NA SunVista] Got Space™

Property]

7777 Jefferson St. NE | Albuquerque, NM 87109

Executive Summary

NAI SunVista is proud to present the premier industrial and office campus located on ±27.88 acres in the Journal Center. The property's central location ensures excellent access to major transportation corridors, making it a strategic hub for distribution, manufacturing, or corporate campus use.

This is the centerpiece of the Journal Center. This expansive property features a total of ±278,677 square feet of improvements, offering a versatile mix of warehouse, office, and service spaces designed to support a wide range of operational needs.

Constructed in two strategic phases—Phase I in 1982 and Phase II in 1986—the campus is equipped with robust infrastructure to accommodate large-scale industrial operations and corporate functions. Key amenities include:

- ±278,677 SF of total building area across multiple structures
- Rail access, enhancing logistical efficiency and connectivity
- Fleet service area, ideal for transportation, maintenance, and logistics operations
- On-site physical plant, supporting utility and infrastructure reliability
- Full-service cafeteria, providing convenient dining for employees
- Dedicated office space, allowing for seamless integration of administrative functions

This offering represents a unique opportunity for owner-users or investors seeking a well-appointed, centrally located campus with long-term functionality and expansion potential.

Physical Plant and Facility Systems

ELECTRICAL

The facility has a 12,470-volt, looped feed service from PNM. That provides redundant power to the site. The high voltage is distributed to two substations. Each substation has 2- 3,200 Amp main circuit breakers and one 3,200 Amp tie circuit breaker for power access from the redundant source.

AIR CONDITIONING

Cooling

The facility utilizes three 150,000-gallon underground water storage tanks to store water that has been chilled during the night to provide cooling to the campus during the day. The water is cooled by a 600-ton York chiller installed in 2016. Cooling water at night takes advantage of the low cost of electricity and the colder temperatures for a cost-efficient cooling system.

