Executive Summary

Discover an exceptional investment or owner-occupant opportunity in one of northwest Oklahoma City's most desirable commercial corridors. Located just off NW 122nd Street and N Pennsylvania Avenue, this 5,300-square-foot stand-alone office building sits on 0.46 acres and offers outstanding flexibility under O-2 zoning, allowing for a wide range of professional, medical, institutional, and commercial uses.

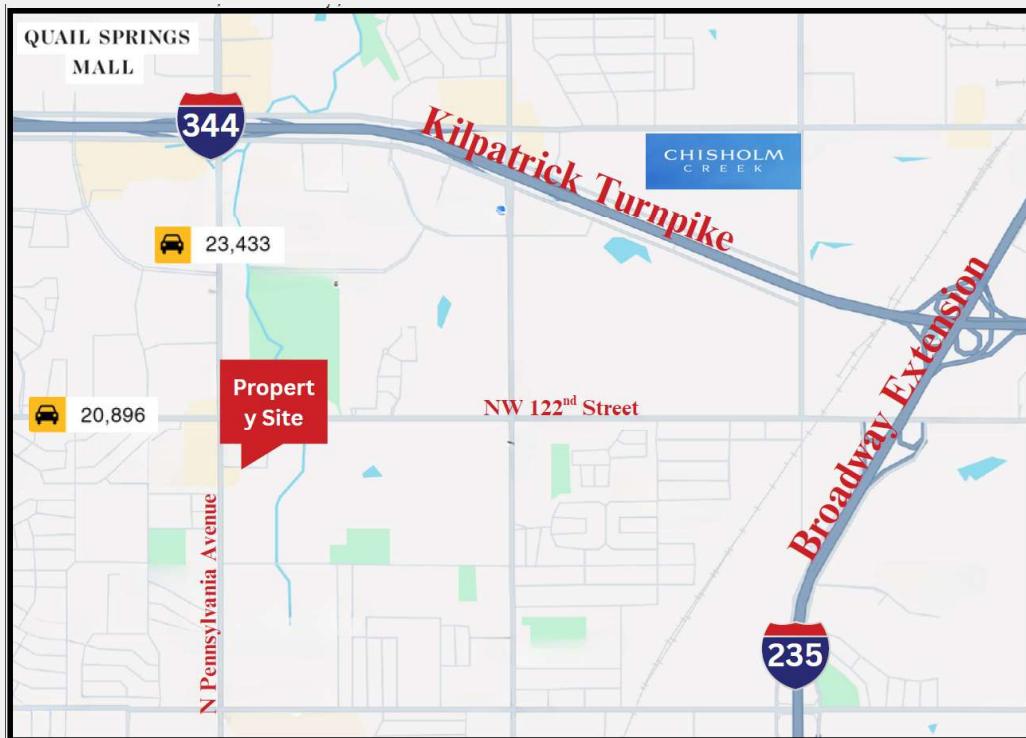

The property has undergone an extensive recent renovation, creating a modern, move-in-ready facility while still allowing a buyer to customize the space to meet specific operational needs. Previously utilized as a test laboratory, the building features multiple rooms with in-floor plumbing, which can be leveraged for medical, research, or specialty uses — or easily covered to function as a traditional office layout.

With excellent curb appeal, abundant parking, and strong accessibility, this property is ideally suited for a professional headquarters, medical or wellness practice, childcare facility, research operation, or income-producing asset.

Strategically positioned with quick access to the Kilpatrick Turnpike and Broadway Extension, the site offers convenient connectivity for employees, clients, and visitors, while benefiting from a strong surrounding business environment in northwest Oklahoma City.

A rare feature in this submarket, the property includes 45 dedicated on-site parking spaces, providing ample parking capacity and operational flexibility.

Whether you are seeking a stand-alone owner-user building, a flexible-use commercial investment, or a property that can adapt as your business grows, 2033 Heritage Park Drive delivers a compelling combination of location, versatility, and value.
