Environmental Professional Statement

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in 40 C.F.R. § 312.10. I have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the Subject Property. I have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 C.F.R. § 312.

EXECUTIVE SUMMARY

Cash Waggner & Associates, PC completed a Phase I Environmental Site Assessment (ESA) for the property located at 207 and 211 S. Green River Road, Evansville, Vanderburgh County, Indiana 47715, herein referred to as the "Subject Property". The Subject Property consists of two (2) parcels totaling approximately 0.68 acres and is currently undeveloped. The Subject Property is situated in an urban area on the east side of Evansville and is bordered by S. Green River Road and E. Sycamore Street. Land uses surrounding the Subject Property are generally commercial and residential.

The Subject Property has historically been utilized as a dental office since the first building was erected in the late 1960s. Prior to the 1960s, the Subject Property was undeveloped/agricultural land. The most recent building, which served as Steven W. Fischer DDS and Green River Family Dentistry until approximately 2020, was demolished in 2023.

CWA has performed this Phase I ESA of the Subject Property in conformance with the scope and limitations of ASTM Standard Practice E1527-21. Any exceptions to, or deletions from, this practice are described in Section 2.0 of this report. **This assessment has revealed no evidence of *a recognized environmental condition* (REC), *controlled recognized environmental condition* (CREC), or *historical recognized environmental condition* (HREC) in connection with the Subject Property**.

Recommendations
Based on information collected from the Phase I ESA, no further investigation appears warranted at the Subject Property at this time.

1.0 INTRODUCTION

This report presents the methodology and findings of a Phase I Environmental Site Assessment (ESA) completed for Hira, Inc. by Cash Waggner & Associates, PC (CWA) for the Vacant Lot (Subject Property) located at 207 and 211 S. Green River Road in Evansville, Vanderburgh County, Indiana 47715.

1.1 Purpose

The purpose of this Phase I ESA was to identify *recognized environmental condition*s (RECs), *controlled recognized environmental conditions* (CRECs) and *historical recognized environmental conditions* (HRECs) in connection with the Subject Property at the time of the site reconnaissance, including conditions related to current and historic operations within the Subject Property and surrounding area. This report documents the findings, opinions and conclusions of the Phase I ESA.

1.2 Scope of Services

This Phase I ESA was conducted in accordance with the ASTM Standard Practice E1527-21, consistent with a level of care and skill ordinarily practiced by the environmental consulting profession. Significant additions or exceptions to ASTM Standard Practice E1527-21 are noted below or in the applicable sections of this report. The scope of work associated with this Phase I ESA includes the following items:

- Physical setting characteristics of the Subject Property including a review of available geologic data and mapping, USGS Topographic Maps, soil surveys, and hydrogeologic data and reports.
- Evaluation of the historical use of the Subject Property, adjoining properties and surrounding area through a review of referenced historical sources such as aerial photographs, fire insurance maps, city directories, title records, tax records, prior reports, and interviews.
- Observations and interviews regarding current Subject Property usage and conditions including: the use, treatment, storage, disposal or generation of hazardous substances, petroleum products, hazardous wastes, nonhazardous solid wastes and wastewater.
- A review of available regulatory information in referenced environmental agency databases and local environmental records, within the specified approximate minimum search distance from the Subject Property.
- Supplemental agency file review including the research of available information from online or published resources pertaining to facilities located on or near the Subject Property.
- Potential for subsurface vapor migration in, on or at the Subject Property as described in Section 7.0.
- A search for environmental liens and activity and use limitations (AULs) on the Subject Property dating back to at least 1980.

1.3 Significant Assumptions

No significant assumptions were made by the *Environmental Professional* regarding *REC* determinations for the Subject Property in this report.

1.4 Significant Data Gaps

Data gaps may have been encountered during the performance of this Phase I ESA and are discussed in applicable sections of the report. However, no *significant data gaps* were identified in this report.

1.5 User Reliance

The information contained in this report was prepared for Hira, Inc., and is intended for their sole use. Only the parties noted above may rely on the information contained within this Phase I ESA report unless otherwise provided by CWA in writing. Written consent is required to release any or all information contained in this report to other users. The scope of the services performed in this Phase I ESA might not be appropriate to satisfy the needs of other users; and, any use or reuse of this document without prior written consent is at the sole risk of said user. Any authorized third party agrees by accepting this report that any use or reliance on this report shall be limited by the exceptions and limitations in this report, and with the acknowledgement that actual site conditions may change with time, and that unforeseen conditions may exist at the Subject Property that were not discovered within the authorized scope of the Phase I ESA.

1.6 Limitations and Exceptions

CWA's conclusions and recommendations presented in this report are professional opinions based upon observations made during the site reconnaissance and information obtained for this report. The information presented in this report was compiled and evaluated using generally accepted environmental assessment practices. The information and conclusions are intended exclusively for the purpose outlined herein. CWA has reviewed the available information for the Subject Property and will not be responsible for conditions arising from concealed, missing, withheld, or incorrect information. In accordance with the ASTM Standard Practice E1527-21, the required review of standard historical sources is conducted at five-year intervals. Therefore, past uses of Subject Property between these intervals may not be identified.

CWA's evaluation included observation of accessible areas, and may not include subsurface conditions, inaccessible areas, or areas hidden from "plain sight" from items such as poor lighting, wooded areas and vegetation, snow cover, pavement, landscaping, stored materials and equipment, and miscellaneous debris. In addition, building areas that were not accessible or that would have required demolition in order to investigate, such as pavement, walls and floors were not observed. This assessment did not include sampling or analysis of soil, groundwater, air/vapor, surface water, drinking water, or building materials, unless otherwise noted within this report. CWA's services were limited to the scope of services as described in Section 1.2. Any use of this report by any party, beyond the scope and intent of the original parties, shall be at the sole risk and expense of such user.

No environmental site assessment can wholly eliminate uncertainty regarding the potential for RECs in connection with a Subject Property. Performance of this practice within the scope and limitations of the ASTM Standard Practice E1527-21 is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a Subject Property, and this practice recognizes reasonable limits of time and cost. A Phase I ESA is not an exhaustive investigation of environmental conditions on the Subject Property. There is a point where the cost of information obtained or the time required to gather it outweighs the usefulness of the information and, in fact, may be detrimental to the orderly completion of transactions.

The limitations of, and exception to, this Phase I ESA include:

- The information contained in this report is accurate only to the degree implied by the methods used in conducting this Phase I ESA.
- The information obtained from publicly available sources and third-party research companies are presumed to be accurate and reliable. CWA shall not be liable for third party or public information including failure to make relevant files or documents properly available, to properly index files, or otherwise to fail to maintain or produce accurate or complete records.

- Information revealed by person(s) interviewed is presumed to be accurate and reliable.

This report does not represent a legal opinion, a guarantee or warranty regarding past, current, or future operations or conditions at the Subject Property. CWA makes no warranty that the Subject Property is free from existing contamination, and is not responsible for non-disclosed facts regarding operations and conditions associated with the Subject Property.

Should additional information or surface, subsurface, or chemical data become available, the findings and conclusions contained in this report shall not be considered valid unless these data are reviewed and the conclusions of the report are modified or approved in writing by CWA.

CWA makes no warranty, guarantee or certification regarding the quality, accuracy or reliability of any prior report provided to CWA and discussed in this Phase I ESA report. CWA expressly disclaims any and all liability for any errors or omissions contained in any prior reports provided to CWA and discussed in this Phase I ESA report.

The "Environmental Professional Statement" in this report does not certify the findings contained in this report and is not a legal opinion of such *Environmental Professional*. The statement is intended to document CWA's opinion that an individual meeting the qualifications of an *Environmental Professional* was involved in the performance of the assessment and that the activities performed by, or under the supervision of, the *Environmental Professional* were performed in conformance with the standards and practices set forth in 40 CFR Part 312 per the methodology in ASTM Standard Practice E1527-21 and the scope of work for this assessment.

Per ASTM Standard Practice E1527-21, Section 6, User Responsibilities, the User of this assessment has specific obligations to provide information that will help the *Environmental Professional* with identifying RECs in connection with the Subject Property. Failure to provide information may impact the User's ability to qualify for *Landowner Liability Protections* (LLPs) as defined under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CWA makes no representations or warranties regarding a User's status regarding LLPs and associated regulatory agencies.

In accordance with the ASTM Standard Practice E1527-21, the Phase I ESA report will remain viable for a period of 180 days from the earliest of the following completed components:

(i) Interview(s),
(ii) Environmental lien search (if completed by the Environmental Professional),
(iii) Review of government records (regulatory database search),
(iv) Visual inspections (site reconnaissance date),
(v) Declaration date by the Environmental Professional.

The Phase I ESA will remain valid for up to one (1) year if the five (5) abovementioned components are updated following the 180-day report viability date. Phase I ESA reports older than one year may not meet the ASTM Standard Practice E1527-21 and therefore, the entire report must be updated to reflect current conditions and Subject Property-specific information.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

The Subject Property is located at 207 and 211 S. Green River Road in Evansville, Vanderburgh County, Indiana 47715. According to information obtained from the Vanderburgh County Assessor's Office website, the Subject Property is identified as parcel numbers 82-06-26-013-180.001-027 and 82-06-26-013-180.002-027 and totals approximately 0.68 acres. A Vicinity Map is provided as **Figure 1**, and a Subject Property Plan depicting the Subject Property's surface features and surrounding area is provided as **Figure 2**. Photographs taken of the Subject Property during the site reconnaissance are included in **Appendix A**. Full legal descriptions are provided in **Appendix B**.

2.2 Subject Property and Vicinity General Characteristics

The Subject Property is located directly west of South Green River Road in an area of Evansville generally characterized by commercial and residential land uses. Surface topography across the Subject Property is generally flat. The specific adjacent property uses are discussed in Section 2.5.