Heating

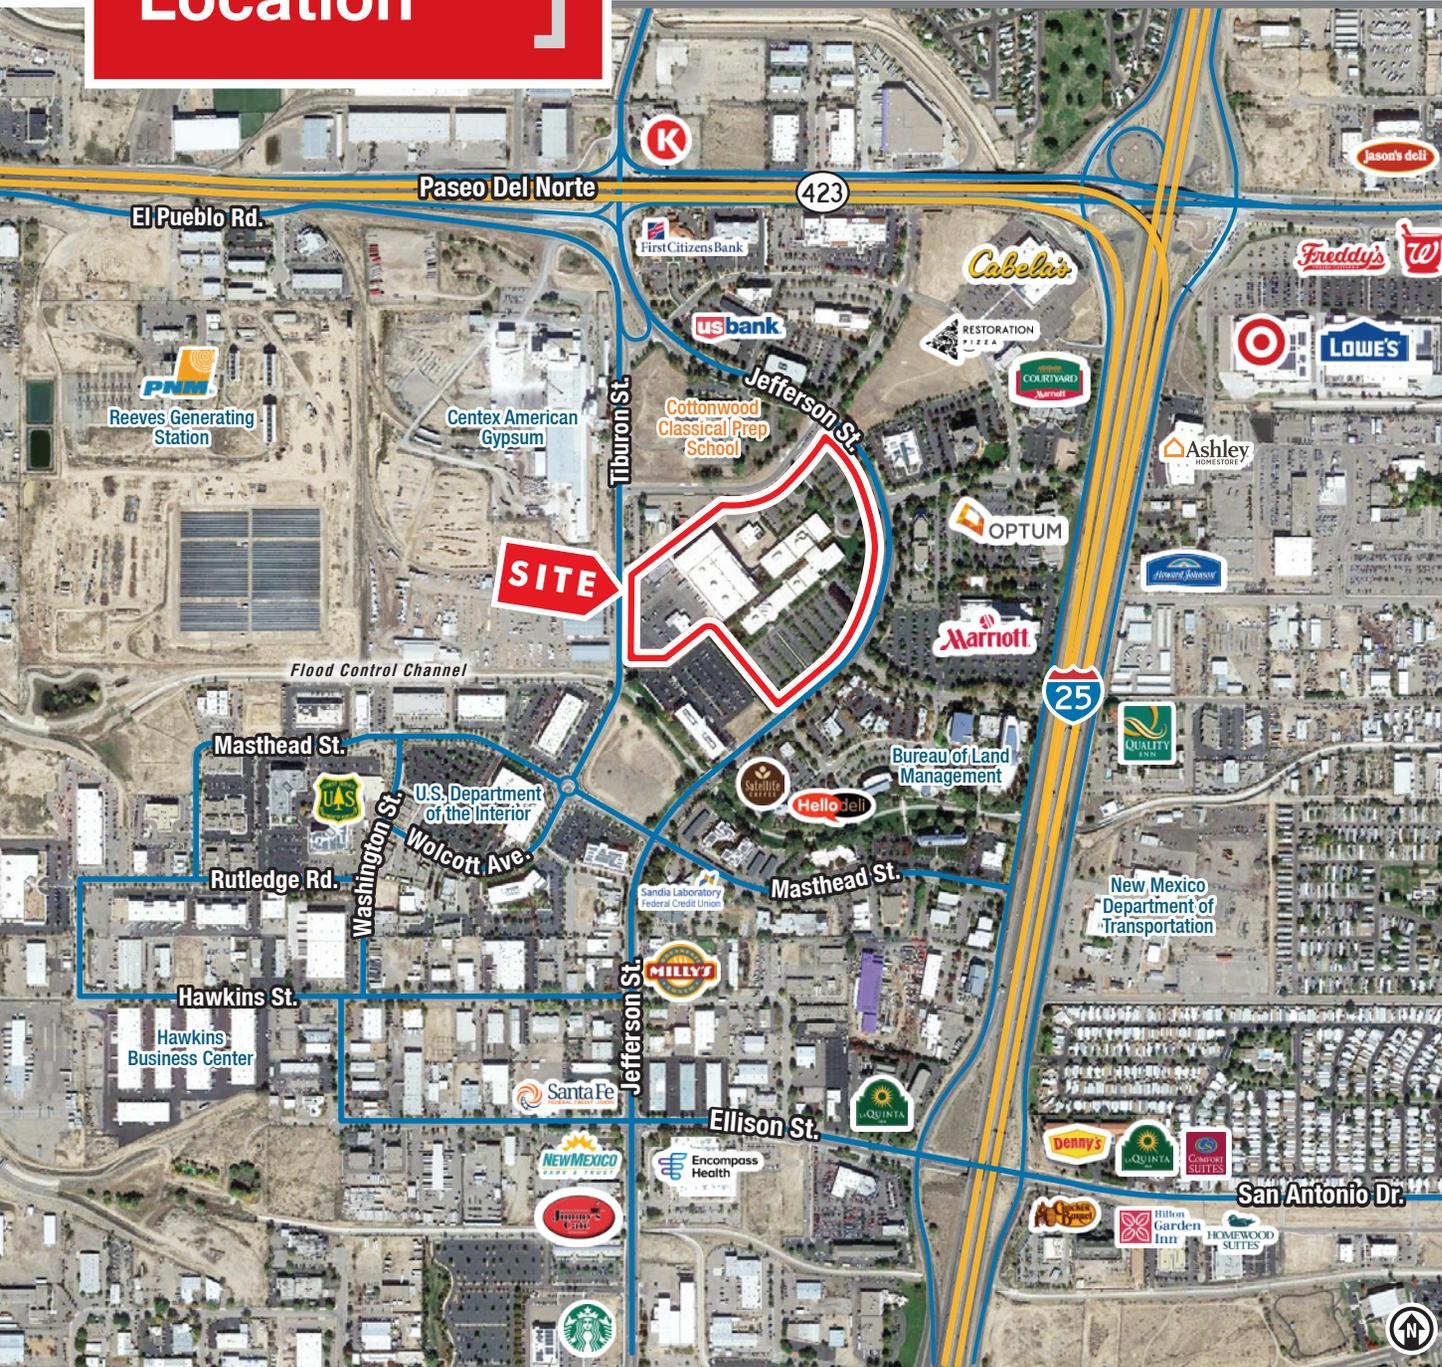

The facility utilizes a 10,000 BTU per hour Rite boiler. It was inspected and upgraded this year (2025) and it was noted that it now has another 20 years of operation.

