.

Following the installation and well development, a collected groundwater sample from each of the temporary monitoring wells along with a soil sample collected from each boring location just above the median water table at ($\pm 6' - 7'$) at boring locations (B-1) and (B-2) were packed in ice and shipped to AES, Analytical Environmental Services, Inc., a certified analytical facility.

The collected soil and groundwater samples were analyzed for volatile (VOC) and semi-volatile (SVOC) constituents using approved (GA EPD) / (US EPA) methodology.

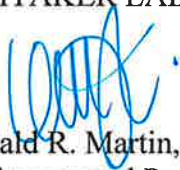

Upon review of the laboratory analyses results for the submitted soil samples, no detections for volatile (VOC) or semi-volatile constituents were identified within the soil and/or groundwater of either deep boring.

Therefore, at this time, the target property should be considered a “low risk” for “on-site” soil and groundwater volatile (VOC) and semi-volatile (SVOC) contamination. And, with the completion of any remaining recommendations within the original Phase I (ESA) as published earlier in December of (2020), if any, it is our opinion that no additional environmental assessment of this property is warranted.

We declare that to the best of our professional judgment and belief, we meet the definition of Environmental professional as defined in (312.10 of 40 CFR 312) and we have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property.

We thank you for the opportunity to be of service on this project. We appreciate your trust and we look forward to a continuing relationship in the future. If you should have any questions, please don't hesitate to contact our office.

Respectfully submitted,
WHITAKER LABORATORY, INC.

Donald R. Martin, Jr.
Environmental Professional, Project Manager

Joseph F. Whitaker, P.E.
Project Engineer

RE: 4410 Ogeechee

Dear Donald Martin:

Order No: 2103224

Analytical Environmental Services, Inc. received 4 samples on 3/2/2021 12:17:00 PM for the analyses presented in following report.

"No problems were encountered during the analyses except as noted in the Case Narrative or by qualifiers in the report or QC Summary. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits.

AES's accreditations are as follows:

-NELAP/State of Florida Laboratory ID E87582 for analysis of Non-Potable Water, Solid & Chemical Materials, Air & Emissions Volatile Organics, and Drinking Water Microbiology & Metals, effective 07/01/20-06/30/21.

State of Georgia, Department of Natural Resources ID #800 for analysis of Drinking Water Metals, effective through 06/30/21 and Total Coliforms/ E. coli, effective 04/20/20-04/24/23.

-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Metals and PCM Asbestos), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) Direct Examination, effective until 11/01/21.

These results relate only to the items tested as received. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

Sincerely,

Ioana Pacurar
Project Manager

Submission of samples to the laboratory constitutes acceptance of AES's Terms & Conditions. Client assumes sole responsibility for damage or loss of samples before we accept them. Samples received after 3PM or on Saturday are considered as received the following business day. If no TAT is marked on COC, AES will proceed with standard TAT. Samples are disposed of 30 days after completion of report unless other arrangements are made.

Case Narrative

Volatile Organic Compound Analysis by Method 8260D:

Percent recovery for the internal standard compound 1,4-Dichlorobenzene-d4 on sample 2103224-001 A was outside control limits biased high due to suspected matrix interference. All other internal standard recoveries were within control limits.

ACORDTM

CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY)
10/05/2020

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must have ADDITIONAL INSURED provisions or be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer any rights to the certificate holder in lieu of such endorsement(s).
