Executive Summary

PES Associates Inc. (PES) has completed a Phase I Environmental Site Assessment (ESA) at the multi-tenant commercial property located at 163-179 Washington Street, Somerville, Massachusetts (the Subject Property). *PES* conducted this ESA at the request of Linda S. Peterson, Trustee for the Estate of Antonette Spinucci (the Client), who authorized this project on December 3, 2025.

PES conducted the ESA in accordance with the guidelines set forth in the *American Society for Testing and Materials International* (*ASTM*) E1527-21 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, as well as 40 CFR 312 and *ASTM* E2600-15 and the specific guidelines established by the Client. The purpose of the ESA was to investigate the surficial conditions at the Subject Property to identify any *recognized environmental conditions* (*RECs*): defined in *ASTM* Practice E1527-21 as (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.

The approximately 0.18-acre Subject Property features a single-story multi-tenant retail building with a basement, that was constructed sometime between 1900 and 1933. An attached single-story garage located in the northern Subject Property area was constructed circa 1971. The Subject Property is currently occupied by *Marfione Studio*, *DiAdara Salon & Sp*a, an international market, and a liquor store. The garage is utilized by the liquor store for inventory storage.

Historical records indicate the Subject Building was constructed sometime between 1900 and 1933. The northern garage structure was built circa 1971. Tenants at the Subject Property have historically included an undertaker, cigar shop, barber shop, dog groomer, photo studio, beauty salon, nail salon, variety store, and a dry-cleaner. The dry-cleaner reportedly operated in the western-most tenant space (179 Washington Street) from the 1950s into the 1990s. The garage structure was reportedly used to repair mopeds under the business name *Euro Cycles* in the 1990s.

The area adjoining the Subject Property to the west was occupied by a grammar school from 1890 until circa 1950; this property was redeveloped for use as the Somerville Boys & Girls Club in 1955, and redeveloped once again in 2015 for its current use as an apartment building. The

southern adjoining property was occupied by a gasoline filling station from sometime prior to 1940 until the 1960s. This property was then converted into a mixed-use commercial and residential property. The area adjoining the Subject Property to the north has had mixed commercial and residential use. The northern adjoining property at 352 McGrath Highway was occupied by a garage and filling station from prior to 1933 until at least 1950, followed by an automobile dealer and bakery in the 1950s and 1960s. From 1968 until 2003, this property was occupied by *Commercial Plastics*, which cut plastic sheeting and rods to customer specifications, and since 2003 it has been occupied by *Taylor Rental Corporation*. The northern adjoining property at 3 Boston Street has had residential use beginning prior to 1900. A mixed use residential and retail building (157-161 Washington Street) adjoins the Subject Property to the east.

Recognized Environmental Conditions

This assessment has revealed the following evidence of *recognized environmental conditions, historical recognized environmental conditions,* or *controlled recognized environmental conditions* in connection with the Subject Property:

- The Subject Property is listed with MassDEP as an open and out of compliance State Hazardous Waste Site (SHWS) (RTN 3-27087) associated with a chlorinated solvent release from a historical dry-cleaner previously located in the westernmost tenant space. This constitutes a *recognized environmental condition*.

- Indoor air concentrations of chlorinated solvents were detected in the Subject Building at concentrations that constituted an Imminent Hazard to tenants and required the installation of a sub-slab depressurization system (SSDS) in the basement. There are no formal inspection records of this system since 2012; the potential that an imminent health hazard for tenants may have recurred constitutes a *recognized environmental condition*.

- The Subject Property has been identified as the source of contamination at a down-gradient property located at 182 Washington Street. In addition, the historical plume map indicates it could be impacting multiple additional downgradient properties, and at least one additional property (51 Mansfield) required an SSDS. As cleanup of downgradient contaminations is typically the responsibility of the owners of the property of where contamination originated, the presence of a large downgradient contamination plume from the Subject property constitutes a *recognized environmental condition*.

- A floor drain with an unknown outlet was noted in the northern garage area of the Subject Property. The presence of this drain in an area reportedly historically used for moped repairs constitutes a *recognized environmental condition*.

Recommendations

PES has the following recommendations:

- Conduct an engineering assessment of the sub-sub depressurization system to ensure proper functioning.
- Collect indoor air samples to update data and ensure an imminent hazard is not present.
- Conduct a limited subsurface investigation (LSI) to begin collecting updated data regarding the release; this should include resampling existing wells, and/or installing additional soil borings or monitoring wells to allow collection of soil and groundwater samples.
- Due to the Tier1D status, prior to conducting any inspection or sampling at the Subject Property, *PES* recommends discussing plans with the MassDEP project manager for the RTN.

1.0 Introduction

This report documents the Phase I Environmental Site Assessment (ESA) *PES Associates, Inc.* (*PES*) performed on the multi-tenant commercial property located at 163-179 Washington Street, Somerville, Massachusetts (the Subject Property).

1.1 Purpose

The purpose of this ESA was to investigate the surficial conditions at the Subject Property to identify any *recognized environmental conditions* (*RECs*): defined in *ASTM* Practice E1527-21 as (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.

1.2 Scope of Services

In accordance with the guidelines set forth in the *American Society for Testing and Materials International* (*ASTM*) E1527-21 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, as well as 40 CFR 312 and *ASTM* E2600-15 and the specific guidelines established by the Client, *PES* performed the following activities as part of our investigation, under the supervision of Ellen Blackburn, an Environmental Professional as defined in *ASTM* E1527-21, Section 3.2.32 and 40 CFR 312.10(b).

- Conducted a visual inspection of surface conditions of accessible exterior and interior portions of the Subject Property on December 3, 2025. Any areas not inspected are noted in the report;
- Interviewed Mr. Joey Marfione, Owner of *Marfione Studio,* on December 3, 2025 to identify Subject Property history and characteristics;
- Interviewed Ms. Linda Peterson, Trustee of the *Antonette Spinucci Revokable Trust*, on December 3, 2025 to identify Subject Property history and characteristics;
- Requested and reviewed readily available local records on file at the applicable municipal, county, and state offices to ascertain Subject Property history and identify *RECs* at and in the immediate vicinity of the Subject Property;

- Interviewed local agency officials regarding *RECs* at and in the immediate vicinity of the Subject Property; and
- Reviewed federal and state environmental databases and any relevant readily available supplemental environmental records.

1.3 Findings and Opinions

The approximately 0.18-acre Subject Property, located in a mixed commercial, residential, and retail area of Somerville, contains a single-story multi-tenant retail building with approximately 5,873 SF of space on the first floor and 4,778 SF of basement area. Current tenants include *Marfione Studio*, *DiAdara Salon & Sp*a, an international market, and a liquor store.

