Zoning Description

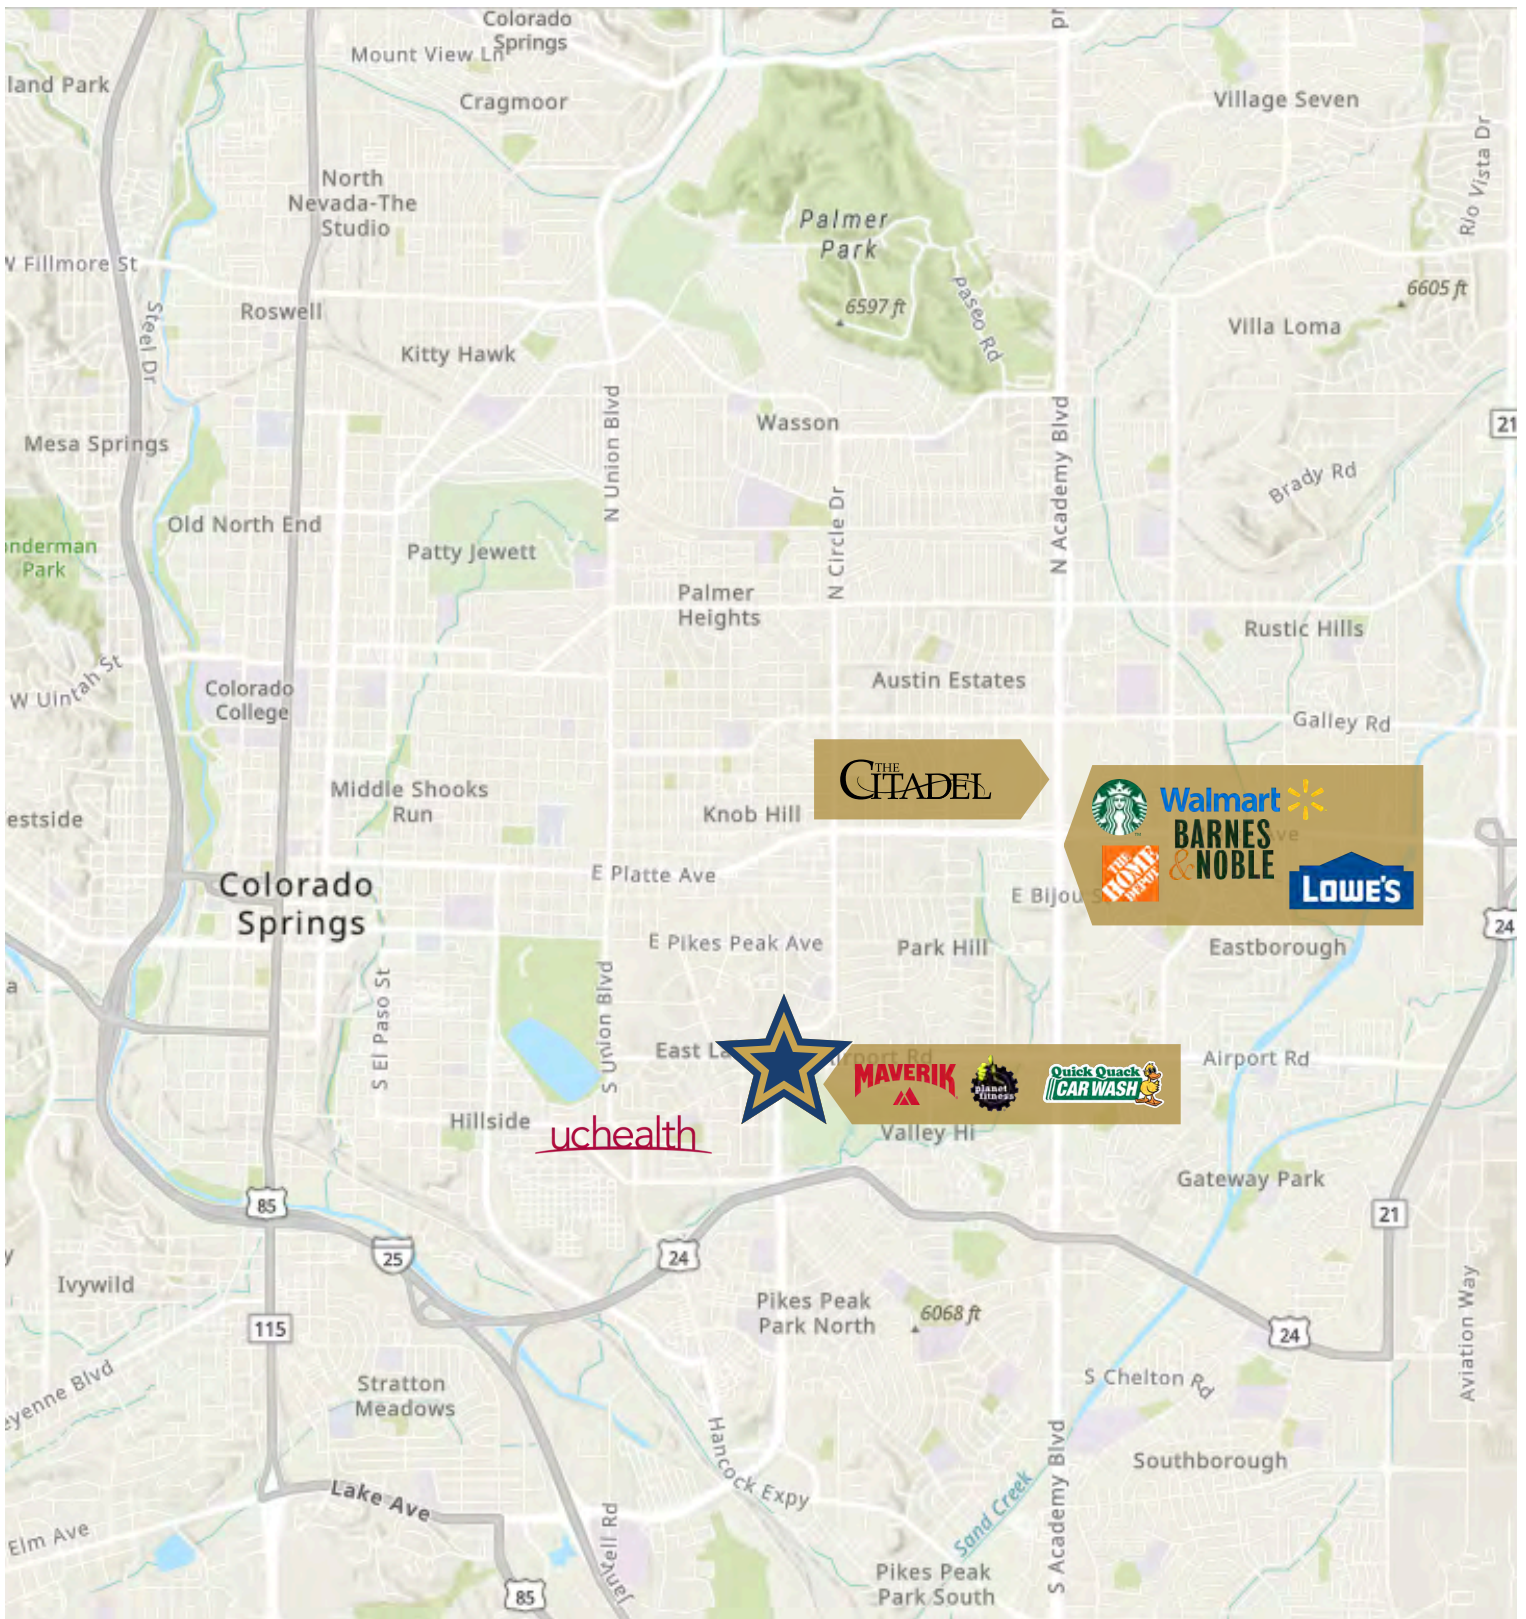

MX-M zone districts are intended to accommodate the development of new activity centers in emerging growth areas, as well as to promote the adaptive reuse or redevelopment of single-use commercial centers that are vacant or underused, or of other obsolete buildings or properties. Activities and uses within MX-M zone districts may be horizontally or vertically mixed based on their density and intensity but should be organized in a compact pattern that promotes pedestrian activity, provides a variety of outdoor gathering spaces, supports multimodal access and circulation, and minimizes impacts on established residential neighborhoods. Permitted uses can be found [here](#).

The Airport Overlay is used to comply with Federal Aviation Administration rules and regulations; to protect public health, safety, and welfare; and to provide for the free and unobstructed passage of all aircraft through all airspace above communities served by airports.