COMPRESSED AIR

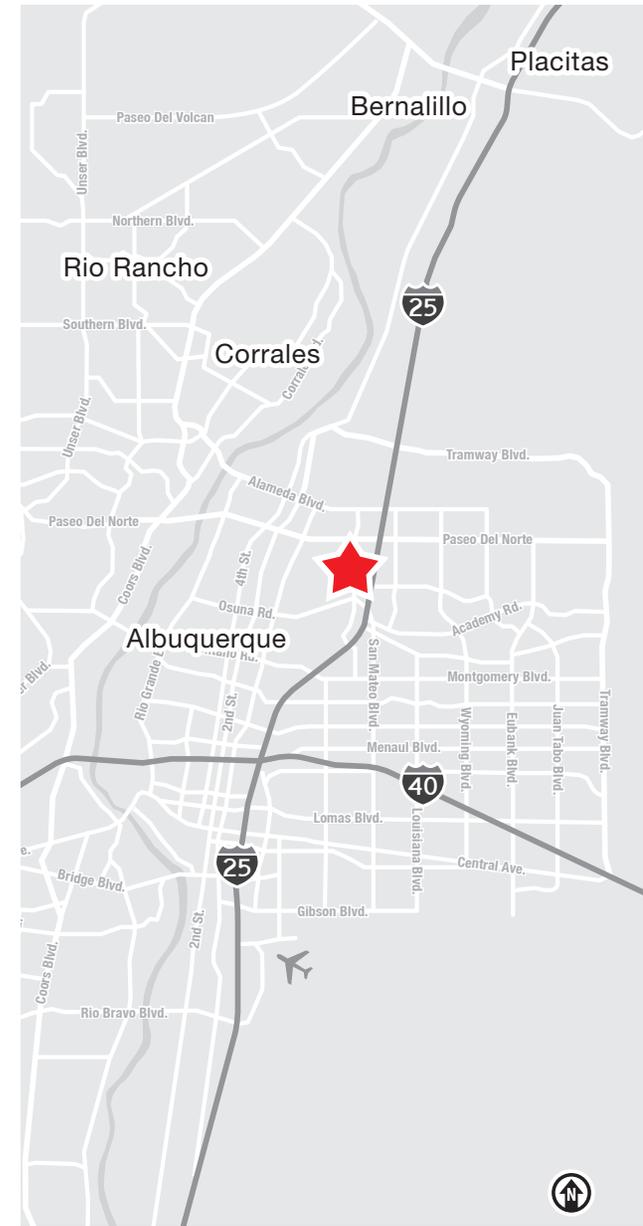

The plant has a primary Quincy 150 air compressor and a backup Quincy 100 air compressor to supply pressurized air throughout the production area.