2.3 Current Use of the Subject Property

The Subject Property is currently undeveloped. Businesses previously associated with the Subject Property include Stephen W. Fischer, DDS; Parvin R. Raibley, DDS; Bruce D. Raibley, DDS; Mortgages by Loan Finders; Gary M. Haller, DDS; Perihan A. Percinel, DDS; and Green River Family Dental. The Subject Property currently consists concrete and gravel parking lots on the eastern and western portions of the north parcel, respectively. A grass lawn area is established on the south parcel. See Section 4.3 for further discussion of historical uses of the Subject Property. See Section 5.0 for further discussion of environmental-related observations for the Subject Property.

2.4 Subject Property Improvements

The following provides a general description of Subject Property improvements.

SUBJECT PROPERTY BUILDINGS	
Number of Buildings	None

SUBJECT PROPERTY UTILITIES	
Potable Water Source	City of Evansville
Sanitary Sewer Utility/Septic	City of Evansville
Storm Sewer Utility	City of Evansville
Electrical Utility	CenterPoint Energy
Natural Gas Utility	CenterPoint Energy

2.5 Current Uses of Adjoining Properties

This section discusses the current uses of adjoining properties to evaluate potential or identified RECs in the vicinity of the Subject Property.

Occupant Name	Current Use	Address	Direction
None	Roadway	E. Sycamore Street	North
Green River Dentistry	Medical Office	123 S. Green River Road	North

Occupant Name	Current Use	Address	Direction
None	Roadway	S. Green River Road	East
O'Reilly Auto Parts	Commercial	220 S. Green River Road	East
Big Barrel Liquors	Commercial	240 S. Green River Road	East
Circle K	Commercial	300 S. Green River Road	East
Luxury Spa & Nails	Commercial	217 S. Green River Road	South
David, Karla Kay, and Karen Wireman	Residential	212 Harrison Boulevard	West
Christopher L. Williams	Residential	4701 E. Sycamore Street	West
Rodney Keith Young	Residential	4700 E. Sycamore Street	Northwest

Based on observed conditions, presumed groundwater gradient, distance, and regulatory review, none of the surrounding properties currently represent an environmental concern regarding the Subject Property.

3.0 USER PROVIDED INFORMATION

The following summarizes information provided by Hira, Inc. (User). Documentation may be found in **Appendix B** and other relevant sections of this report.

3.1 Title Records

The User provided no title records for review. CWA conducted a search for available title records on the Laredo Land Records website. Based on CWA's research, the Subject Property is currently owned by Hira, Inc. which acquired the Subject Property from Brian L. Raibley, cotrustee of the Parvin R. Raibley Trust Agreement on August 31, 2021. Other prior ownership includes Parvin R. Raibley, Trustee of the Parvin R. Raibley Trust Agreement (July 1980 to August 2021), Parvin R. and Mary Helen Raibley (November 1964 to July 1980), F. Wayne and Frances June Howard (December 1961 November 1964), Charles E. Taylor Jr. & Patricia Taylor and Jack R. and Anne Taylor (October 1961 to December 1961), and Louise Hirsch Lant and Perry J. Lant (prior to October 1961). Copies of relevant deeds are provided in **Appendix B**. The review of historical title records did not identify any past uses that represent an environmental concern.

3.2 Environmental Liens or Activity and Use Limitations (AULs)

In order to satisfy the requirements under ASTM Standard Practice E1527-21, CWA conducted an environmental lien search of land title records for the Subject Property. Environmental liens and AULs were searched from available title records from 1951 to present. Based on the review of available title records, no environmental liens or AULs were identified for the Subject Property.

3.3 Reason for Performing Phase I ESA

The User stated that the purpose of performing this Phase I ESA was to facilitate a potential real estate transaction.

3.4 Specialized Knowledge or Experience of the User

The User provided no information based on specialized knowledge or experience regarding RECs associated with the Subject Property.

3.5 Commonly Known or Reasonable Ascertainable Information

The User provided no commonly known or reasonably ascertainable information pertaining to the Subject Property.

3.6 Significant Valuation Reduction for Environmental Issues

The User provided no information regarding a significant valuation reduction for environmental conditions associated with the Subject Property.

3.7 Other User Provided Documentation

No other documentation was provided by the User.

4.0 RECORDS REVIEW

4.1 Standard Environmental Records

A search of federal, state, and local database sources was provided for this Phase I ESA by Environmental Data Resources, LLC (EDR) of Shelton, Connecticut. The database search was performed using approximate minimum search distances referenced in the ASTM Standard Practice E1527-21. The complete regulatory agency database report may be found in **Appendix C**. The following is a summary of the findings of the regulatory agency database review.

SUMMARY OF FEDERAL, STATE AND LOCAL DATABASES			
Regulatory Database Searched	**Subject Property Listed?**	**Search Distance (Miles)**	**Total Plotted**
Lists of Federal NPL (Superfund) Sites	No	1	0
Lists of Federal Delisted NPL Sites	No	1	0
Lists of Federal Sites Subject to CERCLA Removals and CERCLA Orders	No	0.5	0
Lists of Federal CERCLA Sites with NFRAP (SEMS-ARCHIVE)	No	0.5	1
Lists of Federal RCRA Facilities undergoing Corrective Action (CORRACTS)	No	1	1
Lists of Federal RCRA TSD Facilities (RCRA-TSDF)	No	0.5	0
Lists of Federal RCRA Generators	No	Subject Property and Adjoining	0
Federal Institutional Controls / Engineering Control Sites	No	Subject Property	0
Federal ERNS List	No	Subject Property	0
Lists of State and Tribal Hazardous Waste Facilities	No	1.0	0
Lists of State and Tribal Landfills and Solid Waste Disposal Facilities	No	0.5	0
Lists of State and Tribal Leaking Storage Tanks (LUST)	No	0.5	11
Lists of State and Tribal Registered Storage Tanks (UST)	No	Subject Property & Adjoining	0
State and Tribal Institutional Control / Engineering Control Registries (AUL)	No	Subject Property	0
Lists of State and Tribal Voluntary Cleanup Sites	No	0.5	3
Lists of State and Tribal Brownfield Sites	No	0.5	1
U.S. Brownfields	No	0.5	0

4.1.1 Federal, State and Tribal Agency Database Findings

The following listings were identified in one or more databases that represent a known or potential for release or environmental impact regarding the Subject Property.

207 S. Green River Road	
Address	207 S. Green River Road
Databases Listed	ASBESTOS
Distance	N/A
Direction	N/A
Presumed Groundwater Gradient Status	N/A

207 S. Green River Road	
Brief Summary	Based on the information summarized in the EDR report, The Subject Property was identified in the IN Asbestos database. The Subject Property is identified by notification number 62189. Asbestos was noted at the Subejct Property during a demolition completed by Kip A. Staub Co, LLC in November and December of 2023. No inspector or inspection date was listed. No other documents were available for review.
Conclusion	Based on the current status of the building and time elapsed since demolition, the asbestos identified within the former Subject Property building does not currently represent an environmental concern.

Circle K	
Address	300 S. Green River Road
Databases Listed	UST, UST FINDER, UST FINDER RELEASE, LUST, EDR HIST AUTO
Distance	0.024 miles
Direction	Southeast
Presumed Groundwater Gradient Status	Crossgradient
Brief Summary	Based on the information summarized in the EDR report, three USTs have been closed at the facility, and three USTs remain in use (10,000 gallon gaoline, 8,000 gallon gasoline, 8,000 gallon diesel). LUST incident number 199410519 was identified related to the facility, but resulted in an unconditional no further action (NFA) closure designation. CWA reviewed available documents on the IDEM VFC. Based on the inromation reviewed on the IDEM VFC, the initial LUST indident was reported following a general site assessment at the Busler's station in 1991 (LUST incident number 199103502). It was reported that one of the 8,000 gallon gasoline tanks had leaked petroleum product resulting in unknown environmental consequences. Certified Testing Consultants, Inc. (CTC) collected soil samples in the spring of 1991. It was concluded that the contamination plume migrated in a north/west direction from the tank pit. Contaminated soils were excavated and the pit was backfilled with 12 inches of #53 crushed stone. CTC also removed the 10,000 gallon tank, installed a vapor barrier along the property line to reduce the possibility of future offsite contamination, and performed tightness testing on the remaining 8,000 gallon USTs. The remaining USTs were removed by CTC in 1994 following a report of sludge release when the staion (Busler's) closed. Soil samples collected during closure activities did not exhibit evidence of contamination requiring further clean up. Benzene was identified in groundwater at 172 parts per billion (ppb). Further investigation was completed by Geotech, Inc. at IDEM's request. Geotech concluded that the release had been remediated. IDEM issued an unconditional NFA in August of 2003. While several inspections at the facility since 2003 have resulted in violations, the Circle K facility was in compliance as of April 2024.
Conclusion	Based on the completed remediation and NFA issued for the facility, and the facility's compliance status through 2024, Circle K does not currently represent an environmental concern.

Subway	
Address	200 S. Green River Road
Databases Listed	UST, UST FINDER, UST FINDER RELEASE, LUST, EDR HIST AUTO
Distance	0.056 miles
Direction	Northeast
Presumed Groundwater Gradient Status	Upgradient
Brief Summary	Based on the information summarized in the EDR report, four (4) 4,000 gallon USTs were closed at the facility in 1990. Additionally, Sidney H. Morrow was identified as having operated a gasoline service station at the facility from at least 1971 to 1974. Two documents were available for review on the IDEM VFC. The first document was a Notification of Underground Storage Tanks dated April 1986. The notification form reported that each of the USTs at the facility was approximately 21 years old, empty, and last used in 1978. Four (4) 4,000 gallon tanks and two (2) 550 gallon tanks were reported to be present at the facility. The four (4) 4,000 gallon USTs were removed by SubTech, Inc. in May 1990. Samples collected from the tank pit exhibitied total petroleum hydrocarbons (TPH) concentrations below the cleanup level of 100 miligrams per kilogram (mg/kg). Pit water was also analyzed for benzene, toluene, ethyl benzene, and xylenes (BTEX). BTEX was not detected at levels above the laboratory reporting limits. No closure documentation pertaining to the two 550 gallon UST was available for review, although the USTs appeared to be permanently out of service since 1978.
Conclusion	Based on the distance and laboratory results from the soil and groundwater samples collected during UST closure, the facility currently does not represent an environmental concern in regards to the Subject Property.

