# San Antonio, Texas

San Antonio remains a high-growth metro supported by strong population and job gains. Multifamily permitting in 2025 has dropped well below pandemic levels, signaling a likely supply correction that should improve absorption and stabilize rents after elevated vacancies and recent softening from prior overbuilding. Thousands of units are still delivering, but new supply is slowing. Single-family inventory and sales have fluctuated, reflecting steady demand for detached housing. Overall, high-growth submarkets with strong fundamentals offer attractive opportunities for both multifamily and single-family land development as supply dynamics rebalance.
