

Solar-tracking Skylights

Geothermal Heat Pump

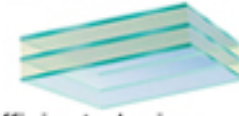

Efficient Lighting

Induction Lamps+Lighting Control

Uses daylight harvesting and occupancy controls to minimize energy use.

Efficient Glazing

Efficient glazing system uses controlled overhang system to keep sunlight out during the summer and in during the winter months.

Super Multi-Blanket Insulation

Super multi-blanket insulation system in factory uses geothermal properties from floor to keep factory cool in the summer and warm in the winter.

Pervious Concrete

Pervious concrete system in parking lot uses special drainage features to deal with run off and storm drain overload.

Innovative Air Distribution System

EverLast® Remote PV/Wind Powered Area Lighting
