# West Los Angeles Industrial/Flex Market Overview

The Westside industrial market has undergone a notable shift over the last 10 years, with demand softening due to evolving workplace dynamics and macroeconomic headwinds. Vacancy has climbed to 11.8% as of Q3 2025, driven by reduced business inventories, tariff uncertainty, and the continued prevalence of remote work, particularly impacting flex space, which represents 36% of the submarket's supply.

Despite elevated vacancy, rent declines on the Westside have been more modest compared to the broader Los Angeles market, supported by limited new construction and redevelopment pressure from rising land values in areas like Culver City and Santa Monica. Average asking rents are down 20% from their 2022 peak. In comparison, the South Bay industrial market has declined by 33%, and Central Los Angeles by 28% over the same period.

Industrial & Creative Office Rents have likely hit bottom and are projected to increase in the quarters to come.

# West LA Submarket | Numbers At A Glance Inventory SF 12.6M 12 Mo Net Absorption SF (393K) Market Sale Price/SF \$5.2% Market Cap Rate 5.2%
