Zoning Capabilities

Current Zoning | LCA-2-1

LCA21, or heavy agricultural zone, is established to permit a comprehensive range of agricultural uses in areas particularly suited for agricultural activities.

Permitted uses are intended to encourage agricultural activities and other such uses required for, or desired by, the inhabitants of the community. An area so zoned may provide the land necessary to permit low-density single-family residential development, outdoor recreational uses, and public and institutional facilities.

Potential Zoning | LAM-1 | What We've Done

Several discussions and meetings have been completed by the ownership to convert a portion of the Site to Light Industrial M-1. It appears that approximately 8.5 acres of usable land can be created and developed.

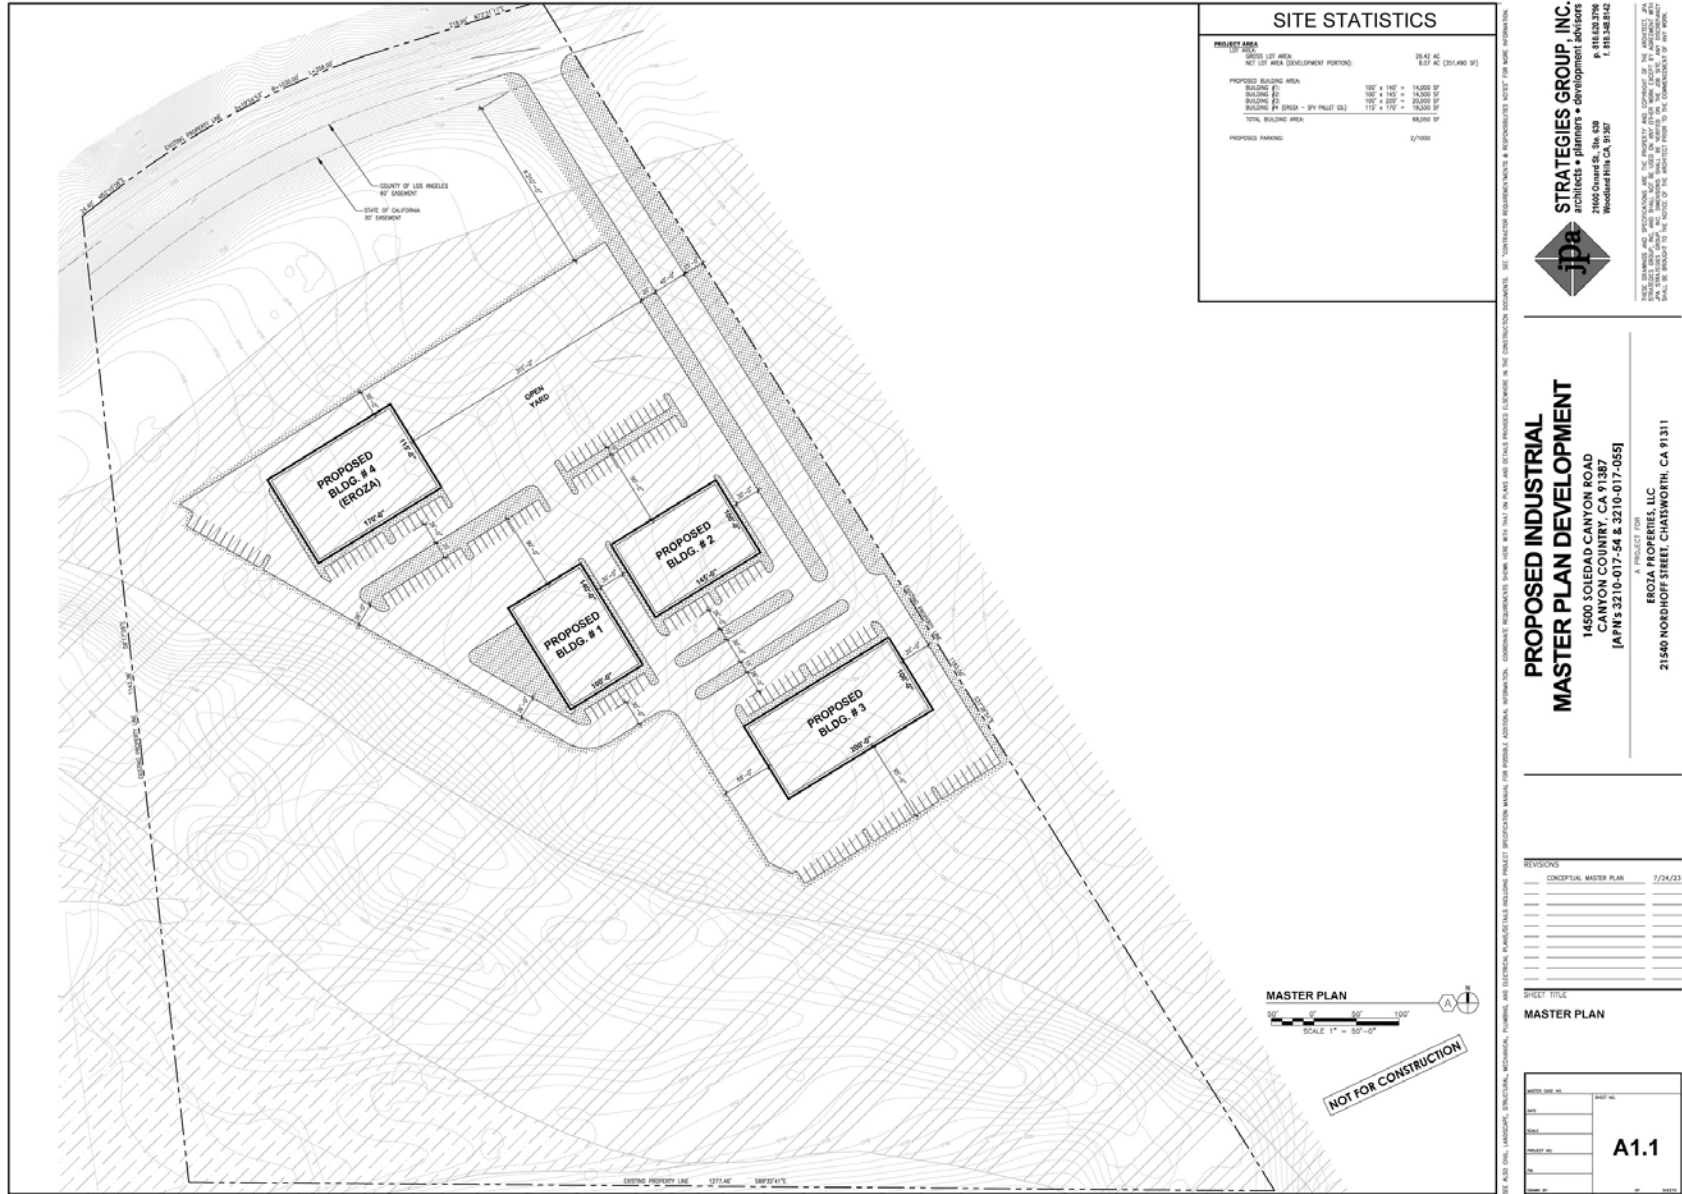

The current property owner has met with County officials and presented a proposed site plan (see next page) for development that, while not approved, was not rejected by the county.

County zoning shows several neighboring properties to be “M-1 Industrial” and a Nexus can be made to allow for the zone change. The Site is not impacted by residential uses and surrounded by Industrial and land buffers to make the connection in allowing the use.

Please conduct your own investigations and do not rely on these statements. Seller will provide all contacts, maps, and professionals used to establish their proposed site plan to the successful buyer.
