

42-35. Regional Commercial District (RC)

- A. Purpose. The purpose of the Regional Commercial District (RC) is to foster orderly growth where the principal use of land is commercial. The intent of this district is to allow for commercial development consistent with the recommendations of the Comprehensive Plan. In accordance with the Comprehensive Plan, the district will allow for and provide commercial development that: (1) includes a variety of retail sales and services, public and private administrations, offices and all other uses done primarily for sale or profit on the local, community, and regional level; (2) is directed largely to Community Service Centers as defined in the Comprehensive Plan; (3) is compatible with adjacent development and the surrounding community; and (4) will minimize congestion and sprawl. This general use district is meant to be utilized in areas designated as Urban (USA) in the Comprehensive Plan.
- B. Density and Dimensional Requirements. Each use allowed in this district shall at a minimum conform to the following requirements (in the case of a nonresidential use the residential density requirements shall not apply). In some cases a specific use may be required to meet the Supplemental Requirements as set forth in §42-62 (Supplemental Requirements).

(1) Residential Density (units/acre)		16	
Maximum Impervious Surface (%)		80	
Maximum Floor Area (sq ft)		Unlimited	
Yard Setbacks (feet)	Front or ROW	Local	10
		Collector	10
		Thoroughfare	20
		Boulevard	30
		Expressway	40
		Freeway	45
	Side	10	
	Rear	10	
Maximum Height (feet)		50	

1. Residential density shall be calculated utilizing the entire acreage of a tract of land. Under this scenario, residential density shall be determined based on the following formula:

$$\text{Lot size} \times \text{allowable units per acre} = \text{permitted dwelling units}$$

The following example assumes a 5 acre tract with an allowable density of 16 units/acre:

$$5 \text{ acres} \times 16 \text{ units per acre} = \mathbf{80 \text{ permitted dwelling units}}$$

The maximum residential density for portions of the tract with a slope of 60 percent or greater (where such slope areas of the tract account for ten (10) percent or more of the tract) shall be one-half (½) the eligible density.

2. Accessory structures may be located in the side, rear or front yards and may be setback a minimum of five (5) feet from the side or rear property lines and ten (10) feet from the front or Right of Way (ROW).
3. Conditional Rezoning Requirement. Developments proposing to have ten (10) or more multifamily dwellings shall apply as a conditional rezoning. Subdivisions proposing to cluster the dwelling units on fifty percent (50%) or less of the total project area used to calculate the allowed density, must apply as a conditional
