10-16-1: PURPOSE: The Highway District includes the area adjacent to Highways 101 and 126. Highway frontage is recognized as an item of major concern that needs individual attention in order to serve the public interest and deal with its special nature and character. The principal concerns are:

- A. The need to create an attractive community appearance.
- B. The need to restrain the linear pattern of commercial development.
- C. The need to provide for a safe, efficient traffic flow with minimum congestion.
- D. The need to provide adequate area for new commercial, limited industrial and multiple-family development.
- E. The need to recognize that a pattern of land valuation and subsequent taxation has evolved over many years which has anticipated a high intensity of use.
- F. The need to recognize that there are activities and uses whose survival is dependent upon highway access and visibility.
- G. To recognize the pre-existing development pattern of highway property and to insure it has continued use and value whenever possible and consistent with other concerns.

These concerns are addressed in the Highway District with a multiple use concept that can enlist the personal and financial energies of a broad diversity of interests. The multiple use concept requires careful restraint and employs a design review procedure that encourages highway enterprises to blend harmoniously with the scenic and aesthetic features at the entrances to the City.

It is intended that the economic potential of this District should be developed, but in a manner than enhances our coastal village atmosphere and is consistent with the Florence Comprehensive Plan. (Ord. 625, 6-30-80)

10-16-2: PERMITTED BUILDINGS AND USES:

The following uses shall be permitted only upon affirmative findings by the Planning Commission that the proposed use meets the general criteria in Section 10-16-4 herein.

- C. The location of the site can accommodate energy efficient traffic circulation routes.
- D. The vehicle and pedestrian access to the site can be safely and efficiently provided.
- E. The necessary utility systems and public facilities are available with sufficient capacity.
- F. Limited industrial uses shall be reviewed for compatibility with neighboring uses in terms of noise, odor, smoke, glare, use of outdoor space for materials' storage, general exterior finish and landscaping. Where the proposed use is adjacent to an established or planned multiple-family use, these criteria will be applied more strictly.
