Preliminary Approximation of Waters of the US
Suitable for Preliminary Planning Only

S&EC reserves the right to modify this map based on more fieldwork, detailed delineations and any other additional information. Jurisdictional boundary approximations were mapped using topographic maps, air photos and ground truthing. If the site is going to be disturbed, a detailed delineation should be performed by S&EC, approved and permitted by the U.S. Army Corps of Engineers as required. If the user of this work desires an accurate map of the regulated features identified by S&EC, they should authorize S&EC to perform a detailed delineation and then retain a NC Registered Professional Land Surveyor to locate S&EC's flagging.
