THE YEAR OF OPTIMISM

Optimism is growing for Oklahoma City's commercial real estate market in 2025. The past few years brought challenges. COVID-19, high interest rates, and election-year uncertainty created hurdles. Now, key trends point to recovery.

The office sector saw positive absorption in 2024, with a strong start and end to the year, though activity remained uneven. Interest among buyers and sellers grew after the Federal Reserve cut rates in September. State and federal mandates and those from the private sector requiring employees to return to the office full-time are driving demand.

The industrial sector stayed active in leasing. Sales slowed due to high interest rates, which eased in the fourth quarter. A U.S. manufacturing resurgence and investment in onshoring should boost demand this year. Slower construction in 2024 will help absorb Class A vacancies.

The retail sector expanded with projects like The Oak, which added a boutique hotel, luxury apartments, and new dining and retail options, including new-to-market brands. However, uncertainty remains about the impact of national chain restaurants and big-box store closures on the local market.

The multifamily sector saw total sales of \$121 million in 2024, down from 2023. The fourth quarter brought a strong surge, with \$37 million in deals. Buyers and sellers are adjusting to higher interest rates as they navigate changing conditions, although rental and occupancy numbers remain strong across all property classes.

Overall, 2025 looks promising as rate cuts, government mandates, and new developments drive momentum.
