Property overview

Introducing Clarius Park Morris, a 497-acre high impact industrial park in Morris, Illinois, expandable to 784 acres. This project is now **one of eighteen sites in the country** to receive the [CSX Select Site status](#).

Located off of the full interchange at I-80 and Brisbin Road, just west of the I-80 / I-55 intersection, the park is perfectly situated amongst established industrial development. A preferred location for both regional distribution centers and companies that are servicing Metropolitan Chicagoland, the region is a heavily traveled corridor that offers easy east/west access while connecting to other major north/south expressways including I-39, I-55 and I-57.

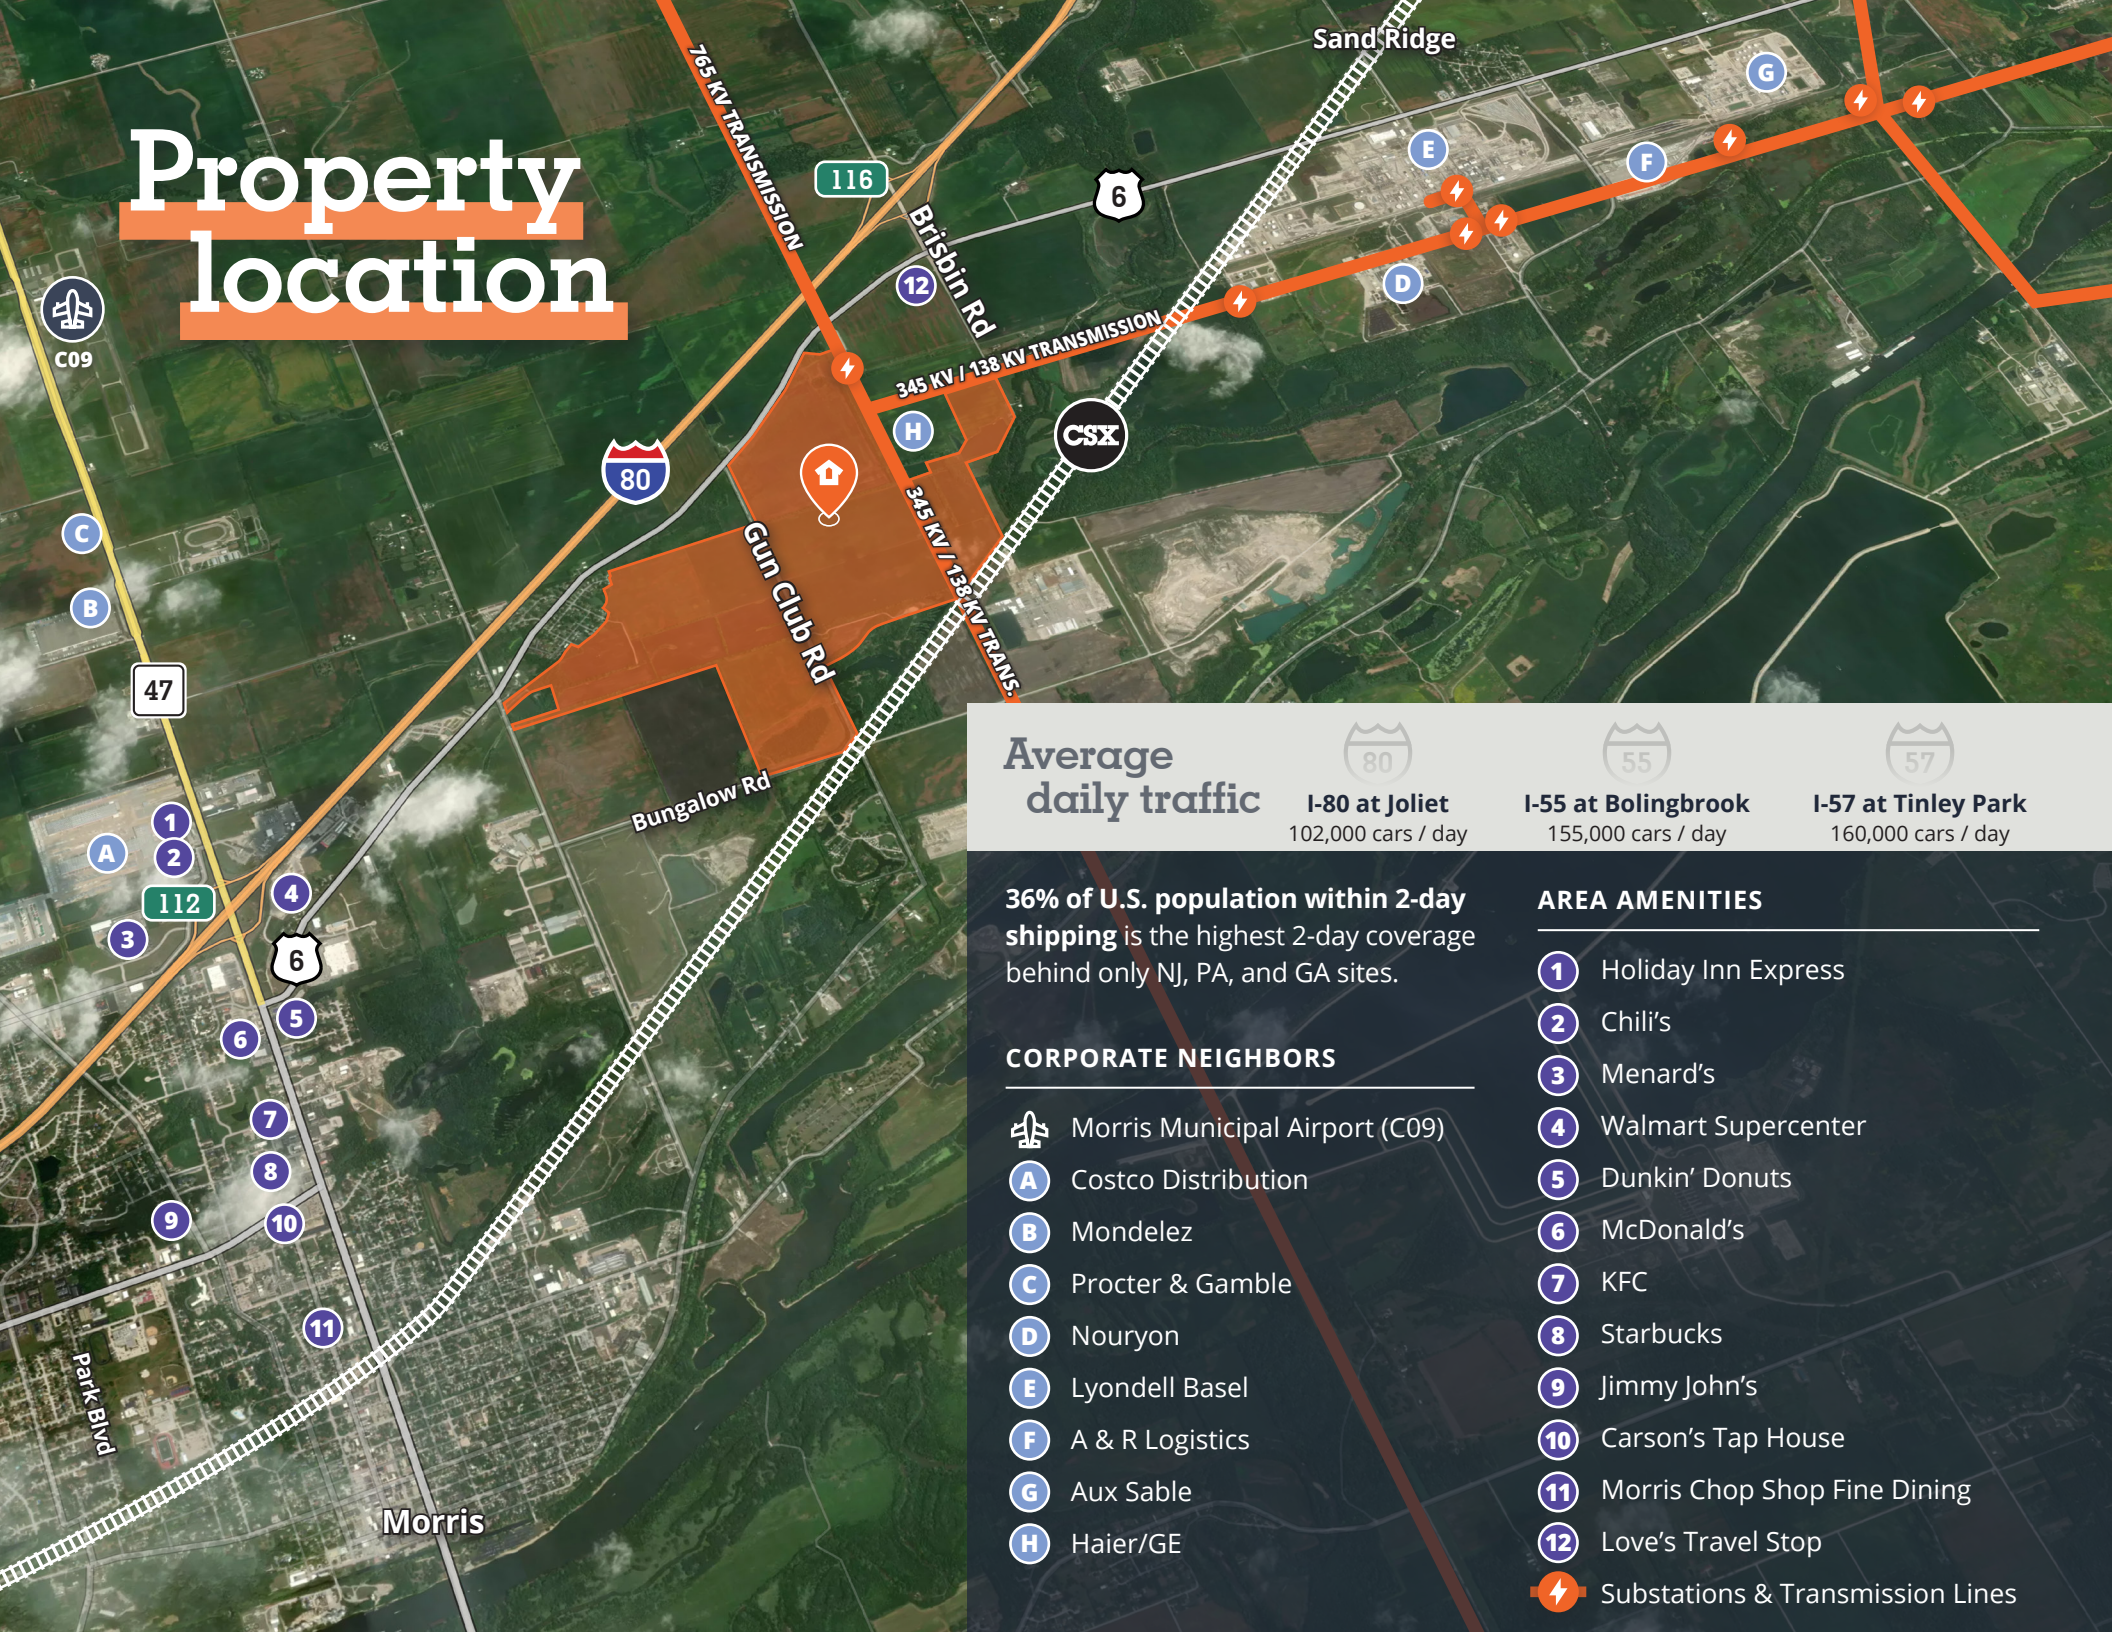

The site is also an ideal location for **potential large scale manufacturing uses, data centers, clean energy supporting uses, and more**. Most of the activity in the I-80 corridor is related to bulk distribution, but the park will offer almost **infinite flexibility** with buildings, something that no other site in the market can offer. In addition to direct expressway access, flexibility on size and potential rail, the park will also allow for above standard trailer or vehicle parking requirements.

Clarius Park Morris benefits from **multiple fiber providers**. This redundancy, together with the **high capacity for power**, may also attract data centers.

Just 2.5 miles west of Clarius Park Morris, at Route 47 and Interstate 80, is the Morris Airport and Hospital, hotels including Holiday Inn Express, Days Inn, Comfort Inn, Quality Inns and Express 8, as well as fast food restaurants such as McDonald's, Wendy's, Buffalo Wild Wings and IHOP There are travel stops including Pilot and Travel America and retail centers such as Walmart and Menards, to name a few.
