San Diego Growth

America’s Finest City is one of the top five cities—alongside Boston, San Jose, San Francisco, and Seattle—with the highest rates of job growth in the technology sector.

As the national trend to trade in your car for a trolley ride to work and consistent connectivity to amenities increases, neighborhoods continue to see growth including Point Loma. San Diego has become a driver for this lifestyle and the next frontier of the innovation economy.

By 2050, the region is expected to grow by roughly 1 million residents, 500,000 jobs and 330,000 housing units (SANDAG). As the population increases, new growth and development will continue to cluster around and concentrate within the existing urbanized areas, including Mission Valley.

Point Loma is arguably one of San Diego’s best neighborhoods that has kept its historic charm with a steady flow of development.