The following summarizes the general findings regarding any release or threat of release of hazardous substances or petroleum products that *PES* identified at the Subject Property:

- The Subject Property is identified in the database with ASTM SHWS and release listings under release tracking number (RTN) 3-27087, as well as Non-ASTM Enforcement, historic dry cleaner, and hazardous waste listings. These are associated with the historic *Embassy Cleaners* located in the western-most tenant space (179 Washington Street) of the Subject Building from the 1950s into the 1990s.
- MassDEP measured indoor air concentrations of chlorinated solvent (primarily tetrachloroethylene, or PCE) at the Subject Property which were high enough to constitute an Imminent Hazard for tenant health. A sub-slab depressurization system (SSDS) was installed in the basement of unit 179 by MassDEP around 2007 or 2008, however, this system was last inspected by MassDEP in 2012, and additional air filtering was historically needed to reduce indoor air contamination further.
- The southern adjoining property located across Washington Street at 182 Washington Street is identified with Leaking Underground Storage Tank (LUST), Release, and SHWS listings. A 1989 subsurface investigation found no tank related concerns, but identified elevated concentrations of PCE in groundwater. Elevated PCE was also identified in indoor air, requiring MassDEP to installed an SSDS at in 2009. A Downgradient Property Status (DPS) Opinion was filed in October 2019, citing the Subject Property as the source of the PCE contamination at this location; this would typically make the Subject Property responsible for the cleanup of this property.

- MassDEP also identified PCE vapor intrusion concerns at the downgradient 51 Mansfield Street property, requiring install of an SSDS at this location in 2009.

- *PES* observed a floor drain in the northern garage of the Subject Building. The location of discharge for the drain is not known. This garage was reportedly historically used for moped repair. *PES* notes that former environmental investigations at the Site did not address potential concerns other than chlorinated solvents.

- In addition to the listings mentioned above, the database search identified database search identified Superfund Enterprise Management System - No Further Remedial Action Planned (SEMS-Archive), Resource Conservation and Recovery Act (RCRA) Generator, State Hazardous Waste Site (SHWS), Solid Waste Facility / Landfill (SWF/LF), Leaking Aboveground Storage Tank (LAST), Leaking Underground Storage Tank (LUST), State Brownfields, Hazardous Materials Information Resource System (HMIRS), and Release listings within one mile of the Subject Property. Based on their regulatory status, inferred hydraulically cross- or down-gradient locations, and/or distances from the Subject Property, the properties identified by the database search are not likely to have current or former releases of hazardous substances or petroleum products with the potential to migrate to the Subject Property.

- *PES* submitted a request to the Somerville City Solicitor's Office, who serves as the Records Access Officer (RAO) for the City of Somerville for information regarding the presence of USTs, ASTs, hazardous material storage, or hazardous substances or petroleum products releases at the Subject Property or any properties in its immediate vicinity. If the municipal responses alter our recommendations, *PES* will forward any pertinent information received in an addendum to this ESA

1.4 Data Gaps and Deviations from Practice

In accordance with the *ASTM* E1527-21, *PES* identified the following data gaps and/or deviations from the practice in this ESA:

- *PES* did not conduct interviews with past occupants, owners, and operators of the Subject Property, as these individuals were not available to *PES* or were unwilling to be formally interviewed. This deviation has not significantly impacted the ability of the EP to identify *RECs* for the Subject Property.

1.5 Recognized Environmental Conditions

PES has performed a Phase I Environmental Site Assessment for the Subject Property in conformance with the scope and limitations of *ASTM* Practice E1527-21. Any exceptions to or deletions from this practice are described in Section 1.4 of this report.

This assessment has revealed the following evidence of *recognized environmental conditions, historical recognized environmental conditions,* or *controlled recognized environmental conditions* in connection with the Subject Property:

- The Subject Property is listed with MassDEP as an open and out of compliance State Hazardous Waste Site (SHWS) (RTN 3-27087) associated with a chlorinated solvent release from a historical dry-cleaner previously located in the westernmost tenant space. This constitutes a *recognized environmental condition*.

- Indoor air concentrations of chlorinated solvents were detected in the Subject Building at concentrations that constituted an Imminent Hazard to tenants and required the installation of a sub-slab depressurization system (SSDS) in the basement. There are no formal inspection records of this system since 2012; the potential that an imminent health hazard for tenants may have recurred constitutes a *recognized environmental condition*.

- The Subject Property has been identified as the source of contamination at a down-gradient property located at 182 Washington Street. In addition, the historical plume map indicates it could be impacting multiple additional downgradient properties, and at least one additional property (51 Mansfield) required an SSDS. As cleanup of downgradient contaminations is typically the responsibility of the owners of the property of where contamination originated, the presence of a large downgradient contamination plume from the Subject property constitutes a *recognized environmental condition*.

- A floor drain with an unknown outlet was noted in the northern garage area of the Subject Property. The presence of this drain in an area reportedly historically used for moped repairs constitutes a *recognized environmental condition*.

1.6 Recommendations

PES has the following recommendations:

- Conduct an engineering assessment of the sub-sub depressurization system to ensure proper functioning.

- Collect indoor air samples to update data and ensure an imminent hazard is not present.

- Conduct a limited subsurface investigation (LSI) to begin collecting updated data regarding the release; this should include resampling existing wells,

and/or installing additional soil borings or monitoring wells to allow collection of soil and groundwater samples.

- Due to the Tier1D status, prior to conducting any inspection or sampling at the Subject Property, *PES* recommends discussing plans with the MassDEP project manager for the RTN.

2.0 Subject Property Description

2.1 Subject Property Location & Legal Description

The Subject Property address is 163-179 Washington Street, Somerville, Massachusetts. The Subject Property is on the north side of Washington Street, at the intersection of Washington Street and Boston Street (see Appendix 1, Figure 1). Somerville Assessor's records identify the Subject Property as Parcel 1535 (see Appendix 1, Figure 2), which consists of 0.18-acres of land. The Middlesex South Registry of Deeds has a legal description of the Subject Property recorded in Book 11863, beginning on Page 580.

PES did not identify evidence of environmental liens or deed restrictions for the Subject Property during our review of available municipal or county records. Additionally, the Client did not notify *PES* of any environmental liens or deed restrictions for the Subject Property. Mr. Thomas Jachym, Counsel for the MassDEP, confirmed to *PES* on December 18, 2025, the MassDEP does not have a lien on the Subject Property.

2.2 Subject Property & Vicinity Characteristics

The Subject Property is located in a mixed commercial, residential, and retail area of Somerville. Businesses near the Subject Property include *J&J Restaurant, Valvoline Instant Oil Change, Somerville Motors,* and *Cambridge Taylor Rental*.

PES did not observe any properties (such as gasoline stations, industrial properties, dry cleaners, or manufacturing facilities) at or in the immediate vicinity in inferred hydraulically up- or cross-gradient locations from the Subject Property that could have current or former releases of hazardous substances or petroleum products with the potential to migrate to the Subject Property.

2.3 Subject Property Improvements

2.3.1 Structures

The Subject Property features a single-story multi-tenant retail building with a basement that was constructed sometime between 1900 and 1933. An attached single-story garage located in the northern Subject Property area was constructed circa 1971. The Subject Building occupies approximately 90% of the Subject Property area.

