

TO WHOM IT MAY CONCERN

To the best of our abilities and the equipment we have available, the property located at 612 N.E. Front Street in the city of Milford, Delaware is deemed to be clear of military munitions. I apologize for any inconvenience our presence may have caused the parties involved in the disposal of this property, but a 75mm shrapnel round was discovered at the beginning of the driveway leading to the boathouse. Upon our arrival, approximately 300 feet further down the same driveway, we unearthed a 40mm projectile. Because of the first projectile, we carried out a 100 percent investigation of the entire property as well as the open lot next to that driveway where clamshells and stone were laid for truck parking by the previous owner. I thank you for your patience.
