### MONTANA WELL LOG REPORT

This well log reports the activities of a licensed Montana well driller, serves as the official record of work done within the borehole and casing, and describes the amount of water encountered. This report is compiled electronically from the contents of the Ground Water Information Center (GWIC) database for this site. Acquiring water rights is the well owner's responsibility and is NOT accomplished by the filing of this report.

Annular Space (Seal/Grout/Packer)

There are no annular space records assigned to this well.

### Section 7: Well Test Data

Total Depth: 350 Static Water Level: 129 Water Temperature:

#### Air Test \*

50 gpm with drill stem set at \_ feet for 6 hours. Time of recovery \_ hours. Recovery water level \_ feet. Pumping water level 340 feet.

\* During the well test the discharge rate shall be as uniform as possible. This rate may or may not be the sustainable yield of the well. Sustainable yield does not include the reservoir of the well casing.

## **Section 8: Remarks**

## Section 9: Well Log Geologic Source

112ALVM - ALLUVIUM (PLEISTOCENE)

From	То	Description
0	19	CLAY & GRAVEL
19	37	SILT & SAND
37		SANDY CLAY
58		CLAY
265	296	HEAVING SAND
296	350	BLUE COARSE SAND & GRAVEL WITH WATER

## **Driller Certification**

All work performed and reported in this well log is in compliance with the Montana well construction standards. This report is true to the best of my knowledge.
