About

citizenM hotels are more than just a place to sleep, they are somewhere to work, relax, and play. They offer free wifi, comfortable furniture, and a great bed to crash on at the end of a long day. citizenM's public living rooms don't just cater to overnight guests, but also members of the community looking to get a great coffee or cocktail in an inspiring place.

citizenM started with an idea to disrupt the traditional hotel industry by creating luxury hybrid hotels for today's modern travelers.

citizenM was born out of the frustrations experienced by modern travelers. In response, citizenM designed a new type of hotel based around the needs of these travelers – high design hotels located in incredible locations, but at an affordable price point. In 2008, the first hotel opened in Amsterdam and was named after its target audience – “mobile citizens” or citizenM for short.

citizenM now operates 18 hotels globally from Amsterdam to New York City to Shanghai. There are also 20 hotels under development.