Don’s Cleaners	
Address	113 S. Green River Road
Databases Listed	ASBESTOS, DRYCLEANERS
Distance	0.095 miles
Direction	North
Presumed Groundwater Gradient Status	Upgradient
Brief Summary	Based on the information summarized in the EDR report, Don’s Cleaners was listed in the IN Absestos and IN Drycleaners databases. The building was reportedly renovated in September 2004. The inspector was DEZ. No removal or demolition contractors were listed. Don’s Cleaners was listed as a dry cleaning facility in the Polk City Directory with a reference year of 1974. No additional information was available on the EDR Report or on the IDEM VFC.
Conclusion	Based on the distance from the Subject Property, the facility does not currently represent an environmental concern.

Sunoco Service Station	
Address	4721 Division Street
Databases Listed	RCRA Nongen / NLR

Sunoco Service Station	
Distance	0.190 miles
Direction	North northwest
Presumed Groundwater Gradient Status	Upgradient
Brief Summary	Based on the information summarized in the EDR report, Sonoco Service Station was identified as a nongenerator of RCRA controlled wastes. One document was available for review on the IDEM VFC website. The document was the reponse by the Indiana Department of Transportation (INDOT) to IDEM's Leaking Underground Storage Tank Section's request for information. The reponse by INDOT included a proposal for the department of highways to demolish the onsite buildings and remove the underground storage tanks and a dialogue recorded by Stein Reporting Services which apparently took place at the Vanderburgh County Court House. The dialogue stated that there was one 4,000 gallon UST, two 8,000 gallon USTs, one 6,000 gallon UST, one 1,000 gallon diesel UST, one 500 gallon fuel oil UST, and one 500 gallon waste oil UST at the facility. Approximately nine dispensers dispensed fuel from the USTs. The USTs were in place in 1981. No other pertinent records were available for review.
Conclusion	Based on the distance from the Subject Property, the facility does not currently represent an environmental concern.

Based on regulatory status and other measurable factors such as distance from the Subject Property and assumed groundwater gradient, none of the other facilities listed in the federal, state, and/or tribal databases are considered to represent an environmental concern related to the Subject Property.

4.1.2 Local Environmental Records Sources

The following is a summary of the responses from local environmental records review.

Local Agency	Summary
Vanderburgh County Health Department	CWA contacted the Vanderburgh County Health Department to inquire about any known environmental concerns, complaints, wells, septic tanks, etc. associated with the Subject Property. Mr. Keith M. Goy stated that the Vanderburgh County Health Department had no records on file pertaining to the Subejct Property.
Evansville Fire Department	CWA contacted the Evansville Fire Department to inquire about any known environmental concerns, tanks, spills, releases, etc. associated with the Subject Property. Mr. Nick Raber, Battalion Chief of Special Operations/Planning, stated that the Evansville Fire Department was not aware of any environmental concerns, spills, fire responses, or undergraound features related to the Subject Property.
Other Environmental Records	No other local environmental records were reviewed.

4.2 Physical Setting Sources

4.2.1 Topography

Based on the United States Geological Survey (USGS) 7.5-Minute Series Topographic Map of Newburgh, Indiana, dated 1964, photorevised 1981, the Subject Property is located approximately 395 feet above mean sea level (MSL). The Subject Property is relatively flat. Areas surrounding the Subject Property are also generally flat. Regionally, surface topography slopes gently to the northwest. A copy of a 2022 USGS Topographic Map is also included as **Figure 1**.

4.2.2 Geology

Based on the Indiana Map Viewer website administered by the Indiana Geological and Water Survey (IGS), Wisconsinan to Holocene-aged loess is present beneath the Subject Property. The loess deposits are composed mainly of silt, clayey silt, and fine sand.

Pennsylvanian-aged shale and sandstone of the Patoka and Shelburn Formations make up the bedrock beneath the Subject Property. These units mainly consist of shale and sandstone, but can also include this beds of limestone and coal.

4.2.3 Soils

CWA researched available soil data and classifications on the U.S. Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) Web Soil Survey. Soils beneath the Subject Property consist of the Ragsdale silt loam (Ra). The Ragsdale silt loam is nearly level, poorly drained, with moderately high to high permeability, and very high available water capacity. A complete soil report can be found in Appendix H.

4.2.4 Hydrology

No historical groundwater data were identified for the Subject Property. Private drinking water wells were not identified on the Subject Property. However, surrounding water well data summarized in the EDR report reported a static depth to water of approximately 25 feet below ground surface within a half mile of the Subject Property.

Local and regional groundwater flow is presumed to be southeast towards the Ohio River, which is located approximately 3.18 miles from the Subject Property. Our environmental review of the surrounding properties is especially focused on those located to the northwest (presumed upgradient) of the Subject Property. It should be noted that groundwater levels and flow patterns can fluctuate based on subsurface geology characteristics, precipitation, drainage improvements, and dewatering / drawdown operations. A complete hydrogeologic investigation, including monitoring well installation and potentiometric surface mapping would be necessary to determine actual groundwater flow direction.

4.3 Evaluation of Historical Information Sources

Based on the research of available historical records, the Subject Property was agricultural and undeveloped land until the late 1960s. When the original Subject Property building was erected, it was occupied by Parvin R. Raibley, DDS. The Subject Property remained in use as a dental office through approximately 2020, though the original building was replaced in the late 1980s.

The area immediately surrounding the Subject Property was largely undeveloped until the mid 1960s. Commercial and residential development increased significantly between 1962 and 1973. Commercialization continued through the late 1990s. The area surrounding the Subject Property to the north, east, and south remains commercially developed, while the area to the west remain residentially developed.

Interval gaps (greater than five years) were encountered during the research of historical use information for the Subject Property and surrounding area. However, based on the review of available historical sources, these data gaps do not have an impact on the REC determinations of this assessment and are not *significant data gaps.*

A detailed summary of various historical records is provided in the appropriate sections below.

4.3.1 Aerial Photographs

CWA reviewed available aerial photographs of the Subject Property and surrounding area as provided by EDR. Available aerial photographs included the years 1940, 1956, 1958, 1962, 1973, 1977, 1984, 1992, 1998, 1999, 2005, 2008, 2012, 2016, and 2020. The following summarizes CWA's interpretation of the features observed on the aerial photographs.

AERIAL PHOTOGRAPH SUMMARY		
Year	**Scale**	**Comments**
1940	1 inch = 500 feet	**Subject Property**: The Subject Property appears to be agricultural / undeveloped land. **Surrounding Area**: Surrounding areas consists of agricultural and undeveloped land. A roadway borders the Subject Property to the east.
1956	1 inch = 500 feet	**Subject Property**: Similar to 1940. **Surrounding Area**: Similar to 1940.
1958	1 inch = 500 feet	**Subject Property**: Similar to 1956. **Surrounding Area**: Similar to 1956.
1962	1 inch = 500 feet	**Subject Property**: Similar to 1958. **Surrounding Area**: A new roadway borders the Subject Property to the north, and apparent commercial development has increased to the west.
1973	1 inch = 500 feet	**Subject Property**: The Subject Property is developed with one apparent commercial building in center of the northern portion. A parking lot covers the northwest corner, while grass lawn covers the northeast quarter and southern half of the Subject Property. **Surrounding Area**: Commercial development has increased to the north and east while apparent residential development has increased to the south and west.
1977	1 inch = 500 feet	**Subject Property**: Similar to 1973. **Surrounding Area**: Similar to 1973.
1984	1 inch = 500 feet	**Subject Property:** Similar to 1977. **Surrounding Area:** Similar to 1977, but commercialization has continued to increase to the north, east, and south.

AERIAL PHOTOGRAPH SUMMARY		
Year	**Scale**	**Comments**
1992	1 inch = 500 feet	**Subject Property:** The Subject Property building appears to have been replaced with a larger building. An additional paved parking lot is visible on the east side of the building. **Surrounding Area:** Similar to 1984.
1998	1 inch = 500 feet	**Subject Property:** Similar to 1992. **Surrounding Area:** Similar to 1992, but commercialization had increased to the east.
1999 2005 2008 2012 2016 2020	1 inch = 500 feet	**Subject Property:** Similar to 1998. **Surrounding Area:** Similar to 1998.

Copies of reproducible aerial photographs are included in **Appendix D**.

4.3.2 Fire Insurance Maps

A search for fire insurance maps for the Subject Property and surrounding area was conducted by EDR. No fire insurance maps were available. A copy of the "No Coverage Letter" is provided in **Appendix E**.

4.3.3 Historical USGS Topographic Maps

CWA reviewed available historical USGS Topographic Maps for information regarding past uses of the Subject Property and surrounding area from the USGS Historical Topo Map Explorer website. USGS Topographic Quadrangle Maps (7.5 and 15 minute) of Newburgh, Indiana were available for the years 1952, 1953, 1966, and 1981. The following are descriptions and interpretations from the topographic map review:

Subject Property
In 1952 and 1953, the Subject Property was depicted as undeveloped. In 1966 and 1981, the Subject Property is depicted beneath a red polygon indicating grown up urban development. No structures or details are depicted.

Surrounding Area
In 1952, the area surrounding the Subejct Property is bordered to the east by a secondary highway. At that time, the properties adjoining the Subject Property were also undeveloped. No changes are evident on the map from 1953. By 1966 the Subject Property was bordered to the north by a light duty roadway. The area surrounding the Subject Property to the north, west, and south was depicted under a red polygon indicating grown up urband development. No development was depicted across the road to the Subject Property's east. By 1981, apparent residential structures had been added across the road to the Subject Property's east.