2.3.2 Parking Areas & Roads

Asphalt-paved areas cover approximately 5% of the Subject Property. Vehicular access to the garage in the northern Subject Property area is available via an easement from Boston Street.

2.3.3 Heating & Air Conditioning

The Subject Property building is heated by natural gas, which is supplied by *National Grid.*

2.3.4 Sewer

The Subject Building is connected to the municipal sewer system. *PES* was unable to determine the original municipal sewer connection date for the Subject Property. Stormwater runoff generated at the Subject Property either infiltrates the ground surface or enters storm drains, the closest of which is located on the north side of Washington Street.

2.3.5 Water

The Subject Building is served by the municipal water supply system. *PES* was unable to determine the original municipal water connection date for the Subject Property. *PES* did not observe any private drinking water sources at the Subject Property.

2.3.6 Electricity

Eversource provides electrical service to the Subject Property via aboveground lines. See Section 6.5 for information about transformers.

2.4 Information from Current Subject Property Owner/Operator

PES interviewed Mr. Joey Marfione, owner of *Marfione Studio*, occupant of the 179 Washington Street tenant space. Mr. Marfione indicated he became the tenant in the unit formerly occupied by the dry-cleaning business in the early 1990s. Mr. Marfione indicated that a sub-slab depressurization system was installed in the basement in the mid-2000s. *PES* interviewed Ms. Linda Peterson, Trustee of the *Estate of Antonette Spinucci*. Ms. Peterson did not have any knowledge of environmental liens on the Subject Property. Please note that Mr. Marfione and Mr. Spinucci provided Subject Property and vicinity use information to the best of their knowledge.

2.5 Information from Neighbor(s)

PES did not attempt to interview neighbors of the Subject Property regarding the current uses of the Subject Property and adjacent properties since the Subject Property is not abandoned.

2.6 Present Ownership & Use

Middlesex South Registry of Deeds records identify the current Subject Property owner as Linda Spinucci Peterson, Trustee of the *Antonette Spinucci Revocable Trust,* which purchased the Subject Property on June 10, 2014. The Middlesex South Registry of Deeds has a record of this transaction in Book 63768, beginning on Page 314. The Subject Property is currently occupied by *Marfione Studio*, a salon, international market, and a liquor store.

2.7 Adjoining Properties

North
• *Cambridge Taylor Rental* (352 McGrath Highway) adjoins the Subject Property to the north. The database search identifies this property with SHWS and Release listings; see Section 5.0.
• A residential property (3 Boston Street) adjoins the Subject Property to the north and west.
South
• *Valvoline Instant Oil Change* and *Somerville Motors* (182 Washington Street) located across Washington Street adjoins the Subject Property to the south. The database search identifies this property with RCRA-VSQG, LUST, Release, and SHWS listings; see Section 5.0.
East
• A mixed use residential and retail building (157-161 Washington Street) adjoins the Subject Property to the east.
West
• Union Square Apartments (181 Washington Street) located across Boston Street adjoins the Subject Property to the west. The database search identifies this property with SHWS, Release, and LUST listings; see Section 5.0.

2.8 Zoning

According to the March 20, 2022, Zoning Map of Somerville, the Subject Property is zoned as Mid Rise 5 (MR5). This map depicts properties in the vicinity of the Subject Property as zoned as MR5, Mid Rise 4 (MR4), Neighborhood Residential (NR) and Urban Residential (UR).

2.9 Environmental Permits and/or Violations

PES did not discover any environmental permits or violations for the Subject Property at any of the local offices contacted during the preparation of this ESA.

3.0 Subject Property & Adjoining Properties History

3.1 Information from Current Subject Property Owner/Operator

PES interviewed Linda Spinucci Peterson, Trustee of *the Antonette Spinucci Revocable Trust.* Ms. Peterson indicated she spoke with Ms. Wanda Kopcych of the MassDEP In October 2025, who confirmed the Financial Inability status application for the most recent year had been approved and is up to date.

PES interviewed Mr. Joey Marfione, owner of *Marfione Studio*, occupant of the 179 Washington Street tenant space. Mr. Marfione has been a tenant since the early- to mid-1990s. According to Mr. Marfione, MassDEP personnel and their contractor(s) installed the SSDS system sometime around 2007 or 2008. The most recent visit from MassDEP occurred in or around 2012. Please note that Mr. Marfione and Ms. Peterson provided historical information to the best of their knowledge.

3.2 Information from Past Subject Property Owner(s)/Operator(s)

Middlesex South Registry of Deeds records identified the previous owner of the Subject Property as Francis McVey Sullivan (see Section 3.6). *PES* did not attempt to contact Francis McVey Sullivan regarding the history, past uses, and any known *RECs* at the Subject Property and adjacent properties as their contact information was not readily available. Section 1.4 discusses this data gap.

3.3 Information from Neighbor(s)

PES did not attempt to interview neighbors of the Subject Property regarding past uses of the Subject Property and adjacent properties since the Subject Property is not abandoned.

3.4 Previous Environmental Reports

PES reviewed environmental reports and correspondence records related to the Subject Property at the MassDEP website in order to obtain further information regarding the SHWS and Release listings identified during the database search.

The Subject Property is listed with MassDEP as an open release site under RTN 3-27087,. The Site is listed as Tier ID status indicating that it is out of compliance with MassDEP regulations. Due to financial constraints on the part of the owner, only limited assessment or remediation has been performed, primarily directed by MassDEP. *PES'*s summary of the available documentation is set forth below:

- In the late 1980's, 5,040 ug/L of PCE (versus a standard of 50 ug/L) was detected in groundwater across the street from the Subject Property at 182 Washington Street (RTN 32672), as well as low levels of PCE in groundwater at 308 McGrath Highway (RTN 3-2665). The Subject Property was considered to be the likely source.

- MassDEP began an investigation into the source of the PCE in 2007, eventually installing 23 groundwater monitoring wells down-gradient of the Subject Property along McGrath Highway and Mansfield Street.
- In August 2007, MassDEP sampled groundwater adjacent to and indoor air within the 179 Washington Street unit. PCE was detected in groundwater at 9,300 ug/L (versus a standard of 50 ug/L). PCE was also detected in the basement and first floor air samples of the shop at 90.9 and 87.6 ug/m^3, respectively, concentrations high enough to constitute an Imminent Hazard (IH) condition.
- MassDEP issued Notices of Responsibility (NOR) to Leonard Dicicco (former dry cleaner operator) and Antonette Spinucci (the Site owner) on September 11, 2007.
- In August 2008, a sub-slab depressurization system (SSDS) was installed in the basement, which collected vapors from below the building slab and vented them at roof level. Subsequent indoor air testing indicated an IH condition was no longer present, but that elevated concentrations of PCE indoors persisted. Portable air purifying units have historically been operated at the Site in addition to the SSDS.
- The subslab depressurization system consists of three extraction points that collect vapors from below the concrete basement floor. These are connected via PVC piping to an exterior fan and an exhaust stack that extends above the roof line. Each point is equipped with a sample port and a manometer was installed upstream of the junction of the three extraction points to allow confirmation that the system is operational.
- Based on the larger groundwater monitoring effort, MassDEP investigated several additional buildings on Washington Street and Mansfield Street for vapor intrusion. After evaluation, MassDEP engaged a contractor to install SSDS at two additional impacted properties (182 Washington Street and 51 Mansfield Street).
- The most recent MassDEP sampling in February 2012 detected PCE at up to 37.1 ug/m^3 on the occupied first floor desk. MassDEP noted that this does not create an IH condition, but it is considered a long-term risk. MassDEP recommended several actions, including replacing the air filters in two portable air purifying units, sealing the basement floor, and conducting an engineering assessment of the SSDS to ensure proper functioning and/or increased effectiveness.

