DOWNTOWN FORT WORTH DEVELOPMENT ACTIVITY

LanCarteCRE.com

DOWNTOWN FORT WORTH DEVELOPMENT

1000 Harding Street is located in the heart of over \$2.3B in planned development projects in and around the Central Business District of Fort Worth, TX. The development activity, which includes over 2,900 residential units, is anchored by the new Texas A&M Fort Worth campus directly to the west, the expansion of the Fort Worth convention center, and the planned redevelopment of Butler Place – all within walking distance. The property also benefits from the DFW High-Speed rail line that is planned for Downtown Fort Worth. This prime urban infill site is perfectly positioned for redevelopment within the shadows of one of the fastest growing metro areas in the country. 1000 Harding Street is truly at the center of it all!

- 1 BUTLER PLACE REDEVELOPMENT
- 2 TEXAS A&M FORT WORTH CAMPUS PROJECT
- 3 FORT WORTH CONVENTION CENTER EXPANSION

TEXAS A&M - FORT WORTH CAMPUS

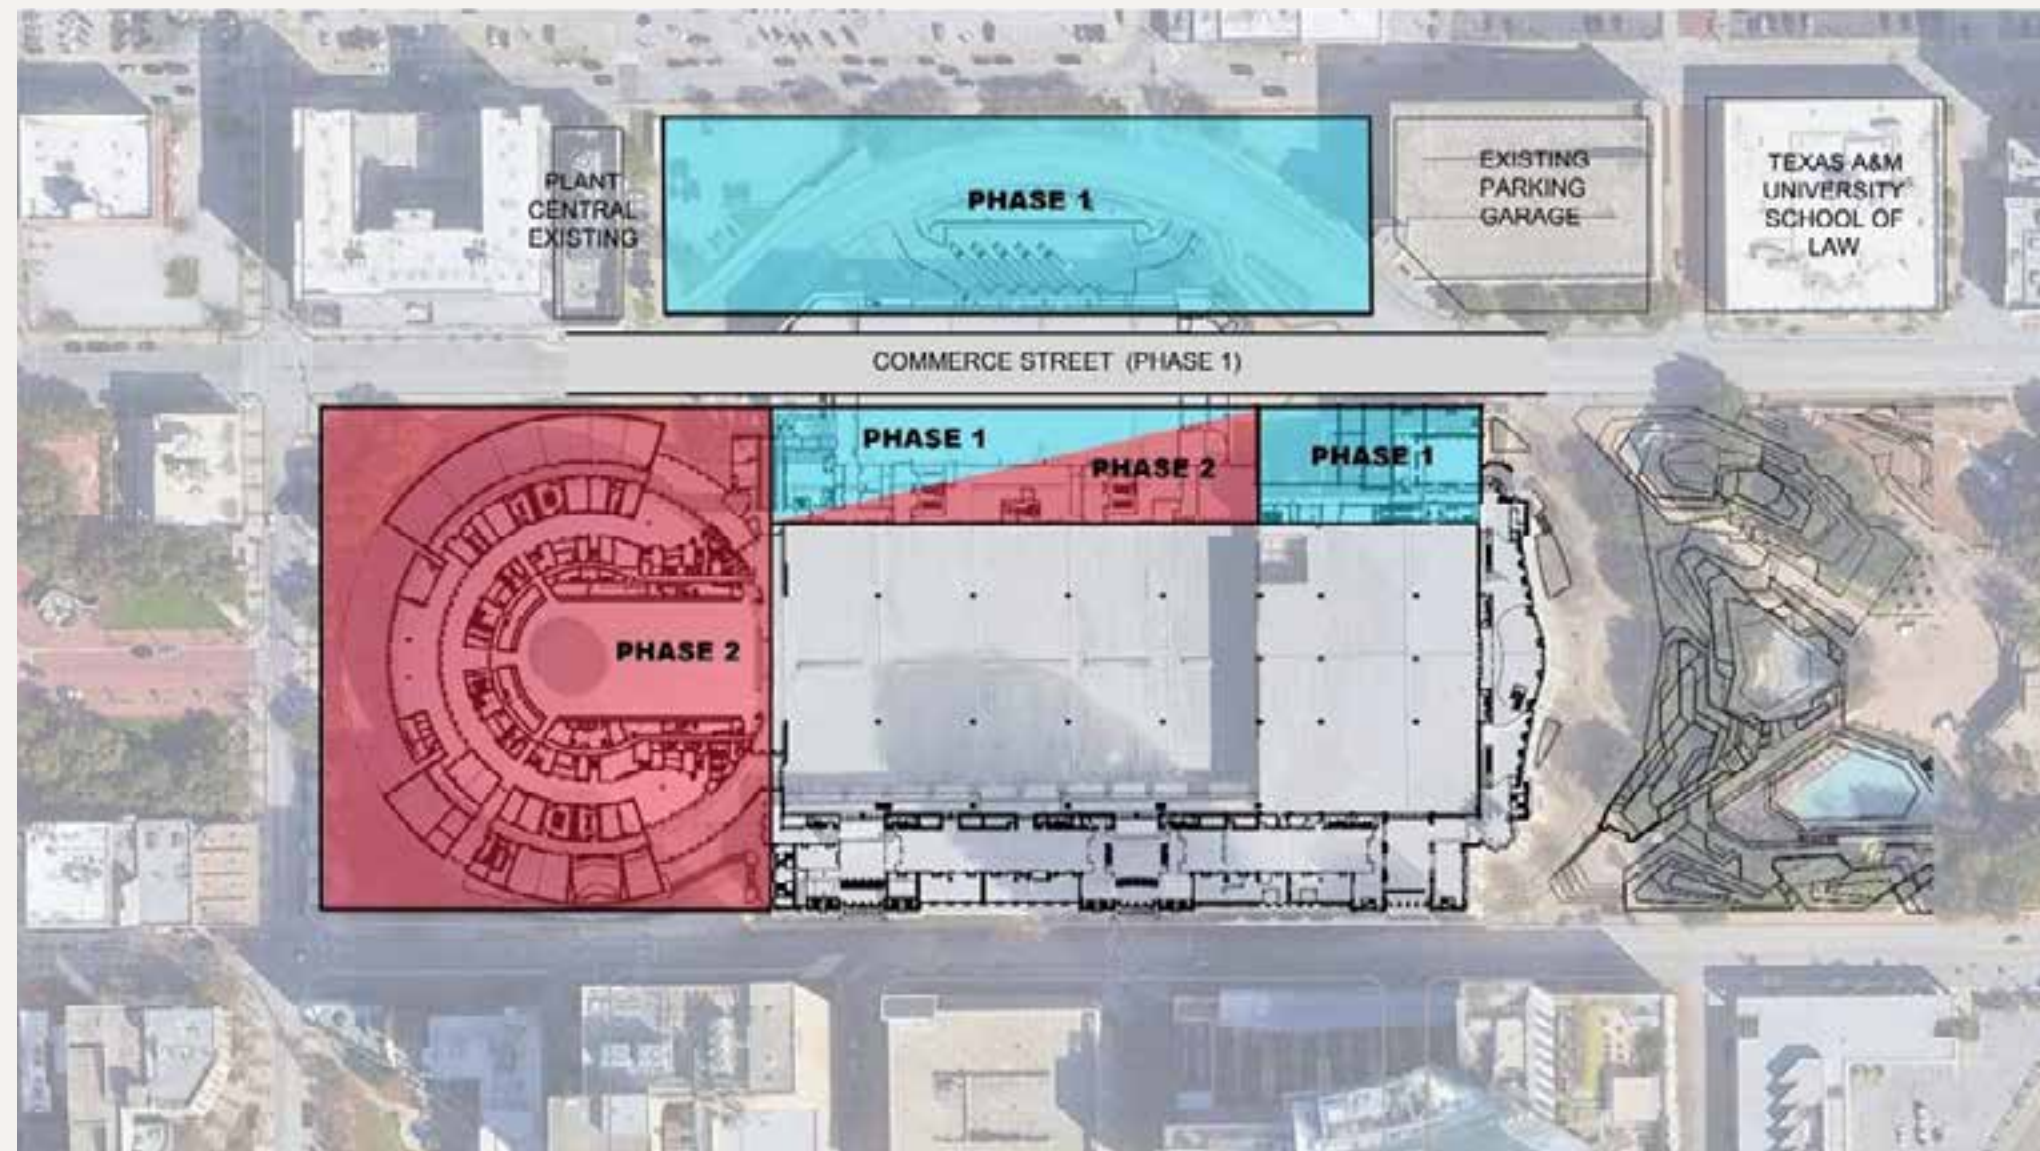

“The A&M Campus will serve as an anchor that will inspire commitment to the more residential properties in the area.” Andy Taft, President of Downtown Fort Worth.

- The 3.54-acre campus will be comprised of three buildings on four blocks at the site of the Texas A&M School of Law at the south end of downtown.
- The Texas A&M System is building a nine-story, \$150 million Law & Education Building on the campus to be completed in 2025

DFW HIGH SPEED RAIL

The proposed highspeed rail project that will run between Fort Worth and Dallas has now entered Phase 2. Phase 2 consists of a two-year environmental study with the focus of highway route alignment and 6 potential station locations surrounding 1000 Harding. During phase 1 the committee decided on the corridor alignment which includes a stop at Globe Life Field, the home of the Texas Rangers. With the possibility to now travel from Downtown Fort Worth to Arlington and The North Central Texas Council of Governments initiated the DFW High-Speed transportation Connections Study in the spring of 2020 to evaluate high-speed transportation between Dallas and Fort Worth, with a goal of connecting to other proposed high-performance passenger

Phase 2 stated July 8 2021, the federal environmental approval process (The High-Speed Rail technology will be evaluated over the next two years + the team will study the potential environmental effects on everything from air quality to noise pollution, wetlands, wildlife, and water crossings.)

The location of the Dallas station has already been confirmed, as the team looks to tie into the planned Texas Central station (Trinity Metro's existing Central Station appears to be the first priority for the Downtown Fort Worth station, according to a study completed by NCTCOG.)