4.3.4 City Directories

CWA reviewed available city directory information provided by EDR. Records were searched from 1955 to 2020. City directories were available for the years 1955, 1964, 1969, 1974, 1979, 1984, 1989, 1992, 1995,

2000, 2005, 2010, 2014, 2017, and 2020. Date ranges accompanying listings reflect years that the listing was identified on business directories and may not represent the complete date range of which a listing was active. A summary of the city directory review is provided in the table below. Documentation is included in **Appendix E**.

CITY DIRECTORY REVIEW	
Subject Property	
The Subject Property was listed at 207 S. Green River Road from at least 1969 to 2020. Listings at this address included Parvin R. Raibley, DDS (1969 to 2005), Stephen W. Fischer, DDS (1974 to 2020), Bruce D. Raibley, DDS (1979 to 2005), Mortgages by Loan Finders (2000), Gary M. Haller, DDS (2010 to 2017), Perihan A. Percinel, DDS (2010 to 2017), and Green River Family Dental (2014 to 2020). No other addresses were identified related to the Subject Property.	
Surrounding Area (Notable Listings)	
North: 113 S. Green River Road	White Swan Cleaners and Launderers of Evansville, Inc (1969), Don's Cleaners (1974)
North: 200 S. Green River Road	Bill Spurling, Inc. (1979), Morrow's Marathon Station (1969 and 1974)
South: 300 S. Green River Road	Red Bird Station No. 947 (1974 and 1979), Bussler Interprises (1989 to 1995), Cirlce K (2010 and 2020)
South: 412 S. Green River Road	Grease Monkey (1989 to 2010)

No environmental concerns related to the past uses of the Subject Property were identified by the city directory review.

4.3.5 Tax Files and Building Department Records

CWA reviewed available tax files provided by the Vanderburgh County, Indiana assessor's office website. The current owner on the property tax card was listed as Hira, Inc. (since September 2021). Other Historical ownership information listed on the property tax card included Parvin R. Raibley (July 1980 to September 2021). CWA also reviewed available documents on the Evansville Citizen Self Service website. The reviewed permits and inspections are summarized in the tables below:

Permits			
Address: 207 S. Green River Road		**Parcel Number: 82-06-26-013-180.001-027**	
Owner	**Type**	**Status**	**Number**
Hira, Inc.	REZ-COM	ISSUED	-2022-012
Hira, Inc./ Donald B. Ashby Sr.	WRECK COMM	ISSUED	174333
Parvin R. Raibley trustee / Scott B. Elpers	NOLUM SIGN	ISSUED	8334
Parvin. R and Mary Raibley trustees / Ben T. Lang	ROOF COMM	ISSUED	9552

No environmental concerns were identified from the tax file and building record review. Documentation is included in **Appendix H**.

4.3.6 Zoning/Land Use Records

CWA reviewed available zoning/land use records on the Vanderburgh County, Indiana GIS website for information regarding current and past uses of the Subject Property and surrounding area. The Subject Property, the adjoining property to the south, and the adjacent properties to the east (across S. Green River Road) are currently zoned General Commercial (C-4). The adjoining and adjacent properties to the west and northwest are currenly zoned Residential (R-1). The adjacent property to the north, across E. Sycamore Street, is currently zoned Neighborhood Commercial (C-1). No historical zoning information was available for review. A copy of the zoning map is included in **Appendix H**.

4.3.7 Prior Assessments

No prior reports were available for review.

4.3.8 Other Historical Records

No other historical records were available for review.

5.0 SITE RECONNAISSANCE

This section provides a summary of features, activities, uses, and conditions based on visual and/or physical observations of the Subject Property and adjoining properties during the site reconnaissance.

5.1 Methodology and Limiting Conditions

The site reconnaissance was conducted by Ms. Tristan Norman of CWA on December 5, 2024. The weather was sunny and 27 degrees Fahrenheit. Ms. Norman was unaccompanied during the Subject Property walk-through. The purpose of the Subject Property reconnaissance is to collect information to help identify RECs. CWA's systemic approach for performing the site reconnaissance was to gather overlapping views by assessing in a grid-like pattern for safely accessible areas on the exterior of the Subject Property. Visual observations of the interior areas of the structures (if any) on the Subject Property included safely accessible common areas; and areas where hazardous or petroleum products may have been stored, used, treated, discharged, or disposed such as maintenance and repair areas, and boiler rooms. Adjoining properties were viewed from safely accessible public roads and/or the perimeter of the Subject Property boundaries.

Concrete pavement and gravel surfaces limited observations on exterior portions of the Subject Property.

5.2 Subject Property Observations

CWA's observations during the site reconnaissance are summarized in the table below. Further discussion, (if applicable) for each listed feature or operation is provided below the table.

SUMMARY OF DETAILED SUBJECT PROPERTY OBSERVATIONS		
Condition, Feature or Operation	**Observed On-Site?**	
	Yes	**No**
Hazardous Substance Storage and/or Handling		X
Petroleum Products Storage and/or Handling		X
Underground Storage Tanks (USTs)		X
Aboveground Storage Tanks (ASTs)		X
Strong, Pungent, or Noxious Odors		X
Surface Water or Pools of Liquid		X
Unidentified Substance Containers		X
PCB Containing Equipment	**X**	
Hydraulic Equipment		X
Drains and Sumps		X
Pits, Ponds, or Lagoons		X
Stressed Vegetation		X
Nonhazardous Solid Waste		X
Surface Staining		X
Wastewater		X
Stormwater Management System	**X**	
Wells		X
Septic Systems		X
Fill Areas		X
Railroads		X
Pipeline Markers		X
Other:		X

PCB Containing Equipment

Five (5) pole mounted transformers are located along the western Subject Property boundary. No evidence of release (i.e., staining, odor, stressed vegetation, etc.) or damage regarding the transformers. Based on observed conditions, the transformers located on the Subject Property do not currently represent an environmental concern. Should a future release or damage to the transformer occur, CenterPoint Energy (presumed transformer owner) would be responsible for addressing environmental efforts associated with evaluation and cleanup.

Stormwater Management System

Stormwater on the property either infiltrates into the ground or flows overland into municipal storm sewer drains along S. Green River Road and E. Sycamore Street. No evidence of impact (e.g. staining, sheen, odors, etc.) was observed related to stormwater management on the Subject Property.

6.0 VAPOR ENCROACHMENT SCREEN

As part of this Phase I ESA, CWA completed a Tier I Vapor Encroachment Screen (VES), in general conformance to ASTM Standard Practice E2600-22, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions for *vapor encroachment conditions* (VECs). A VEC is the presence or potential presence of chemicals of concern (COCs) vapors in the vadose zone of a property caused by the release of vapors from contaminated soil and/or groundwater either on or near a property as identified by the Tier 1 VES procedures. The vadose zone is also known as the zone between the land surface and the water table within which moisture content is less than saturation (except in the capillary fringe) and pressure is less than atmospheric. Conditions may exist where there could be no vadose zone, such as the case of a building foundation sitting below the water table. In this case, it may be possible for COC vapors to adversely impact the indoor air of a structure without migrating through a vadose zone.

CWA evaluated several factors as part of the Tier 1 VES including a review of current and historical uses of the Subject Property and surrounding areas, regulatory agency database records, the building construction type, and prior reports. The most common COCs associated with vapor exposure concerns include (but not limited to) volatile organic compounds (VOCs), chlorinated solvents, petroleum hydrocarbons, and semi-volatile organic compounds (SVOCs).

The default area of concern (AOC) is the approximate minimum search distance measured from the Subject Property boundary to a nearby contaminated property with known or suspected COC contamination of soil and/or groundwater. If COCs are used or stored on the Subject Property, or there is an institutional control recorded on the Subject Property for these COCs, then the Subject Property is included in the default AOC.

The default AOC was adjusted for this Phase I ESA based on considerations of groundwater flow patterns, subsurface geology, surficial features, man-made features, and existing COC data. For example, if groundwater flow direction is known or can be inferred, the default AOC in the downgradient and crossgradient directions can be reduced to the area within the critical distance.

The adjusted AOC in connection with distances established from the Subject Property is provided in the table below.

Tier 1 Screening – Adjusted AOC Critical Distances			
Presumed Gradient Status	**Petroleum COCs (dissolved)**	**Petroleum COCs (LNAPL)**	**Non-Petroleum COCs**
Downgradient	30 feet	100 feet	100 feet
Crossgradient	95 feet	165 feet	365 feet
Upgradient	528 feet	528 feet	1,760 feet

Based on CWA's review of current and historical uses (Section 4.3) and regulatory agency database records (Section 4.1.1), no VECs were identified for the Subject Property.

7.0 PER- AND POLYFLUOROALKYL SUBSTANCES (PFAS)

Perfluoroalkyl and polyfluoroalkyl substances (PFAS) are a class of man-made chemicals (developed in the 1940s) which have been widely used in various consumer and commercial products (e.g. textiles, non-stick cookware, food packaging, cleaning products, paints, cosmetic products, water resistant fabrics, etc.), multiple industrial applications (e.g. electroplating, wood/furniture applications, electronics, oil and mining, dust suppression, etc.), biosolids, and certain fire-fighting foams. The direct release of PFAS into the environment has occurred from historical uses mainly associated with industrial facilities, emergency fire response incidents, landfills, and waste water treatment plants.

PFAS compounds are persistent in the environment and have been phrased by many as the “forever chemicals” because they are widely used and don’t easily degrade in the natural environment. PFAS can be transported through air emissions, surface deposits, waterbodies, and landfills which can then migrate into the subsurface soils/groundwater. Many PFAS have been detected in the blood of people and animals all over the world, and at low concentrations in various food products and in the environment. Based on research of humans and animals completed thus far, exposure to PFAS is believed to adversely affect the immune system, reproductive system, hormonal system, and can cause increase risk for multiple cancers (e.g. prostate, kidney, testicular, etc.), thyroid disease, high blood pressure, and other ailments. PFAS exposure can occur from (but is not limited to) drinking contaminated drinking water, eating certain foods that may contain PFAS, ingestion of contaminated soil/dust, inhalation of contaminated air, working in occupations associated with chemical manufacturing/application and firefighting, and using PFAS-containing products or packaging.

