# Ottawa Lake Schnipke Drive

All existing facility locations are approximate and are not to be used for construction purposes.

Always contact MISS DIG 811 before you dig.

#### Distribution System

- Predicted reliability of up to 99.98% for 7.2/12.47 kV system.
- The distribution system is located adjacent to the site.
- Current available capacity is 0.85 MW. Additional capacity may be available with system upgrades.

#### 46 kV System

- Predicted reliability of up to 99.993%. The predicted reliability percentage represents the estimated amount of time the facility is in service.
- The 46 kV system is located approximately 1 mile away.
- Facilities will be sized to meet the energy needs of the customer and available system capacity determined at the time of a specific request.

### 138 kV System

- Predicted reliability of up to 99.995%. The predicted reliability percentage represents the estimated amount of time the facility is in service.
- The 138 kV system is located approximately 5 miles away.
- Facilities will be sized to meet the energy needs of the customer and available system capacity determined at the time of a specific request.
