ZONING INFORMATION

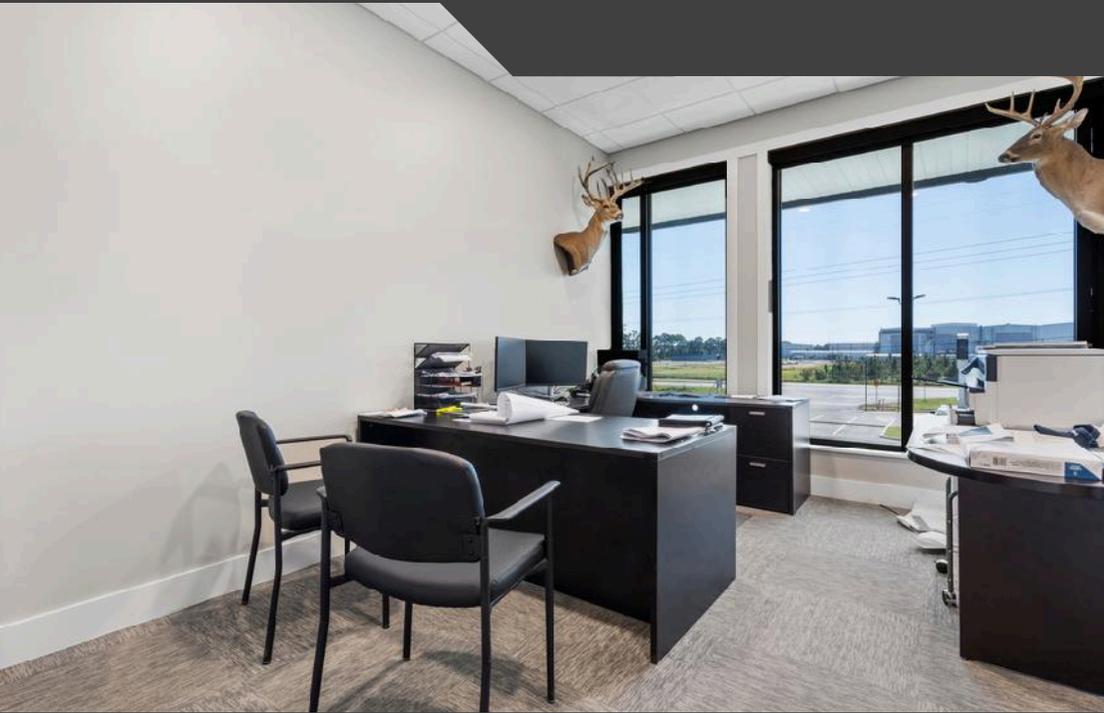

I 2 - HEAVY INDUSTRY DISTRICT

These districts are composed of land and structures occupied by or suitable for heavy manufacturing and related activities. Located for convenient access from existing and future arterial thoroughfares, highways, railway lines or waterways, these districts are usually separated from residential areas by business or light industry areas or by natural barriers; where they are adjacent to residential areas some type of artificial separation may be required. The district regulations are designed to permit the development of the districts for their purpose, including almost any industrial uses but subject to conditions necessary for the mutual protection of the uses and the city generally.
