OVERVIEW

Located in the Imperial Valley and irrigated by the Imperial Irrigation District, this predominantly contiguous farm is a rare opportunity to purchase a mature lemon orchard with scale.

This farm's location is at the north end of the east highline canal, which is historically known as a frost-free region that is suitable for winter specialty crops as well as permanent crops. This location is also known for being a low wind area that prevents fruit scarring and produces high quality fruit.

The Imperial Valley is in the southeastern lower desert of California and is a vibrant agriculture region of California. This region is typically known for the abundant and strong water rights of the Imperial Irrigation District, along with its capability to grow a variety of row crops, specialty crops, and permanent crops. The regions infrastructure and labor allow for efficient harvest and shipment of crops for domestic and international markets. Combining the properties attributes of water, size, and location, Beach Line Citrus is an excellent opportunity for investment.

PROPERTY DETAILS

LOCATION	Imperial County Imperial Irrigation District Near the Town of Niland, California
SIZE	±1,661 Gross Acres
PRICE	\$7,999,999
TAXES	\$144,087.23 (2023)

±75 AC	2023 Plantings
±581 AC	Total Lemon Acres
PALMS	
±30 AC	Ornamental Palms
OPEN LAND	
±615 AC	Open Cropland
±240 AC	Undeveloped, District Farmland
±213 AC	Remaining Gross Acres

SOUTHWESTERN PERMANENT CROP ACRES

The southwest desert region of the United States offers a unique opportunity for permanent plantings. With some of the earliest and opportunistic harvest windows in the US, this region allows farmers to participate in markets while no other US food producers are able to harvest.

Traditional permanent plantings include lemons, dates, and an assortment of other citrus varieties that all benefit from low frost risk, low rainfall, early heat units, and plentiful irrigation water. The Beach Line Citrus Farm is a unique opportunity to participate in this market with a location suitable for all traditional permanent plantings while also having the capabilities to grow additional crops.