3.5 Municipal Records

Somerville Assessor's records indicate the first floor contains approximately 5,873 SF and the basement contains 4,778 SF.

3.6 Chain of Ownership Records

Table 1 summarizes the Middlesex South Registry of Deeds records of Subject Property ownership. *PES* conducted a cursory review of title records and does not represent this abstract as a complete chain of title to the Subject Property. The Client did not provide *PES* with a title search of the Subject Property back to the year 1980.

Table 1: Past Ownership

Owner	Book/Page	Date of Purchase
Florence T. Langone	10598/19	July 28, 1964
163-179 Washington Street Trust	11443/559	December 15, 1967
Francis McVey Sullivan	11751/423	October 10, 1969
Antonette Spinucci	11863/580	July 20, 1970
Antonette Spinucci Revocable Trust	63768/314	June 16, 2014

3.7 Historical Sources

3.7.1 Sanborn Fire Insurance Maps

PES reviewed available *Sanborn Fire Insurance* maps depicting the Subject Property and vicinity in the "Certified Sanborn® Map Report" from *Environmental Data Resources Inc.* (*EDR*). The following summarizes our review of these maps, which are included as Appendix 3:

SANBORN FIRE INSURANCE MAPS	
1900	**Subject Property:** No structures depicted.
	Adjoining Properties: Grammar school to the west; residential to the north; store to the east; no structures to the south.
	General Surrounding Area: Appears commercial and residential.
1933, 1950	**Subject Property:** Building with nine storefronts; auto garage in northern area.
	Adjoining Properties: Pharmacy and a store to the east; garage and filling station with five gasoline tanks depicted to the north; filling station with two gasoline tanks depicted to the south.
	General Surrounding Area: Commercial and residential.
	Subject Property: Dry cleaner depicted in the westernmost unit (179 Washington).

SANBORN FIRE INSURANCE MAPS	
1989, 1991	**Adjoining Properties:** Rug cleaner to the east; filling station to the north no longer depicted; filling station to the south replaced by a commercial office building; school to west replaced by Somerville Boys and Girls Club.
	General Surrounding Area: Commercial and residential.

3.7.2 Aerial Photographs

PES reviewed readily available aerial photographs depicting the Subject Property and vicinity at the *HistoricAerials* website. *PES* notes that due to the poor resolution and/or quality of these photographs, only general comments regarding the presence or absence of buildings can be made and cannot make any further comment regarding property conditions. The following summarizes our review of these photographs.

AERIAL PHOTOGRAPHS	
1938, 1955	**Subject Property:** Structure depicted.
	Adjoining Properties: Structures adjoining to the north, east, south, and west.
	General Surrounding Area: Appears mixed commercial and residential.
1971, 1978, 1985, 1995, 2001, 2003, 2004, 2008, 2010, 2013, 2014,	**Subject Property:** Addition to the northern side of the Subject Building
	Adjoining Properties: Appears mixed residential and commercial to the north.
	General Surrounding Area: Appears commercial and residential; highway to the east.
2016, 2018, 2021, 2023	**Subject Property:** Structure depicted.
	Adjoining Properties: Property to the west appears redeveloped with a commercial-type structure.
	General Surrounding Area: Appears mixed commercial and residential.

3.7.3 Historical Atlases/ Topographic Quadrangles

PES reviewed readily available Historical Topographic Maps depicting the Subject Property and vicinity at the *HistoricAerials* website. The following summarizes our review of these maps.

HISTORICAL TOPOGRAPHIC MAPS	
1893, 1900, 1901, 1902, 1905, 1909, 1912, 1918, 1925, 1931, 1939, 1942,	**Subject Property:** No structures depicted.
	Adjoining Properties: Structure to the north; structure across a roadway to the west.
	General Surrounding Area: Appears lightly developed.
1946, 1950, 1957, 1958, 1962, 1968, 1973, 1979, 1986,	**Subject Property:** No structures depicted.
	Adjoining Properties: School to the west.
	General Surrounding Area: No structures beyond the adjacent school and roadways depicted.
2012, 2015, 2018, 2021	**Subject Property:** No structures depicted.
	Adjoining Properties: School to the west no longer depicted.
	General Surrounding Area: Similar to previous.

3.7.4 City Directories

PES reviewed years 1940, 1970, 1975, 1984, 1989, 1992, 1995, 2000, 2005, 2010, 2014, 2017, and 2022 City Directories of Somerville in "The EDR-City Directory Image Report." *PES* targeted adjoining properties in the immediate vicinity of Subject Property; residential listings are not included.

The Subject Property was listed as businesses including an undertaker, cigar shop, barber shop, dog groomer, photo studio, beauty salon, nail salon, variety store, and a dry-cleaner.

The following Subject Property listings could potentially pose a threat to the Subject Property:

- *Embassy Cleaners* (1970, 1975, 1984, 1989, 1992)
- *Washington Cleaners* (2005)

Properties in the vicinity of the Subject Property have historically been residential and commercial with businesses including a coffee shop, oil change shop, video store, insurance agency, dentist, tailor, and a filling station.

182 Washington Street, adjoining the Subject Property to south across Washington Street, was listed as "Cooke Nelson H, Gas & Oil" in 1940. This property is hydraulically down-gradient of the Subject Property, making it unlikely to pose a

threat to the environmental integrity of the Subject Property. A downgradient Property Status Opinion was filed for this property in connection with the detection of chlorinated solvents in groundwater, indoor air, and soil vapor; the DPS Opinion suspects the Subject Property as the source of the release.

3.7.5 Additional Historical Sources

The Subject Property and the adjoining properties were historically used for manufacturing, industrial, and/or retail uses, therefore a review of additional historical sources is warranted. However, no additional relevant information from additional historical sources researched was discovered that was not already known from the standard historical sources discussed in Sections 3.7.1 through 3.7.4.

3.8 Summary of Historical Information

Historical records indicate the Subject Building was constructed sometime between 1900 and 1933. The northern garage structure was built circa 1971. Tenants at the Subject Property have historically included an undertaker, cigar shop, barber shop, dog groomer, photo studio, beauty salon, nail salon, variety store, and a dry-cleaner. The dry-cleaner reportedly operated in the western-most tenant space (179 Washington Street) from the 1950s into the 1990s. The garage structure was reportedly used to repair mopeds and possibly bicycles under the business name *Euro Cycles* in the 1990s.