Although thousands of PFAS compounds exist, many of which are considered emerging contaminants, the two (2) most widely used types of PFAS are recognized as perfluorooctanoic acid (PFOA) and perfluorooctane sulfonic acid (PFOS). On April 19, 2024, the U.S. EPA announced the designation of PFOA and PFOS as hazardous substances under CERCLA.

CWA evaluated the current and past uses of the Subject Property and adjacent properties for potential PFAs impacts to the subsurface in the Subject Property vicinity.

The EDR report included the following PFAS-related government databases researched for the Subject Property and surrounding area.

DATABASE	SUMMARY/SOURCE
PFAS NPL	List of superfund sites with available PFAS detection information.
PFAS FEDERAL SITES	Provides information on federal facilities with known or suspected PFAS detections.
PFAS TSCA	Tracks chemical facilities that manufacture PFAS under the Toxic Substances Control Act (TSCA).
PFAS TRIS	List of PFAS added to the Toxic Release Inventory (TRI).
PFAS RCRA MANIFEST	Provides PFAS manifest records from RCRA datasets available for facilities.
PFAS ATSDR	Provides list PFAS contamination site locations mostly related to drinking water contamination or fire training areas.
PFAS WQP	Sampling data and project details provided through the Water Quality Portal (WQP).
PFAS NPDES	Provides PFAS monitoring data from available NPDES permits under the Clean Water Act.

DATABASE	SUMMARY/SOURCE
PFAS PROJECT	The database serves as a PFAS contamination site tracker providing qualitative and quantitative data from various agencies.
PFAS ECHO	Tracks which regulated facilities may be handling and/or release of PFAS.
PFAS ECHO FIRE TRAIN	Provides a listing of fire training facilities that utilize firefighting foam.
PFAS PT 139 AIRPORT	List of all Certified Part 139 Airports that are required to have fire-fighting foam on-site to meet military specifications (fluorinated).
AQUEOUS FOAM NRC	Database includes documentation involving pollution and railroad incidents under the National Response Center (NRC) and the use of aqueous film forming foam.
PFAS	List of known PFAS contaminated sites including wastewater treatment plants.

No facilities were listed in the PFAS-related databases associated with the EDR report.

In addition to the abovementioned databases researched, IDEM has been conducting PFAS monitoring at all Community Public Water Systems (CWS) throughout the State of Indiana since February 2021. According to IDEM's Phase 3 Sampling for the Evansville Water Utility on August 14, 2023, PFOA was detected at a concentration of 2.4 parts per trillion (ppt) in source/untreated water. PFOA was not detected in finished water at the treatment plant. Since the municipal drinking water provided for the City of Evansville is deemed to be at an acceptable quality by U.S. EPA standards, PFAS in drinking water does not currently appear to be of concern regarding the Subject Property.

Past uses of the Subject Property do not appear to have been associated with the use of PFAS.

8.0 INTERVIEWS

Interviews were completed by CWA to gather information the personnel listed in the table below. Information obtained from other interviews is provided in applicable sections of this report.

INTERVIEW SUMMARY				
Role	**Person Interviewed**	**Job Title / Company**	**Type of Interview**	**Comments**
Client (User) / Site Contact / Property Owner	Mr. Path Amin	Owner / Hira, Inc.	Questionnaire / Telephone	See Section 3.0. See Below
Local Fire Department	Mr. Nick Raber	Battalion Chief of Special Operations/ Evansville Fire Department	Telephone	See Section 4.1.2.
Local Health Department	Mr. Keith M. Goy	Emergency Preparedness Coordinator / Vanderburgh County Health Department	Email	See Section 4.1.2.

CWA interviewed Mr. Path Amin, Property Owner. Mr. Amin stated that the Subject Property been residential prior to converting into a dental office. Mr. Amin stated that he was not aware of any underground features at the Subject Property, including pits or tanks. Mr. Amin stated that he was not aware of any environmental concerns related to the Subject Property. Mr. Amin stated that when the most recent building on the Subject Property was demolished, abatement was completed by an individual named Steve at Pace Environmental. Mr. Amin did not have documentation of the abatement.

Other pertinent information from the interviews is discussed in applicable sections of this report. Records of Communication are also provided in **Appendix I**.

9.0 ADDITIONAL SERVICES

No additional services beyond the scope of ASTM Standard Practice E1527-21 were included in the scope of work for this Phase I ESA.

10.0 FINDINGS AND CONCLUSION

Cash Waggner & Associates, PC completed a Phase I Environmental Site Assessment (ESA) for the property located at 207 and 211 S. Green River Road, Evansville, Vanderburgh County, Indiana 47715, herein referred to as the "Subject Property". The Subject Property consists of two (2) parcels totaling approximately 0.68 acres and is currently undeveloped. The Subject Property is situated in an urban area on the east side of Evansville and is bordered by S. Green River Road and E. Sycamore Street. Land uses surrounding the Subject Property are generally commercial and residential.

The Subject Property has historically been utilized as a dental office since the first building was erected in the late 1960s. Prior to the 1960s, the Subject Property was undeveloped/agricultural land. The most recent building, which served as Steven W. Fischer DDS and Green River Family Dentistry until approximately 2020, was demolished in 2023.

CWA has performed this Phase I ESA of the Subject Property in conformance with the scope and limitations of ASTM Standard Practice E1527-21. Any exceptions to, or deletions from, this practice are described in Section 2.0 of this report. **This assessment has revealed no evidence of *a recognized environmental condition* (REC), *controlled recognized environmental condition* (CREC), or *historical recognized environmental condition* (HREC) in connection with the Subject Property**.

Recommendations

Based on information collected from the Phase I ESA, no further investigation appears warranted at the Subject Property at this time.

12.0 TERMINOLOGY & ACRONYMS

The following provides definitions and descriptions of key terms and acronyms that may be used in this report. Italics indicate terms that are defined by ASTM Standard Practice E1527-21. The Standard Practice should be referenced for further detail (such as the precise wording), related definitions or additional explanation regarding the meaning of terms.

all appropriate inquiries - that inquiry constituting all appropriate inquiries into the previous ownership and uses of the subject property consistent with good commercial and customary practice as defined in CERCLA, 42 U.S.C §9601(35)(B), that will qualify a party to a commercial real estate transaction for one of the threshold criteria for satisfying the LLPs to CERCLA liability (42 U.S.C §9601(35)(A) & (B), §9607(b)(3), §9607(q); and §9607(r)), assuming compliance with other elements of the defense.

activity and use limitations (*AULs*) - legal or physical restrictions or limitations on the use of, or access to, a site or facility: (1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, and/or surface water on the property, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls, are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil, soil vapor, groundwater, and/or surface water on a property.

bona fide prospective purchaser liability protection - (42 U.S.C. §9607(r)) - a person may qualify as a bona fide prospective purchaser if, among other requirements, such person made "all appropriate inquiries into the previous ownership and uses of the facility in accordance with generally accepted good commercial and customary standards and practices." Knowledge of contamination resulting from all appropriate inquiries would not generally preclude this liability protection. A person must make all appropriate inquiries on or before the date of purchase. The facility must have been purchased after January 11, 2002.

business environmental risk (BER) - a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. Consideration of BER issues may involve addressing one or more non-scope considerations, some of which are identified in ASTM Standard Practice Section 13.

contiguous property owner liability protection - (42 U.S.C. §9607(q)) - a person may qualify for the contiguous property owner liability protection if, among other requirements, such person owns real property that is contiguous to, and that is or may be contaminated by hazardous substances from other real property that is not owned by that person. Furthermore, such person conducted all appropriate inquiries at the time of acquisition of the property and did not know or have reason to know that the property was or could be contaminated by a release or threatened release from the contiguous property. The all appropriate inquiries must not result in knowledge of contamination. If it does, then such person did "know" or "had reason to know" of contamination and would not be eligible for the contiguous property owner liability protection.

controlled recognized environmental condition (CREC) - a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous

substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

data failure - a failure to achieve the historical research objectives in 8.3.1 through 8.3.2.2 even after reviewing the standard historical sources in 8.3.4.1 through 8.3.4.8 that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

data gap - a lack of or inability to obtain information required by this practice despite good faith efforts by the *environmental professional* to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.).

de minimis condition - is a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of the appropriate governmental agencies. Conditions determined to be *de minimis* are not RECs nor CRECs.

engineering controls (EC) - physical modifications to a site or facility (for example, capping, slurry walls, or point of use water treatment) to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or groundwater on a property. Engineering controls are a type of AUL.

environmental lien - a charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products upon a property, including (but not limited to) liens imposed pursuant to CERCLA 42 U.S.C. §§9607(1) & 9607(r) and similar state or local laws.

environmental professional - a person meeting the education, training, and experience requirements as set forth in 40 CFR §312.10(b). The person may be an independent contractor or an employee of the user.

fill dirt - dirt, soil, sand, or other earth, that is obtained off-site, that is used to fill holes or depressions, create mounds, or otherwise artificially change the grade or elevation of real property. It does not include material that is used in limited quantities for normal landscaping activities.

hazardous substance - a substance defined as a hazardous substance pursuant to CERCLA 42 U.S.C.§9601(14), as interpreted by EPA regulations and the courts:" (A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title, (C) any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of the Resource Conservation and Recovery Act of 1976 (RCRA), as amended, (42 U.S.C. §6921) (but not including any waste the regulation of which under RCRA (42 U.S.C.§§6901 et seq.) has been suspended by Act of Congress), (D) any toxic pollutant listed under section 1317(a) of Title 33, (E) any hazardous air pollutant listed under section 112 of the Clean Air Act (42 U.S.C. §7412), and (F) any imminently hazardous chemical substance or mixture with respect to which the Administrator (of EPA) has taken action pursuant to section 2606 of Title 15. The term does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under subparagraphs (A) through (F) of this paragraph, and the term does not include natural gas, natural gas liquids, liquefied

natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas)."

hazardous waste - any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of RCRA, as amended, (42 U.S.C. §6921) (but not including any waste the regulation of which under RCRA (42 U.S.C. §§6901-6992k) has been suspended by Act of Congress). RCRA is sometimes also identified as the Solid Waste Disposal Act. RCRA defines a hazardous waste, at 42 U.S.C. §6903, as: "a solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may - (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed."

hazardous waste/contaminated sites - sites on which a release has occurred, or is suspected to have occurred, of any hazardous substance, hazardous waste, or petroleum products, and that release or suspected release has been reported to a government entity.

historical recognized environmental condition (HREC) - a previous release of hazardous substances or petroleum products affecting the subject property and has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A HREC is not a REC.

innocent landowner defense - (42 U.S.C. §§9601(35) & 9607(b)(3)) - a person may qualify as one of three types of innocent landowners: (i) a person who "did not know and had no reason to know" that contamination existed on the property at the time the purchaser acquired the property; (ii) a government entity which acquired the property by escheat, or through any other involuntary transfer or acquisition, or through the exercise of eminent domain authority by purchase or condemnation; and (iii) a person who "acquired the facility by inheritance or bequest." To qualify for the innocent landowner defense, such person must have made all appropriate inquiries on or before the date of purchase. Furthermore, the all appropriate inquiries must not have resulted in knowledge of the contamination. If it does, then such person did "know" or "had reason to know" of contamination and would not be eligible for the innocent landowner defense.