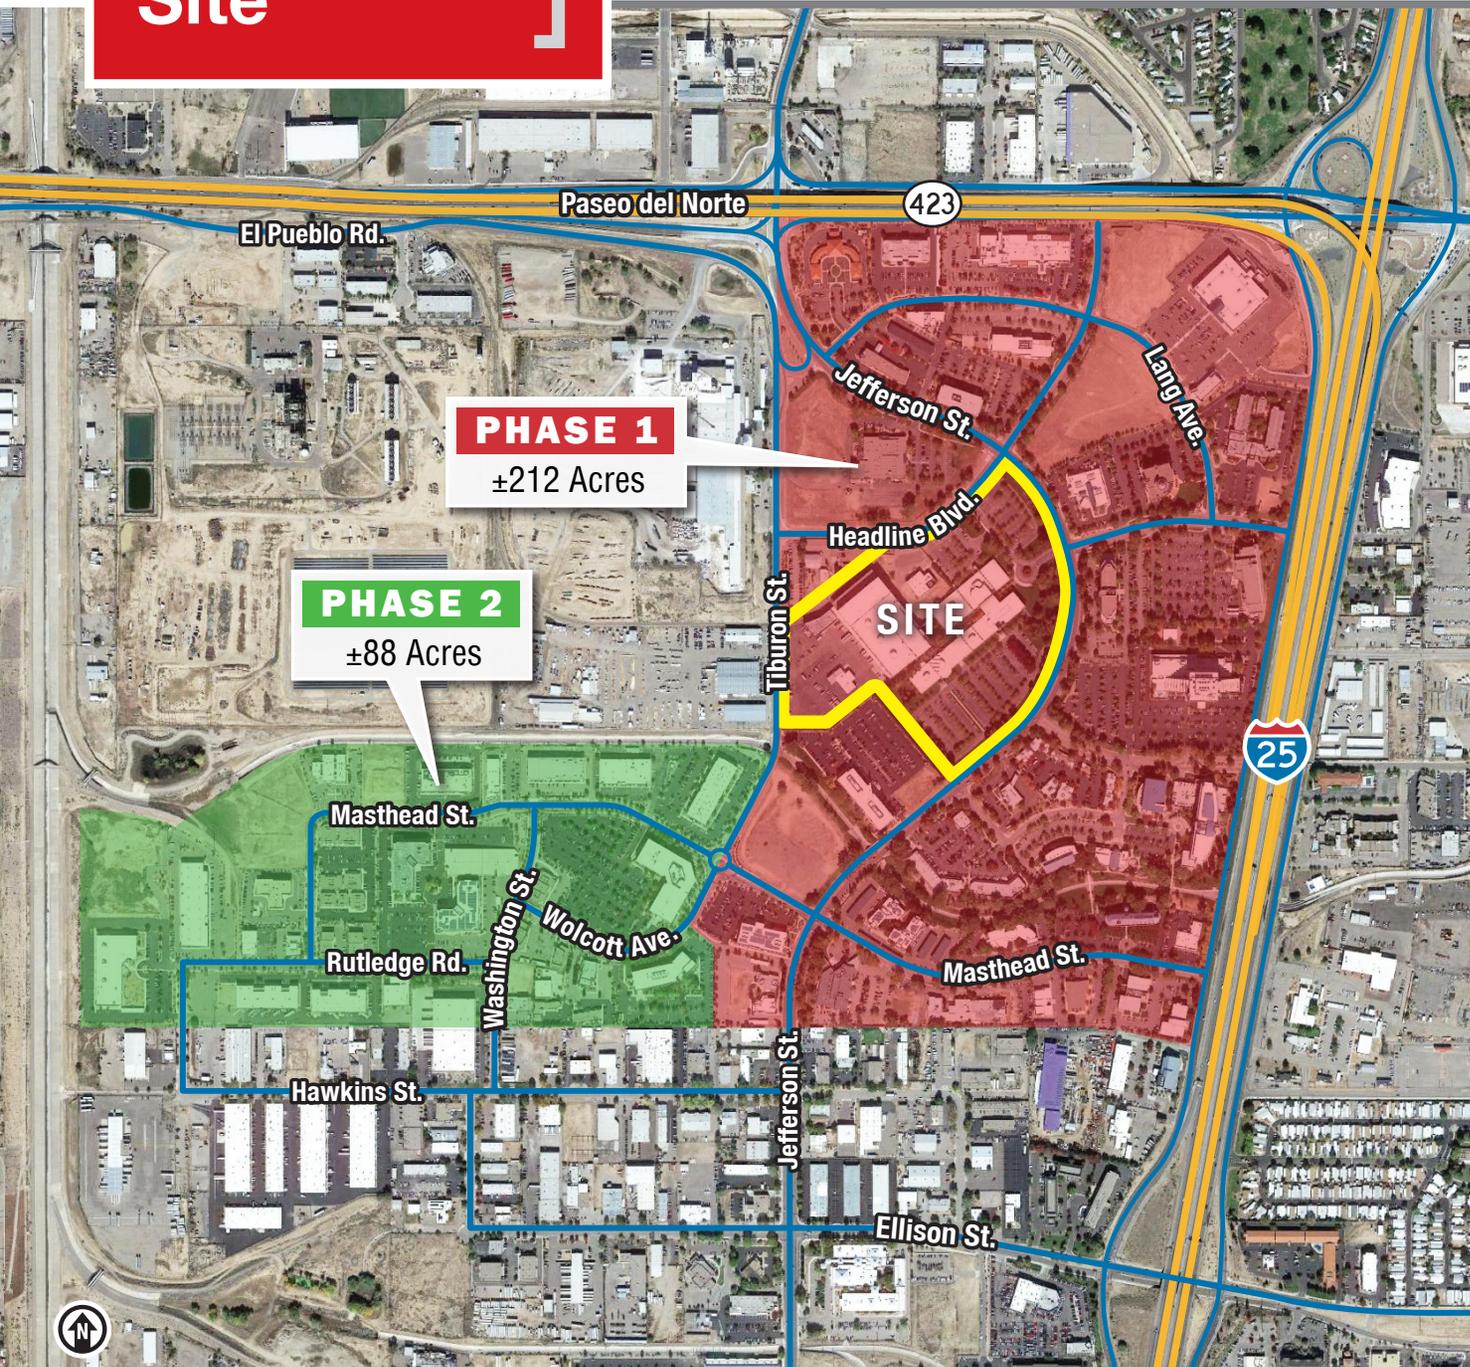

Location

ALBUQUERQUE | NEW MEXICO

Located near the geographic center of New Mexico at the intersection of I-25 and I-40 and resting at the foot of the Sandia Mountains, Albuquerque is the state's most populous city and one of the most livable in the U.S. The city serves as a major transportation and shipping hub for the Southwest, with BNSF Railway, air cargo from Albuquerque International Airport (Sunport), and a commuter train running from Belen to Santa Fe. Albuquerque is home to the International Balloon Fiesta, the world's largest gathering of hot-air balloons. A talented workforce, a business-friendly environment, a community rooted in history and a high quality of life make Albuquerque hard to beat.