The area adjoining the Subject Property to the west was occupied by a grammar school from 1890 until circa 1950; this property was redeveloped for use as the Somerville Boys & Girls Club in 1955, and redeveloped once again in 2015 for its current use as an apartment building. The southern adjoining property was occupied by a gasoline filling station from sometime prior to 1940 until the 1960s. This property was then converted into a mixed-use commercial and residential property. The area adjoining the Subject Property to the north has had mixed commercial and residential use. The northern adjoining property at 352 McGrath Highway was occupied by a garage and filling station from prior to 1933 until at least 1950, followed by an automobile dealer and bakery in the 1950s and 1960s. From 1968 until 2003, this property was occupied by *Commercial Plastics*, which cut plastic sheeting and rods to customer specifications, and since 2003 it has been occupied by *Taylor Rental Corporation*. The northern adjoining property at 3 Boston Street has had residential use beginning prior to 1900. A mixed use residential and retail building (157-161 Washington Street) adjoins the Subject Property to the east.

4.0 Physical Subject Property Description

4.1 Topography

The Subject Property is at an approximate elevation of 26 feet above the National Geodetic Vertical Datum of 1929, according to the 2024 USGS *Boston North, MA* topographic quadrangle (see Appendix 1, Figure 3). The Subject Property and general surrounding area slope moderately downwards to the south-southeast.

4.2 Geology

PES did not observe any bedrock outcrops at the Subject Property. According to the USGS Mineral Resources On-Line Spatial Data, Geology by state, online mapping tool, Cambridge Argillite underlies the Subject Property. This formation consists of argillite and quartzite.

According to the United States Department of Agriculture, Natural Resources Conservation Service Online Web Soil Survey, soils classified as Newport-Urban land complex, three to fifteen percent slopes, underlies the Subject Property. The parent material of this mapping unit consists of friable loamy basal till over dense loamy lodgment till derived from phyllite. Urban land refers to a category of soils where more than 80% of the surface is covered by impervious structures such as buildings, roads, sidewalks, and driveways.

4.3 Hydrology

4.3.1 Surface Water

The Subject Property is in the Charles River Watershed, with the Charles River located approximately 1.2-miles southeast of the Subject Property. *PES* did not observe any surface water bodies at the Subject Property. Surface runoff would be to the southeast, towards Washington Street, if unimpeded by systems such as stormwater catch basins.

4.3.2 Wetlands

PES did not perform a wetland survey at the Subject Property. Based on general observation, *PES* did not observe any wetland-type vegetation at the Subject Property. Additionally, the United States Department of Interior, Fish and Wildlife

Service, National Wetlands Inventory Online Wetlands Mapper does not depict wetlands at or in the immediate vicinity of the Subject Property.

4.3.3 Hydrogeology

PES did not identify any current means of sampling groundwater at the Subject Property. Based upon topography and proximity of surface-water bodies (i.e., tributaries, rivers, wetlands), *PES* infers groundwater flow to generally be to the south or southeast.

5.0 Records Review

PES contracted database searches of federal and state environmental records. Sections 5.1 and 5.2 of this report discuss federal- and state-listed properties identified within the radii specified by *ASTM* E1527-21. Refer to Appendix 5 for a complete copy of the database search report. Table 2 summarizes the results of the database search. *PES'* database review includes screening of identified facilities for soil, or groundwater contamination or possible vapor encroachment that could potentially impact the Subject Property.

Table 2: Database Search Results

	Database	Search Radius	Subject Property	Adjoining	0 - ⅛ mile	⅛ - ¼ mile	¼ - ½ mile	½ - 1 mile
Federal Databases	NPL	1 mile	No	0	0	0	0	0
	NPL Delisted	½ mile	No	0	0	0	0	
	SEMS	½ mile	No	0	0	0	0	
	SEMS-Archive	½ mile	No	0	0	1	1	
	RCRA CORRACTS	1 mile	No	0	0	0	0	0
	RCRA TSD	½ mile	No	0	0	0	0	
	RCRA Generator	Subject Property & adjoining	No	1				
	IC / EC Registries	Subject Property	No					
	ERNS	Subject Property	No					
State & Tribal Databases	SHWS	1 mile	Yes	3	13	65	106	327
	Release / HMIRS	½ mile	Yes	3	19	69	132	
	Solid Waste Facilities/ Landfills (SWF/LF)	½ mile	No	0	0	1	0	
	Leaking USTs/ASTs	½ mile	No	2	6	9	34	
	Registered USTs/ ASTs	Subject Property & adjoining	No	0				
	IC/ EC Registries	Subject Property	No					
	VCP listings	½ mile	No	0	0	0	0	
	Brownfields listings	½ mile	No	0	0	2	1	

5.1 Federal Records

5.1.1 NPL Sites

The search did not identify any National Priority List (NPL) locations within one mile of the Subject Property, or any Delisted NPL locations within ½ mile of the Subject Property.

5.1.2 SEMS Listings

The search did not identify any Superfund Enterprise Management System (SEMS) listings within ½ mile of the Subject Property.

The search identified two SEMS No Further Remedial Action Planned (SEMS-Archive) listings within ½ mile of the Subject Property. These listings are both greater than 0.15-miles from the Subject Property in inferred hydraulically down-gradient locations, making them unlikely to have current or former releases of

hazardous substances or petroleum products with the potential to migrate to the Subject Property.

5.1.3 RCRA Facilities

The search did not identify the Subject Property with a RCRA hazardous waste generator listing. The search identified the southern adjoining property located across Washington Street at 182 Washington Street as a RCRA Very Small Quantity Generator (VSQG).

Valvoline Instant Oil Change AB0001 (182 Washington Street) - adjoins the Subject Property to the south, and is listed as a generator since 1989. VSQGs produce no more than 100 kilograms (kg) of hazardous waste per month or one kilogram or less per month of acutely hazardous waste, and/or store no more than 1,000 kg of hazardous waste at any one time. Types of hazardous waste produced at this facility include ignitable waste and lead. This facility is in an inferred hydraulically down-gradient location from the Subject Property, making it unlikely to have current or former releases of hazardous substances or petroleum products with the potential to migrate to the Subject Property.

The search did not identify any RCRA Corrective Action Activity (CORRACTS) facilities within one mile of the Subject Property.

The search did not identify any RCRA Treatment, Storage and Disposal (TSD) facilities within ½ mile of the Subject Property.

5.1.4 Institutional Control/Engineering Control (IC/EC) Registries

The database search did not identify the Subject Property as the location of a federally registered IC or EC.

5.1.5 ERNS Sites

The database search did not identify the Subject Property as an Emergency Response Notification System (ERNS) site.

5.2 State Records

5.2.1 State Hazardous Waste Sites

The search identified the Subject Property with a SHWS listing; see Section 3.4 for a detailed discussion of the Site listings. The database identified three adjacent properties with SHWS listings; one of these; 182 Washington Street, south-adjoining across Washington Street, is discussed in more detail in Section 5.5. This facility lies downgradient and is unlikely to have current or former releases of hazardous substances or petroleum products with the potential to migrate to the Subject Property; however, it may have been contaminated by a release at the Subject Property. The other two adjacent properties are discussed below.