Landowner Liability Protections (LLPs) - landowner liability protections under CERCLA; these protections include the bona fide prospective purchaser liability protection, contiguous property owner liability protection, and innocent landowner defense from CERCLA liability. See 42 U.S.C. §§9601(35)(A), 9601(40), 9607(b), 9607(q), 9607(r).

material threat - a physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the *environmental professional*, is threatening and might result in impact to public health or the environment.

migrate/migration - refers to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.

petroleum products - those substances included within the meaning of the petroleum exclusion to CERCLA, 42 U.S.C. § 9601(14), as interpreted by the courts and EPA, that is: petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous

substance under Subparagraphs (A) through (F) of 42 U.S.C. § 9601(14), natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).

property use limitation - limitation or restriction on current or future use of a property in connection with a response to a release, in accordance with the applicable regulatory authority or authorities that allows hazardous substances or petroleum products to remain in place at concentrations exceeding unrestricted use criteria.

recognized environmental condition (REC) - (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

safety data sheets - written or printed material that is prepared by chemical manufacturers and importers for distributors and employers use that provides comprehensive information regarding a hazardous chemical pursuant to OSHA's Hazard Communication Standard (HCS), 29 C.F.R. § 1910.1200.

significant data gap - a data gap that affects the ability of the *environmental professional* to identify a REC.

site reconnaissance - that part that is contained in ASTM Standard Practice E1527-21 Section 9 of this practice and addresses what should be done in connection with the site visit. The site reconnaissance includes, but is not limited to, the site visit done in connection with such a Phase I ESA.

site visit - the visit to the property during which observations are made constituting the site reconnaissance section of this practice.

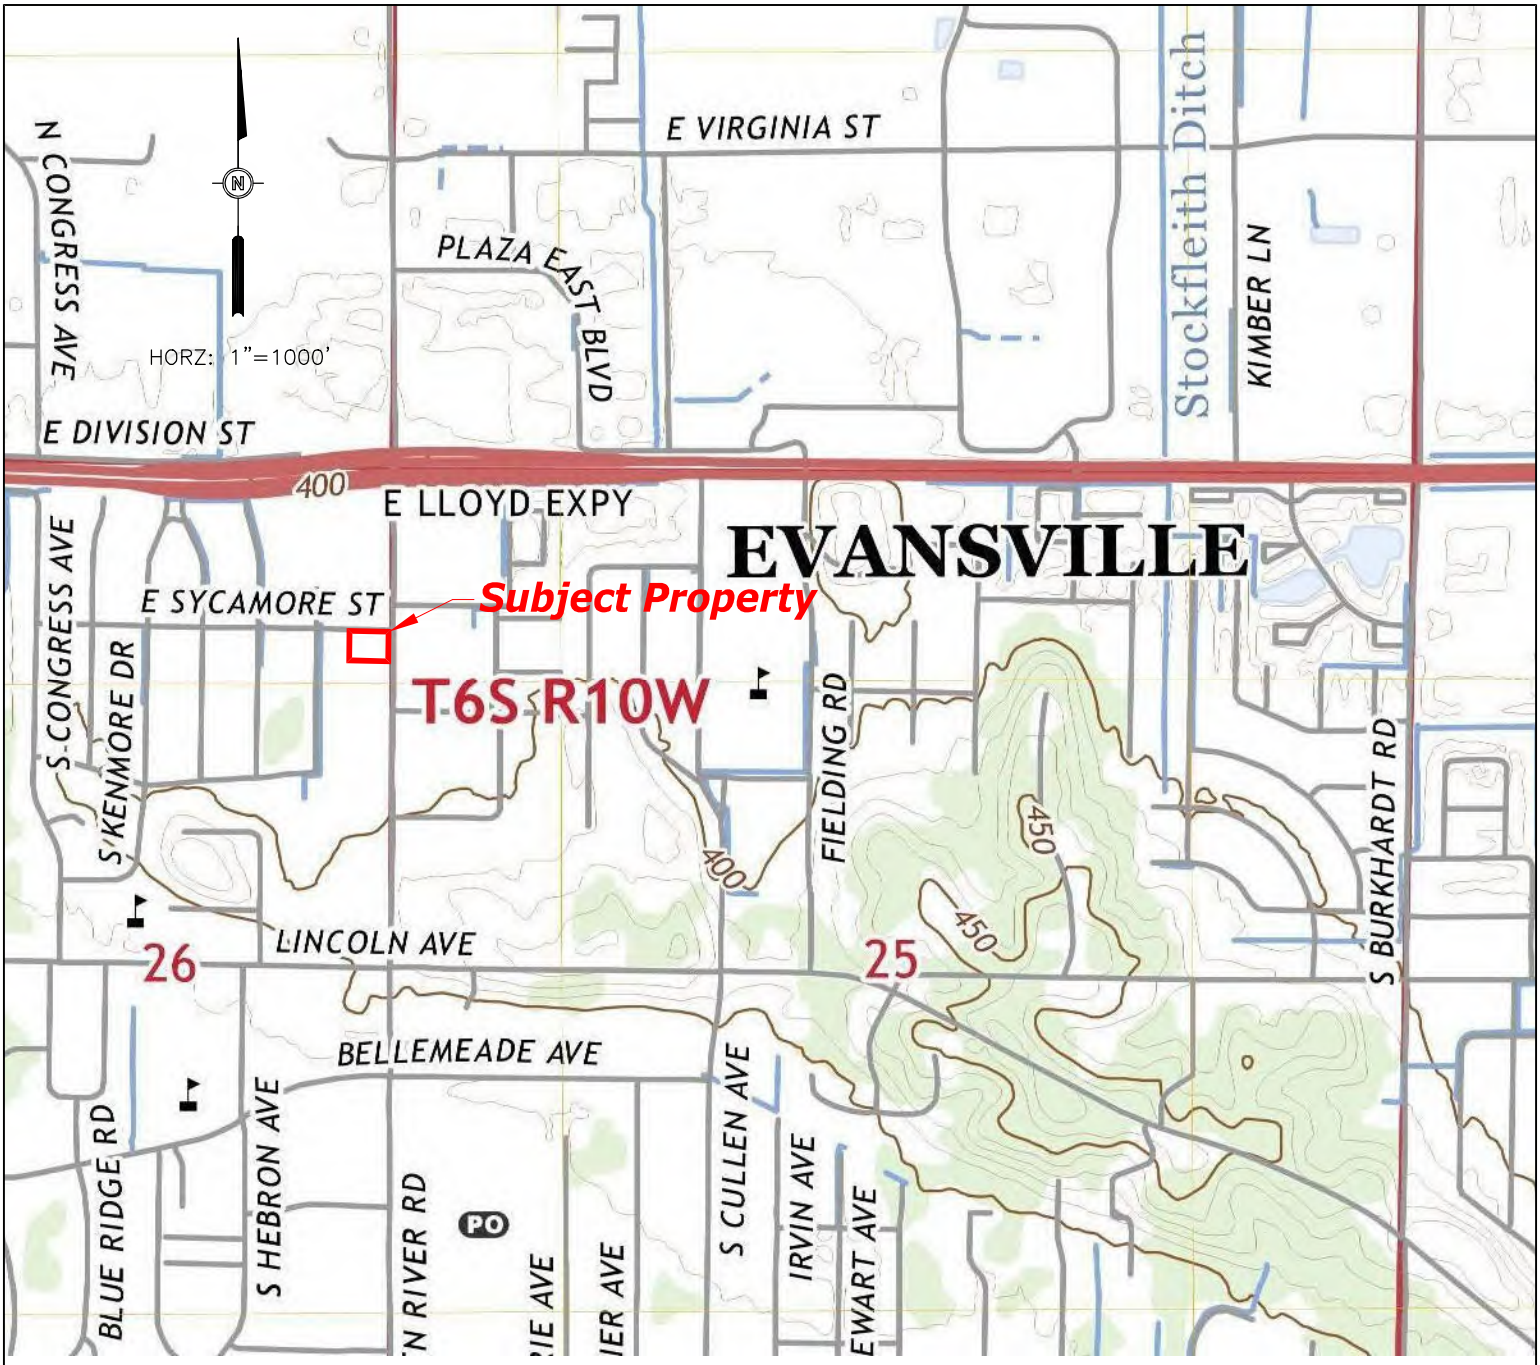

Subject Property - the property that is the subject of the environmental site assessment described in Section 2.1 that is the subject of this Phase I ESA report.

