Industrial (I)

The purpose of the industrial classifications is to provide areas for a range of industrial and employment uses which promote a diverse tax base, encourage economic vitality, and support at place employment. Retail/retail service uses may be located to support the needs of those employed within the greater industrial area. Within an industrial designated area, the more intense uses should be located in the core of the area and transition to less intense uses at the periphery. Data centers and distribution and fulfillment centers are discouraged in I-T2.