Boys & Girls Club (181 Washington Street), west-adjoining across Boston Street - RTN 3-27899:

A release of No. 2 fuel oil was discovered during the removal of a 6,000-gallon fuel oil UST at the property in 2008. Approximately 195 tons of petroleum impacted soil was excavated and removed from the site. A Risk Characterization demonstrated a condition of No Significant Risk exists at the disposal site, and a Permanent Solution with No Conditions (PSNC) Statement was filed in 2017. Based on the available information, this listing is unlikely to have current or former releases of hazardous substances or petroleum products with the potential to migrate to the Subject Property.

352 McGrath Highway, north adjoining RTN 3-22511

Petroleum hydrocarbons in soil and groundwater were identified in 2003 near a former heating oil UST below the north of the building. The UST removal addressed this contamination; however, additional petroleum and chlorinated solvent contamination was detected associated with former sumps in the building. After soil excavation, groundwater and vapor monitoring, a risk assessment determined that a condition of no significant risk existed at the property and a Response Action Outcome (RAO, now Permanent Solution) was filed in June 2006. Based on regulatory status and hydraulically cross-gradient direction, this listing is unlikely to have current or former releases of hazardous substances or petroleum products with the potential to migrate to the Subject Property.

In addition to the Subject Property and adjoining property listings, the database identified 511 SHWS listings within one mile of the Subject Property. Based on their regulatory status, inferred hydraulically cross- or down-gradient locations, and/or distances from the Subject Property, none of these listings are likely to have current or former releases of hazardous substances or petroleum products with the potential to migrate to the Subject Property.

5.2.2 Registered Underground Storage Tanks (USTs)

The search did not identify any registered USTs at or adjoining the Subject Property. USTs may pose a threat to the Subject Property if tanks rupture or leak. Please refer to Section 6.1 for further on-site UST observations.

5.2.3 Leaking UST (LUST) and Leaking AST (LAST) Sites

The search identified eight LAST and 43 LUST listings within ½-mile of the Subject Property.

Two of the LUST listings are on adjacent properties. The release at the west-adjoining 181 Washington Street is discussed in Section 5.2.1 above, and the release at the south-adjoining 182 Washington Street is discussed in Section 5.5.

5.2.4 Solid Waste Facilities/Landfills

The search identified one solid waste facility/landfill (SWF/LF) listing within ½ mile of the Subject Property. This facility is located approximately 0.213-miles from the Subject Property in an inferred hydraulically down-gradient location, making it unlikely to have current or former releases of hazardous substances or petroleum with the potential to migrate to the Subject Property.

5.2.5 Release / HMIRS

The search identified the Subject Property with a Release listing; see Section 5.5. The database identified three adjacent properties with Release listings; a discussion of these listings is provided in Section 5.5

The database search identified 220 additional Release listings and three HMIRS listings within ½-mile of the Subject Property. Based on their regulatory status, inferred hydraulically cross- or down-gradient locations, and/or distances from the

Subject Property, none of these listings are likely to have current or former releases of hazardous substances or petroleum products with the potential to migrate to the Subject Property.

5.2.6 State VCP Listings

The database search did not identify any State Voluntary Cleanup Program (VCP) listings within ½ mile of the Subject Property.

5.2.7 State Brownfield Listings

The database search identified three State Brownfields listings within ½ mile of the Subject Property. Based on their regulatory status, inferred hydraulically cross- or down-gradient location, and/or distance from the Subject Property, these listings are unlikely to have current or former releases of hazardous substances or petroleum products with the potential to migrate to the Subject Property.

5.3 Database Search Unmappable Properties

The search identified unmappable ("orphan") properties that are potentially located in the general vicinity of the Subject Property. However, owing to the absence or inaccuracy of information available from the government sources accessed, the database search contractor was unable to definitively plot these listings. *PES* reviewed the list of orphan properties in an attempt to locate them relative to the Subject Property. If *PES* was able to locate such a property within a respective *ASTM* search radius which is likely to have current or former releases of hazardous substances or petroleum products with the potential to migrate to the Subject Property, we included it above in the appropriate database sections of this ESA. *PES* also determined that the Subject Property is not likely identified as an orphan listing. Refer to Appendix 5 for information on the unmappable properties.

5.4 Local Records

PES reviewed local records in an attempt to identify any registered USTs and ASTs, the licensed storage of hazardous materials, and any hazardous waste sites, sources, and/or facilities at or in the immediate vicinity of the Subject Property.

PES submitted a public records request to the Somerville City Solicitor's Office, who serves as the RAO for the City of Somerville, on December 9, 2025. The RAO forwarded

our request to all applicable departments, who subsequently provided information as discussed below.

5.4.1 Fire Department

At the time of the submittal of this Phase I ESA, the Fire Department had not provided any response to our records request. *PES* will forward any pertinent information if received in an addendum to this report.

5.4.2 Other Departments

At the time of the submittal of this Phase I ESA, the Somerville City Solicitor had not provided any response to our records request. *PES* will forward any pertinent information if received in an addendum to this report.

5.5 Regulatory Agency File Review

PES reviewed an October 2019 Downgradient Property Status report available from MassDEP for the south-abutting 182 Washington Street, in order to obtain further information regarding the SHWS and release listings identified during the database search. Significant information from this review is provided below:

- During a 1989 subsurface investigation due to the former automotive use of this property, no petroleum exceedances were noted, but chlorinated solvents including PCE, TCE, and DCE were detected exceeding the applicable Reportable Concentrations.

- MassDEP conducted an assessment of the chlorinated solvent release between 2007 and 2010, Based on the detection of elevated PCE in groundwater at the 179 Washington Street site, MassDEP determined that a release had occurred during historic dry cleaning operations, and issued a Notice of Responsibility in September 2007 to the former dry cleaner operator) and to the owner of 179 Washington Street.

- Concentrations of chlorinated compounds in groundwater generally decreased with distance from the 179 Washington Street site, in a hydraulically downgradient direction, directly past 182 Washington Street to the south-southeast. A PCE plume map based on 2009 data is attached as Figure 4, Appendix 1.

- MassDEP's assessment included a vapor intrusion assessment starting at the former Embassy Dry Cleaners at 179 Washington Street, extending to the south approximately 600 feet to include the residential homes and small businesses on Mansfield Street and McGrath Highway. This assessment resulting in MassDEP

overseeing the installation of SSDS at 182 Washington Street; this system was still running when the DPS was filed in 2019.

- Based on the MassDEP documentation of a release from the historic drycleaner at the upgradient 179 Washington St, EBI Consulting filed a DPS on behalf of the owner of the 182 Washington St property in October 2019, citing the Subject Property as the source of the detected chlorinated solvent contamination.