USGS 7.5 Minute Topographic Map - USGS Topographic Map, including the current US Topo 7.5-Minute Series or the historical 7.5-Minute Topographic Series, which is available from the United States Geologic Survey and showing the subject property.

visually and/or physically observed - during a site visit pursuant to this practice, this term means observations made by visual, auditory, or olfactory means while performing the site reconnaissance.

TRUSTEE'S DEED

THIS INDENTURE WITNESSETH, that Brent A. Raibley, Co-Trustee of the Parvin R. Raibley Trust Agreement dated May 22, 1980 and Brian L. Raibley, Co-Trustee of the Parvin R. Raibley Trust Agreement dated May 22, 1980, of Vanderburgh County, Indiana ("Grantor"), **CONVEYS** to Hira, Inc., an Indiana corporation, with its principal office and place of business in Vanderburgh County, Indiana ("Grantee(s)"), for the sum of Ten And No/100 Dollars ($10.00) and other valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the following-described real estate located in Vanderburgh County, Indiana, to-wit:

Lot Four-A (4-A) and Lot Five-A (5-A) in Harrison Village, an Addition to the City of Evansville as per the re-plat thereof recorded in Plat Book L, Page 171 in the Office of the Recorder of Vanderburgh County, Indiana.

Parcel ID: 82-06-26-013-180.001-027 and 82-06-26-013-180.002-027

Subject to Taxes for the year 2020 and thereafter, and subject to all easements, restrictions, rights-of-way and public roadways of record.

TO HAVE AND TO HOLD said Real Estate to the said Grantee(s) and said Grantee(s) heirs and assigns forever; and said Trustee, as Grantor, and not for itself/himself/herself individually, covenants that the Real Estate is free of any encumbrance made or suffered by said Grantor [except as noted above], and that said Grantor shall warrant and defend the same to said Grantee(s) and said Grantee(s) heirs and assigns forever, against the lawful claims and demands of all persons claiming by, through or under the said Grantor, but against none other.

The undersigned hereby certify(ies) that (a) he/she/they is/are the duly appointed and acting Trustee(s) as stated in the Trust; (b) the Trust is a continuing trust since the date noted above and is actively administered by the undersigned as Trustee(s); (c) the undersigned has/have the power to sell, transfer and convey the Real Estate without petitioning any Court or seeking the approval of any Court as provided under the said Trust granting him/her/they all powers under Indiana Code Section 30-4-3-3 (d) the Trust has not been amended since its execution and is in full force and effect; and (e) that the Real Estate has not been withdrawn as an asset of the Trust.

QUITCLAIM DEED

THIS INDENTURE WITNESSETH, that **Parvin R. Raibley and Mary H. Raibley,** husband and wife, of Vanderburgh County, State of Indiana ("Grantors"), for the sum of Ten Dollars ($10.00) and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, hereby **QUITCLAIM** an undivided one-half (½) interest to **Parvin R. Raibley, Trustee of the Parvin Raibley Trust Agreement dated May 22, 1980,** and an undivided one-half interest (½) to **Mary Helen Raibley, Trustee of the Mary Helen Raibley Trust Agreement dated May 22, 1980,** each undivided one-half (½) interest to be held with the other undivided one-half (½) interest as tenants in common ("Grantees"), the following described real estate situate in Vanderburgh County, Indiana, to-wit:

Lot Four (4) and the adjoining North Forty (40) feet of Lot Five (5) in Harrison Vill age, an Addition to the City of Evansville as per plat thereof, recorded in Plat Book J, Page 161, in the office of the Recorder of Vanderburgh County, Indiana.

This conveyance is made for the purpose of clarifying and affirming the conveyance of the above-referenced real estate from Grantors to Grantees through the series of three Warranty Deeds, all of which were dated July 8, 1980, and recorded on July 14, 1980, in the Office of the Recorder of Vanderburgh County, Indiana, in Deed Volume 696, Page 173, Deed Volume 696, page 174, and Deed Volume 696, Page 175. Said Deeds were mistakenly recorded in the wrong order, it having been the intent of Grantors to have the deed recorded at Deed Volume 696, Page 175 recorded prior to the deeds recorded at Deed Volume 696, Page 173 and at Deed Volume 696, Page 174.

IN WITNESS WHEREOF, Grantors have executed this Quitclaim Deed this 2nd day of June, 2006.

SUCCESSOR TRUSTEE'S DEED

THIS INDENTURE WITNESSETH, that **Parvin R. Raibley, as Successor Trustee of the Mary Helen Raibley Trust Agreement dated May 22, 1980** ("Grantor"), **GRANTS AND CONVEYS** to **Parvin R. Raibley** ("Grantee"), pursuant to the directions and provisions of said trust and for no other consideration, an undivided one-half (½) interest in the following described real estate located in Vanderburgh County, Indiana, to-wit:

Lot 4-A and Lot 5-A in Harrison Village, an Addition to the City of Evansville as per the re-plat thereof recorded in Plat Book L, Page 171, in the office of the Recorder of Vanderburgh County, Indiana.

The above-described property is also known as Lot Four (4) and the adjoining North Forty (40) feet of Lot Five (5) in Harrison Village, an Addition to the City of Evansville as per plat thereof, recorded in Plat Book J, Page 161, in the office of the Recorder of Vanderburgh County, Indiana.

SUBJECT TO all rights-of-way, restrictions, conditions, covenants, easements and limitations of record, and also to applicable zoning laws, if any.

The purpose of this deed is to convey to Grantee all interest that Grantor may have in the above-described real estate including any interest that Grantor has as a result of that certain Quitclaim Deed by and between Parvin R. Raibley and Mary H. Raibley, husband and wife, as Grantors, and Parvin R. Raibley, Trustee of the Parvin Raibley Trust Agreement dated May 22, 1980, and Mary Helen Raibley, Trustee of the Mary Helen Raibley Trust Agreement dated May 22, 1980, as Grantees, which Quitclaim Deed was recorded June 5, 2006, as Document Number 2006R00019842, in the Office of the Recorder of Vanderburgh County, Indiana. Grantor represents and certifies under oath as follows: Mary Helen Raibley, the Settlor of the Mary Helen Raibley Trust dated May 22, 1980 (hereinafter referred to as the "Trust"), died on November 2, 2009, a resident of Vanderburgh County, Indiana; Grantee is the surviving spouse of said Settlor, this conveyance is being made pursuant to the terms of the Trust; and the estate of Mary Helen Raibley was not of sufficient size to require the payment of any Indiana inheritance tax or federal estate tax or any other state or federal taxes due or payable by reason of the death of Mary Helen Raibley.

Grantor represents and certifies under oath that the undersigned is the duly acting Successor Trustee of the Trust and that the Trust has not been terminated and remains in full force and effect. Grantor further represents and certifies that Grantor has full power and authority to convey title to the above-described real estate without any other action or requirement and that Grantee need not look to the terms of the Trust to determine such authority.

Grantor further warrants that he has not made, done, executed or committed any act or thing whatsoever whereby the above-described real estate, or any part thereof, now or at any time hereafter, shall or may be imperiled, charged, or encumbered in any manner whatsoever. Grantor warrants the title to the above-described real estate only to the extent herein above stated; however, Grantor does hereby assign and transfer unto Grantee the benefit of all warranties in the chain of title to the above-described real estate and any and all rights which may now exist or which may hereafter accrue by reason of or on account of said warranties.

IN WITNESS WHEREOF, Grantor has caused this Successor Trustee's Deed to be executed this 15th day of January, 2010.

CORRECTION
DEED

LICENSED TO VANDERBURGH AND NOT FOR RESALE. NO LICENSE FOR ANY OTHER USE. ISSUE 36-7-10.

THIS INDENTURE WITNESSETH: That Texas Gas Transmission Corporation, a Delaware corporation having an office in Owensboro, Kentucky, does hereby grant, sell, assign, transfer, deliver and convey unto Southern Indiana Gas and Electric Company, a corporation of the State of Indiana having an office in Evansville, Indiana, its successors and assigns, for and in consideration of the sum of One Dollar ($1.00) and other valuable consideration, the receipt of all of which is hereby acknowledged, the following described property in Vanderburgh County, State of Indiana, to-wit:

TRACT 1: A certain ten and three-fourths (10-3/4) inch O.D. gas transmission pipe line, beginning at the connection thereof with the natural gas transmission distribution and service pipeline of the grantee, Southern Indiana Gas and Electric Company at the intersection of Vann Avenue and Division Street Road (Slaughter Avenue) at or near the Southwest corner of Section Twenty-three (23) Township Six (6) South, Range Ten (10) West, Vanderburgh County, Indiana, and extending thence Eastwardly within the boundary of Division Street Road to a point approximately six hundred sixty (660) feet East of the Southwest corner of the Southeast quarter of said Section Twenty-three (23), immediately East of a four (4) inch tap installed on said pipeline for use of the grantee in serving gas to Iroquois Garden Subdivision of the City of Evansville, Indiana, a total distance of three thousand three hundred (3,300) feet.

