

NH CIBOR

Mandatory New Hampshire Real Estate Disclosure & Notification Form

1) NOTIFICATION RADON, ARSSENIC AND LEAD PAINT: Pursuant to RSA 477: 4-a, the SELLER hereby advises the BUYER of the following:

RADON : Radon, the product of decay of radioactive materials in rock, may be found in some areas of New Hampshire. Radon gas may pass into a structure through the ground or through water from a deep well. Testing of the air by a professional certified in radon testing and testing of the water by an accredited laboratory can establish radon's presence and equipment is available to remove it from the air or water.

ARSENIC: Arsenic is a common groundwater contaminant in New Hampshire that occurs at unhealthy levels in well water in many areas of the state. Tests are available to determine whether arsenic is present at unsafe levels, and equipment is available to remove it from water. The buyer is encouraged to consult the New Hampshire department of environmental services private well testing recommendations (www.des.nh.gov) to ensure a safe water supply if the subject property is served by a private well.

LEAD PAINT: Before 1977, paint containing lead may have been used in structures. The presence of flaking lead paint can present a serious health hazard, especially to young children and pregnant women. Tests are available to determine whether lead is present.

NOTIFICATION TO OWNERS, BUYERS, AND TENANTS REGARDING ENVIRONMENTAL MATTERS

It is essential that all parties to real estate transactions be aware of the health, liability, and economic impact of environmental factors on real estate. Broker does not conduct investigations or analyses of environmental matters and, accordingly, urges its clients and/or customers to retain qualified environmental professionals to determine whether hazardous or toxic wastes or substances (such as asbestos, PCBs, and other contaminants or petrochemical products stored in underground tanks), or other undesirable materials or conditions are present at the property and, if so, whether any health danger or other liability exists. Such substances may have been used in the construction or operation of buildings or may be present as a result of previous activities at the property or other properties.

Various laws and regulations have been enacted at the federal, state, and local levels dealing with the use, storage, handling, removal, transport, and disposal of toxic or hazardous wastes and substances. Depending upon past, current, and proposed uses of the property, it may be prudent to retain an environmental expert to conduct a site investigation and/or building inspection. If hazardous or toxic substances exist or are contemplated to be used at the property, special governmental approvals or permits may be required. In addition, the cost of removal and disposal of such materials may be substantial. Consequently, legal counsel and technical experts should be consulted where these substances are or may be present.