6.0 Subject Property Reconnaissance

The objective of the Subject Property reconnaissance was to identify *RECs* at or in the immediate vicinity of the Subject Property by means of a visual, surficial inspection. Mr. Stephan White, Jr. of *PES*' conducted this visual reconnaissance of exterior and interior portions of the Subject Property on December 3, 2025 in the presence of Linda S. Peterson, Trustee of *the Estate of Antonette Spinucci Revocable Trust*. *PES*' reconnaissance consisted of a systematic traverse of the Subject Property to provide a view of Subject Property improvements, facilities, and grounds. *PES* also attempted to visually inspect exterior portions of adjacent properties observable from within the boundaries of the Subject Property and from public ways.

PES did not attempt to inspect inaccessible areas of the Subject Property including building rooftops, beneath parked motor vehicles or trailers, under manholes, in any inaccessible, locked rooms, or inside electrical transformers. *PES* does not render an opinion as to *RECs* at uninspected or visually obstructed portions of the Subject Property.

6.1 Underground Storage Tanks (USTs)

PES did not observe any visual evidence of USTs (such as fill or vent pipes or dispensers) at the Subject Property during our inspection. Additionally, Ms. Peterson was unaware of the presence of any USTs at the Subject Property.

6.2 Aboveground Storage Tanks (ASTs)

PES did not observe any ASTs or visual evidence of ASTs (such as fill or vent pipes) at the Subject Property during our inspection. Additionally, Ms. Peterson was not aware of any ASTs at the Subject Property.

6.3 Hazardous Substances and Petroleum Products

PES did not observe the presence of hazardous substances at the Subject Property during our inspection beyond retail-sized cleaning and maintenance supplies stored in a neat and orderly manner in the Subject Property.

6.4 Hazardous Waste/Regulated Waste

PES did not observe any evidence to suggest the Subject Property tenants generate hazardous waste at the Subject Property. *PES* did not observe any waste pits, landfills, lagoons, or other impoundments at the Subject Property. *PES* did not observe the presence of hazardous waste containers or unidentified waste containers at the Subject Property. *PES* did not observe any waste pits, landfills, lagoons, or other impoundments at the Subject Property.

6.5 Polychlorinated Biphenyls (PCBs)

PES observed did not observe any pole or pad-mounted transformers at the Subject Property

The United States Environmental Protection Agency (EPA) partially banned the use of PCBs in November 1979 and banned all use of PCBs in newly installed electromagnets, transformers, heat-transfer, and hydraulic systems in July 1984. Based on the age of the Subject Building and its associated equipment and components, it is possible that hydraulic equipment (if any) contain PCBs. There is also a possibility that any caulking used in the Subject Building contains PCBs.

PES only conducted a visual inspection for potential PCB-containing equipment since any further inspection is beyond the scope of this ESA.

6.6 Solid Waste Disposal

PES observed did not observe any solid waste dumpsters at the Subject Property. *PES* did not observe any evidence of unauthorized dumping at the Subject Property at the time of our inspection.

6.7 Distressed Surfaces or Vegetation

PES did not observe any areas of burned, stained, or discolored soils, nor did we detect any odors in soils that might suggest the presence of hazardous substances or petroleum products.

6.8 Underground Structures

An SSDS was installed in the basement of the 179 Washington Street unit in 2008. The SSDS consists of three vapor extraction points connected by PVC piping to a fan venting to the roof. *PES* also observed what appeared to be a sealed sump in the basement of the Subject Building.

PES observed a floor drain in the northern garage of the Subject Building. The location of discharge for the drain is not known. Other than utilities, *PES* did not observe any additional evidence of underground structures at the Subject Property. Ms. Spinucci was unaware of any additional underground structures at the Subject Property.

6.9 Explosive Gas

Other than natural gas utilities, *PES* did not observe any Subject Property operations (such as landfilling) or geologic conditions (such as oil or natural gas deposits) that would constitute a source of explosive gas.

6.10 Airborne & Waterborne Contamination

PES did not observe any physical evidence of airborne or waterborne contamination from on-site activities or adjacent properties.

7.0 Limitations & Conditions

7.1 General Limitations & Conditions

The observations in this ESA are valid on the date of the Subject Property reconnaissance and made under the limitations and conditions noted herein. This ESA is also subject to the limitations and conditions contained within the *Agreement for Services* (*Agreement*) authorized by the Client on December 3, 2025.

PES prepared this Report for the sole and exclusive use of the Client as specified in the *Agreement* and is not intended to be nor shall it be relied upon by any other individual or party without the express written authorization of *PES*. To the extent that another individual or party acts in reliance, such individual or party shall indemnify and hold *PES* harmless for any damages, losses, or expenses arising therefrom. Such reliance shall be at the individual or party's sole risk, without liability on the part of *PES*.

7.2 Limiting Conditions of ESA

PES based the recommendations and conclusions discussed herein solely and in reliance upon information collected as a result of the activities delineated in the Scope of Services (see Section 1.2). *PES* neither attests nor renders an opinion as to the accuracy or comprehensiveness of the statements of the individuals interviewed, readily available governmental records, environmental reports conducted by other consultants, analytical results, or the database search results provided by the database contractor.

There is a limit to all environmental investigation in the sense that the researcher must draw conclusions and develop recommendations with information obtained from limited research and Subject Property evaluation. Future subsurface investigations may determine conditions to be different from those implied by surficial observation. *PES* does not render any warranty, either express or implied, as to the presence of hazardous substances or petroleum products beyond that observed during the Subject Property reconnaissance. The passage of time may also result in a change in the environmental characteristics at the Subject Property and surrounding properties. *PES* does not render an opinion as to environmental Subject Property conditions, which may change subsequent to the date of the Subject Property reconnaissance. Moreover, this Phase I Report, and the conclusions and recommendations contained herein, remain valid for 180 days prior to the date of acquisition, or up to one year, if five specific components of the Report have been updated (the five components include: interviews, searches for recorded environmental cleanup liens, review of government records, Subject Property reconnaissance of the subject property and the Environmental Professional [EP] Declaration. In addition, the 180 day or 1-year time period begins with the date upon which the first of these components was completed.

PES did not attempt to inspect inaccessible areas of the Subject Property including building rooftops, beneath parked motor vehicles or trailers, under manholes, in any inaccessible,

locked rooms, or inside electrical transformers. *PES* does not render an opinion as to *RECs* at uninspected or visually obstructed portions of the Subject Property.

Many properties, particularly in urban areas, contain soil with detectable concentrations of various widespread contaminants resulting from the historical use of the Subject Property and/or the surrounding area. These contaminants commonly include metals, coal and wood-ash related compounds, petroleum, asphalt, etc. Pesticide residues may exist also. Provided that the concentrations of these contaminants do not pose a significant risk of harm as identified in the Massachusetts Contingency Plan (MCP), remediation is not generally required unless the soils are to be disturbed or removed off the Subject Property. Unless otherwise specified in this report, *PES* did not perform testing for these contaminants at the Subject Property, nor do we opine as to the impact the possible presence of these constituents may have on the future use of the Subject Property including excavation and off-site removal or disposal of such soils.

