The IN-1, Light Industrial/Office District is intended to provide land for employment centers related to research and development, engineering and testing, office uses, warehousing, and limited manufacturing and industrial activities that will not have an adverse effect upon the district in which it is located. In addition, some low intensity commercial uses may be permitted in this district to provide convenient goods and services for employees and patrons in the zoning district. Higher intensity commercial uses are generally prohibited. Low intensity industrial uses are permitted by right or as a special use, depending on the attributes of the proposed land use.

The IN-2, Heavy Industrial District is intended to provide land for employment centers for more intensive industrial uses that typically generate heavy demands on the transportation system, including the need for freight rail service. These uses may cause odors, dust, noise, and vibrations and generate significant amounts of truck and freight rail traffic. Land uses in this district should generally be separated from residential districts by land uses permitted in the IN-1 or B-3 zoning districts.

# Metropolitan Champaign–Urbana

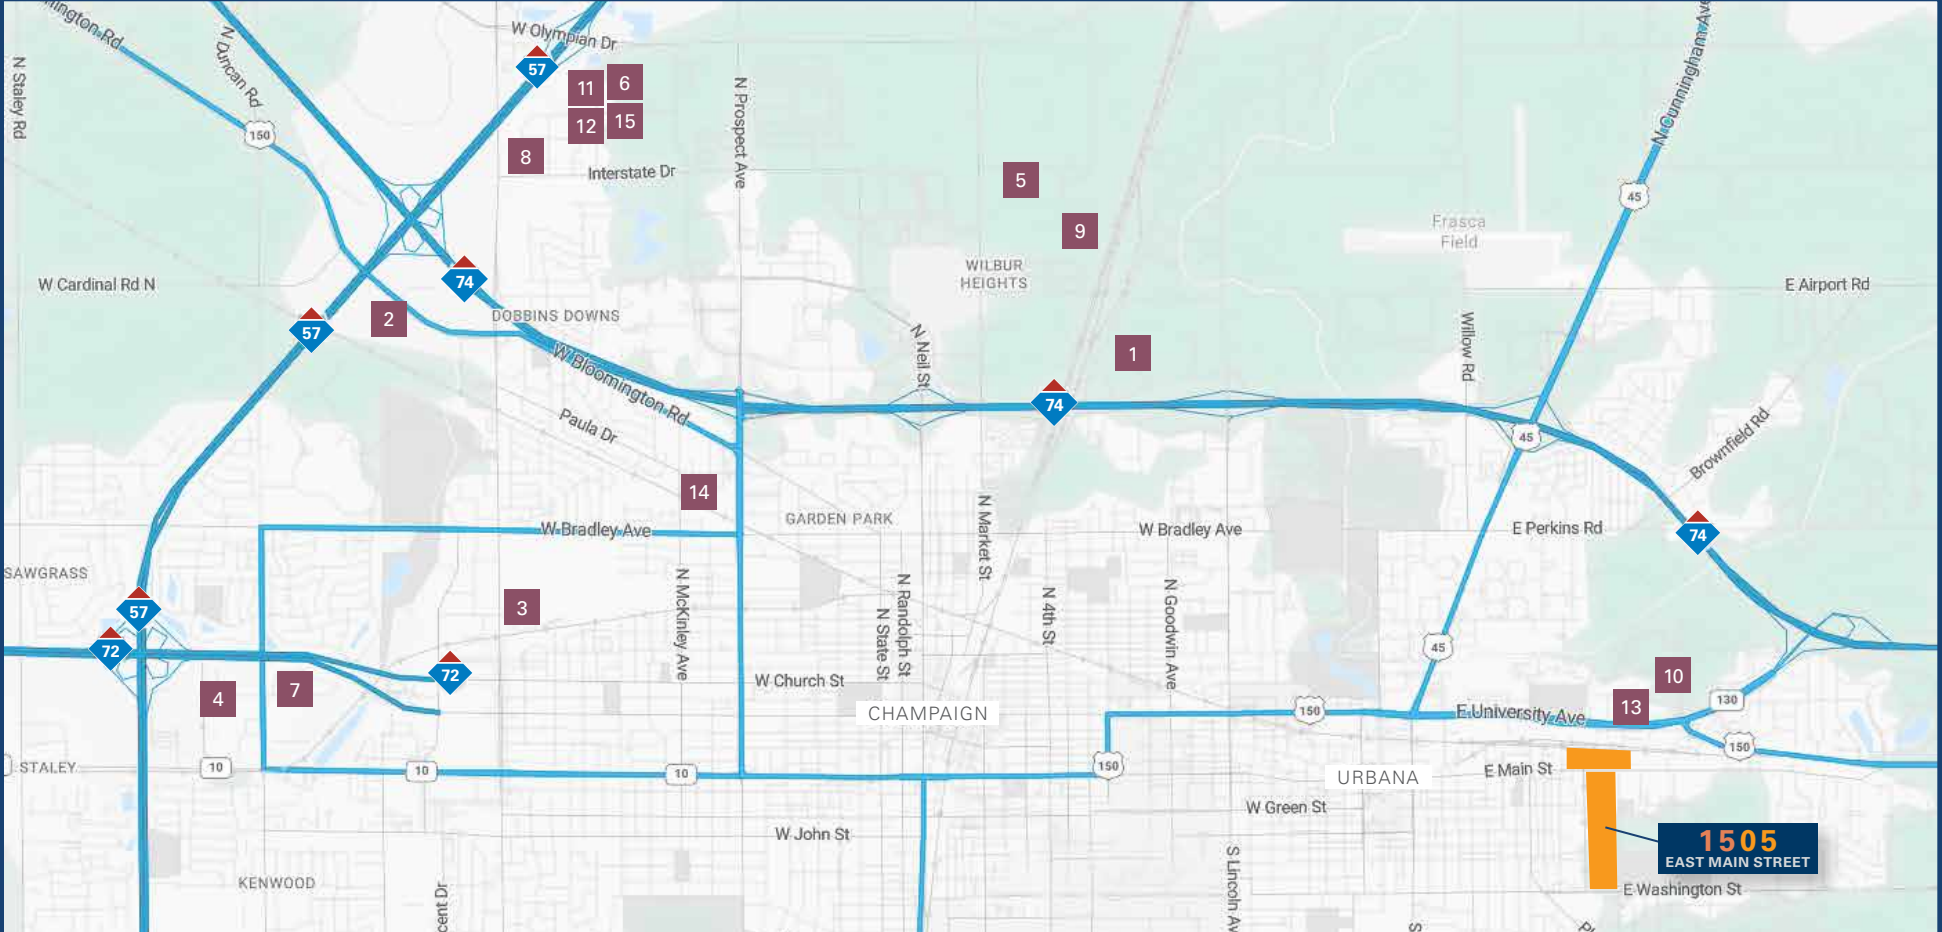

Since its founding in 1867, the University of Illinois Urbana-Champaign has earned a reputation as a world-class leader in research, teaching, and public engagement. Entrepreneurship flows from the classrooms to Research Park, a space that houses everything from Fortune 500 companies to student-founded startups. It is consistently ranked among the top five universities for NSF-funded research and our total annual research funding exceeds \$600 million.
