

# WELCOME TO CONNECTIVITY

The US Bancorp Tower is committed to providing the best possible experiences for our tenants and maintaining our position as pioneers in digital connectivity.

## WIRED CERTIFIED PLATINUM

USBT's 6 sources of fiber, resilient telecom infrastructure, ease of installation, and capacity to support new telecom services make us one of the top technology-enabled buildings in the country, standing alongside the Empire State Building and the Willis Tower. The Wired Certification rigorous grading process ensures we support current and future tenants with the most stringent technology requirements.

### UNICO Connect > **LIVE NOW**

Our new building app keeps tenants connected to events and amenities, exclusive discounts at local retail, and access to services like our dog walking program.

### Destination Dispatch > **LIVE NOW**

Tired of long wait lines at the elevators? So are we! Tenants can now dispatch an elevator to their floor for a quick and easy vertical commute.

### Bluetooth Access Control > **LIVE NOW**

The UNICO Connect app will also serve as a tenant's access badge for an extra layer of convenience and security throughout the building.

### Visitor Management > **LIVE NOW**

Tenants will soon be able to pre-register their visitors online. When these guests arrive, they will receive a PIN access code to their respective floor.

### License Plate Recognition > **LIVE NOW**

Tenants no longer need an access card, not even when they drive their partner's car to work. License plates can now be entered automatically into the system for parking garage access.

### Distributed Antenna System > **LIVE NOW**

A major signal boost that provides strong wireless coverage throughout the building.