All buildings are subject to the EPA National Emissions Standards for Hazardous Air Pollutants (NESHAP) asbestos regulations. The age of a building does not serve as a determining factor as to whether it is subject to asbestos regulations. Only laboratory analysis of suspect ACM materials can confirm the presence or absence of asbestos. Interested parties should assume that the following building materials contain asbestos unless collected for laboratory analysis and proven otherwise: Ceiling tiles & wallboards, floor tile & mastics, window & building caulking, joint compounds & spackle, boiler insulation, duct & tank insulation, roofing materials, pipe & pipe fitting insulation, window glazing material, wall & ceiling plasters, spray-applied fireproofing, roofing materials, and cement board (transite). Prior to demolition or renovation, a pre-demolition asbestos survey should be completed by a licensed asbestos inspector.

PES did not conduct laboratory analyses for the presence of asbestos, lead-based paint (LBP), drinking water quality, radon, urea formaldehyde foam insulation, vapor intrusion, or electromagnetic radiation. Although the accepted method of accurately determining subsurface conditions at the Subject Property would be to conduct a *subsurface investigation* (including the collection and analysis of soil and groundwater samples), such investigation was beyond the scope of this ESA. Lastly, *PES* did not intend this ESA to substitute for a regulatory compliance audit of the Subject Property.

7.3 Methodology

PES performed professional services, obtained findings, rendered conclusions, and prepared recommendations in accordance with generally accepted practices of other environmental consultants undertaking similar investigations at the same time in the same geographical area. *PES* exercised the degree of care and skill generally exercised by other environmental consultants under similar circumstances and conditions. We followed guidelines set forth in *ASTM* E1527-21 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*.

7.4 Environmental Professional Statement

I, Ellen Blackburn, declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in 40 CFR 312.10. I have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by PES were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EDR MGP	EDR Proprietary Manufactured Gas Plants

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 09/29/2025 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/02/2025 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/02/2025 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/02/2025 has revealed that there are 15 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Protection's Summary Listing of all the Tanks Registered in the State of Massachusetts.

A review of the UST list, as provided by EDR, and dated 10/07/2025 has revealed that there are 10 UST sites within approximately 0.25 miles of the target property.

Lists of state and tribal brownfield sites

BROWNFIELDS: Under Massachusetts law, M.G.L. c. 21E is the statute that governs the cleanup of releases of oil and/or hazardous material to the environment. The Brownfields Act of 1998 amended M.G.L. c. 21E by establishing significant liability relief and financial incentives to spur the redevelopment of brownfields, while ensuring that the Commonwealth's environmental standards are met. Most brownfields are redeveloped with the benefit of liability protections that operate automatically under M.G.L. c. 21E.

A review of the BROWNFIELDS list, as provided by EDR, has revealed that there are 3 BROWNFIELDS sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 09/19/2025 has revealed that there are 29 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 06/23/2025 has revealed that there are 3 PFAS ECHO sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 12 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 10 UST FINDER sites within approximately 0.25 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 06/02/2025 has revealed that there are 83 E MANIFEST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 19 EDR Hist Auto sites within approximately 0.25 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.25 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA HWS: The EDR Recovered Government Archive State Hazardous Waste database provides a list of SHWS incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Environmental Protection in Massachusetts.

A review of the RGA HWS list, as provided by EDR, has revealed that there are 400 RGA HWS sites within approximately 1 mile of the target property.

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Environmental Protection in Massachusetts.

A review of the RGA LUST list, as provided by EDR, has revealed that there are 38 RGA LUST sites within approximately 0.5 miles of the target property.

Environmental Interest/Information System:
The Massachusetts - Environmental Protection Integrated Computer System (MA-EPICS) is the central repository for all environmental protection data for the State of Massachusetts.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Waste Description: 1,2-Dichloroethane

Waste Code: D031
Waste Description: Heptachlor (And Its Epoxide)

Waste Code: D032
Waste Description: Hexachlorobenzene

Waste Code: D033
Waste Description: Hexachlorobutadiene

Waste Code: D036
Waste Description: Nitrobenzene

Waste Code: D037
Waste Description: Pentachlorophenol

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing:
Tetrachloroethylene, Trichlorethylene, Methylene Chloride,
1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated
Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing
Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of
One Or More Of The Above Halogenated Solvents Or Those Solvents Listed
In F002, F004, And F005; And Still Bottoms From The Recovery Of These
Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene,
Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane,
Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane,
Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2,
Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before
Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The
Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And
F005; And Still Bottoms From The Recovery Of These Spent Solvents And
Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl
Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl
Alcohol, Cyclohexanone, And Methanol; All Spent Solvent
Mixtures/Blends Containing, Before Use, Only The Above Spent
Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends
Containing, Before Use, One Or More Of The Above Nonhalogenated
Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or
More Of Those Solvents Listed In F001, F002, F004, And F005; And Still
Bottoms From The Recovery Of These Spent Solvents And Spent Solvent
Mixtures.

AUTOZONE (Continued) **1000358460**

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl
Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene,
2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends
Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of
One Or More Of The Above Nonhalogenated Solvents Or Those Solvents
Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of
These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F039
Waste Description: Leachate Resulting From The Treatment, Storage, Or Disposal Of Wastes
Classified By More Than One Waste Code Under Subpart D, Or From A
Mixture Of Wastes Classified Under Subparts C And D Of This Part.
(Leachate Resulting From The Management Of One Or More Of The
Following Epa Hazardous Wastes And No Other Hazardous Wastes Retains
Its Hazardous Waste Code(S): F020, F021, F022, F023, F026, F027,
And/Or F028.)

Environmental Interest/Information System:

AUTOZONE (Continued) **1000358460**

The Massachusetts - Environmental Protection Integrated Computer System (MA-EPICS) is the central repository for all environmental protection data for the State of Massachusetts.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Massachusetts - Environmental Protection Integrated Computer

HYDRAMATIC SALES & SERVICE CORP (Continued) **1000353444**

System (MA-EPICS) is the central repository for all environmental protection data for the State of Massachusetts.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Massachusetts - Environmental Protection Integrated Computer System (MA-EPICS) is the central repository for all environmental protection data for the State of Massachusetts.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Massachusetts - Environmental Protection Integrated Computer System (MA-EPICS) is the central repository for all environmental protection data for the State of Massachusetts.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent

SUSAN FRED M & SONS AUTO BODY (Continued) **1000150391**

Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
The Massachusetts - Environmental Protection Integrated Computer System (MA-EPICS) is the central repository for all environmental protection data for the State of Massachusetts.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Massachusetts - Environmental Protection Integrated Computer System (MA-EPICS) is the central repository for all environmental protection data for the State of Massachusetts.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Massachusetts - Environmental Protection Integrated Computer System (MA-EPICS) is the central repository for all environmental protection data for the State of Massachusetts.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:
Registry ID: 110071248226

163 GLEN STREET (Continued) **1024008292**

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
Registry ID: 110071972002

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on Brownfields properties assessed or cleaned up with grant funding, as well as information on Targeted Brownfields Assessments (TBA) performed by EPA Regions.
