This document provides an estimate of the potential range of tax deferral benefits you could anticipate from having a Cost Segregation Study conducted on the listed subject property. This document should not be relied upon as specific tax guidance. The percentages used to illustrate the post CSS classifications are general in nature and do not represent the exact benefits for the subject property. Calculations for additional tax deferral and net present value are based on the assumptions listed on page one. These estimated results highlight a conservative summary of the results that this property could anticipate reclassifying with the assistance of a Cost Segregation Study.