TRACT 2: A certain ten and three-fourths (10-3/4) inch O.D. gas transmission pipeline commencing in Division Street Road approximately six hundred sixty (660) feet east of the southwest corner of the southeast quarter of Section Twenty-three (23), Township Six (6) South, Range Ten (10) West, at the point of connection with the gas distribution system of the Southern Indiana Gas and Electric Company at the junction of Division Street Road and Congress Avenue and running thence eastwardly in said road approximately one thousand five hundred five (1505) feet; thence continuing eastwardly across the Hirsch Heirs farm

(37)

in the East half of the Northeast quarter of the Northeast quarter of Section Twenty-six (26), Township Six (6) South, Range Ten (10) West, to the east line of said section, crossing Green River Road and continuing eastwardly across the one and thirty-six hundredths (1.36) acre tract which the Southern Indiana Gas and Electric Company purchased from Elizabeth Weinsheimer in the northwest corner of the Northwest quarter of Section Twenty-five (25), said township and range, to the outlet of Texas Gas Transmission Corporation's Division Street Road Metering Station on said land through which gas is measured to the Southern Indiana Gas and Electric Company, a total distance of two thousand one hundred seventy-five (2,175) feet, more or less;

including:

VOL 343 PAGE 251

1. Right of Way Agreement granted by Gertrude Hirsch, et al., to Kentucky Natural Gas Corporation on December 17, 1935, covering the East half of the Northeast quarter of the Northeast Quarter of Section Twenty-six (26), Township Six (6) South, Range Ten (10) West, recorded in Deed Book 185, page 464, Vanderburgh County Recorder's Office; and

2. A part of the Right of Way Agreement which was granted December 11, 1935, by Elizabeth Weinsheimer, a widow, covering a part of the Northwest quarter of Section Twenty-five (25), Township Six (6) South, Range Ten (10) West, and recorded in Deed Book 185, page 314, Vanderburgh County Recorder's Office. That part of the above mentioned right of way herein assigned is limited to the one and thirty-six hundredths (1.36) acre tract of land which was purchased by Southern Indiana Gas and Electric Company from Elizabeth Weinsheimer;

together with all of the Grantor's franchise rights, permits, grants and easements now used as a part of or in connection with the said ten and three-fourths (10-3/4) inch O.D. pipeline only insofar, however, as they pertain to the segment of pipeline covered by this agreement and the right or privilege to operate said pipeline.

The grantor represents and warrants that said franchise rights, permits, grants, rights of way and easements were conveyed and assigned to Kentucky Natural Gas Corporation by a Special Master's Deed dated November 28, 1933, and recorded in Deed Record 179, pages 285 to 307 thereof in the office of the Recorder of Vanderburgh County, Indiana,

(38)

and conveyed and assigned by said Kentucky Natural Gas Corporation to the grantor by conveyance, bill of sale, and assignment dated April 5, 1948 and recorded in Deed Record 293, page 306 in the office of the Recorder of Vanderburgh County, Indiana.

The grantor further represents and warrants that, by this conveyance and by a conveyance dated April 9, 1937, recorded in Deed Record 192, page 573 and a conveyance dated July 13, 1946, recorded in Deed Record 287, page 502 in the office of the Recorder of Vanderburgh County, Indiana, the grantor and its predecessor, Kentucky Natural Gas Corporation, have conveyed and assigned and do hereby convey and assign to grantee all their right, title and interest in and to a ten and three-fourths (10-3/4) inch O.D. gas transmission pipeline commencing at the connection thereof with the natural gas transmission, distribution and service pipeline of the grantee, Southern Indiana Gas and Electric Company, at the intersection of Weinbach Avenue and Division Street (Slaughter Avenue), Evansville, Indiana, and extending eastwardly to the outlet of Texas Gas Transmission Corporation's Division Street Road Metering Station through which gas is measured to the Southern Indiana Gas and Electric Company, which metering station is located east of Green River Road on a one and thirty-six hundredths (1.36) acre tract in the northwest corner of the northwest quarter of Section Twenty-five (25), Township Six (6) South, Range Ten (10) West in Vanderburgh County, Indiana, and which tract was purchased from Elizabeth Weinsheimer by Southern Indiana Gas and Electric Company.

This conveyance is made for the purpose of correcting the description of that part of the above described property designated Tract One (1), contained in a conveyance from the grantor's predecessor, Kentucky Natural Gas Corporation, to the grantee herein, dated July 13, 1946, and recorded in Deed Record 287, page 502 in the office of the Recorder of Vanderburgh County, Indiana, and it is further made for the purpose of correcting the description of that part of the above described property designated as Tract Two (2) contained in a conveyance from the grantor to the grantee herein, dated December 9, 1952, and recorded in Deed Record 342, page 347 in the office of the Recorder of Vanderburgh County, Indiana. The above described property was described in said conveyances

as being located in Range Nine (9) West, whereas in truth and fact said property is located in Range Ten (10) West, it having been the intention of the grantor in executing and delivering, and of the grantee in accepting, said prior deeds that the property intended to have been conveyed be described as it is hereinabove described. (59)

IN TESTIMONY WHEREOF, Witness the signature of Texas Gas Transmission Corporation by its Vice President, attested by its Assistant Secretary, this the 12th day of January, 1953.

AGREEMENT FOR RIGHT OF WAY

VOL. 185 PAGE 464 34659

(42)

This agreement made and entered into this 17th of December 1934

by and between Gertrude Hirsch (widow) Amelia Hirsch (single) Stella Braswell (widow) Louise Leet & Perry Leet her husband Lee Hirsch & Marie Hirsch his wife, Mathilda Pugh & William Pugh her husband

of Evansville, RR 3, State of Indiana, parties

Postoffice Street or Route #

of the first part, and the Kentucky Natural Gas Company, a Corporation, with offices in Owensboro, Kentucky, party of the second part.

WITNESSETH: that for and in consideration of One Dollar, to ~~us~~ ~~paid~~ in hand paid, the receipt of which is hereby acknowledged, and the further consideration of Twenty Five Cents per rod, to be paid when the pipe line or lines hereinafter specified are laid, the parties of the first part, do hereby grant and convey unto the party of the second part, its successors and assigns, a Right of Way to lay, maintain, alter, repair, operate and remove pipe lines and from time to time parallel lines, drips, gates, ~~telegraph and telephone lines~~ and all appurtenances convenient for the transportation of oil, gas or other substances over and through the following premises located in the County of Vanderburgh State of Indiana, to-wit:

E½ of NE¼ of NW¼ of Sec. 21 Twp. 6 S. R 10 W.

with full rights of ingress and egress for said purposes.

Said sum is acknowledged as full consideration of the Right of Way. Should an additional or parallel line be laid at any time, the following schedule shall be paid for each line so laid. Namely: 2-inch, ten cents per rod; 3-inch, fifteen cents per rod; 4-inch, twenty cents per rod; 6-inch and over, twenty-five cents per rod. All damage occasioned by the installation of the first line or by making future repairs or in removing said property, or by laying, repairing or removing other lines, drips and gates, shall be paid by grantee after the damage is done; said damages if not mutually agreed upon, to be ascertained and determined by three disinterested persons, one to be appointed by the grantor, one by the grantee, and the third by the two so appointed; and the written award of such three persons, or the majority of them, shall be final and conclusive.

The parties of the first part covenant that they are seized and possessed of the above described real estate by good and sufficient unencumbered title in fee simple; that they have full right to execute this agreement and to receive and retain the consideration therefor.

All portions of this agreement other than the printed portions are subject to the acceptance or rejection of the part hereof of the second part by its president, vice-president or secretary. This entire contract shall be deemed however to have been accepted by the second party unless notice of its rejection shall be given to the first parties by registered mail at the address herein given within sixty days after the date hereof.

IN WITNESS WHEREOF, the parties of the first part have hereunto affixed their signatures, the day and year first above written.

CWA Project Number: 24-6240

To qualify for one of the *Landowner Liability Protections* (*LLPs*) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the User must conduct the following inquiries by 40 C.F.R. §§ 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees (if applicable). The User should provide the following information to the *Environmental Professional*. Failure to conduct these inquiries could result in a determination that "*All Appropriate Inquiries*" is not complete. Cash Waggner & Associates, PC (CWA) CWA makes no representations or warranties regarding a User's qualification for protection under federal, state, or local laws or regulations.

For those parties intending to rely on this Phase I ESA report, please review and complete this questionnaire and return to CWA prior to issuance of the report.

Environmental liens that are filed or recorded against the Subject Property (40 C.F.R. § 312.25).
Did a search of land title records (or judicial records where appropriate) identify any environmental liens against the Subject Property that are filed or recorded under federal, tribal, state or local law?
Yes ☐ No ☒ If yes, please provide further detail below.

Activity and land use limitations (AULs) that are in place on the Subject Property or that have been filed or recorded against the Subject Property.
Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the Subject Property and/or have been filed or recorded in a registry under federal, tribal, state or local law? Yes ☐ No ☒ If yes, please provide further detail below.

Specialized knowledge or experience of the person seeking to qualify for the Landowner Liability Protections (40 CFR § 312.28).
Do you have any specialized knowledge or experience related to the Subject Property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Subject Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? Yes ☐ No ☒ If yes, please provide further detail below.

USER QUESTIONNAIRE

Relationship of the purchase price to the fair market value of the Subject Property if it were not contaminated (40 CFR § 312.29)

Does the purchase price being paid for this Subject Property reasonably reflect the fair market value of the Subject Property? Yes ☒ No ☐ If yes, please provide further detail below.

Asking Price $425,000.00.

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Subject Property?
Yes ☐ No ☒ If yes, please provide further detail below.

Commonly known or reasonably ascertainable information about the Subject Property (40 CFR § 312.30)

Are you aware of commonly known or reasonably ascertainable information about the Subject Property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases? For example,

Do you know the past uses of the Subject Property?
Yes ☐ No ☒ If yes, please provide further detail below.

Undeveloped and wooded land

Do you know of specific chemicals that are present or once were present at the Subject Property?
Yes ☐ No ☒ If yes, please provide further detail below.

Do you know of spills or other chemical releases that have taken place at the Subject Property?
Yes ☐ No ☒ If yes, please provide further detail below.

Do you know of any environmental cleanups that have taken place at the Subject Property?
Yes ☐ No ☒ If yes, please provide further detail below.

USER QUESTIONNAIRE

The degree of obviousness of the presence or likely presence of contamination at the Subject Property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)
Based on your knowledge and experience related to the Subject Property, are there any obvious indicators that point to the presence or likely presence of contamination at the Subject Property?
Yes ☐ No ☒ If yes, please provide further detail below.

In addition, please provide the requested information below to assist the Environmental Professional with the completion of this Phase I ESA.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 09/25/2024 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal brownfield sites

IN BROWNFIELDS: >A brownfield site is an industrial or commercial property that is abandoned, inactive, or underutilized, on which expansion or redeveloopment is complicated due to the actual or perceived environmental contamination.

A review of the IN BROWNFIELDS list, as provided by EDR, and dated 08/02/2024 has revealed that there is 1 IN BROWNFIELDS site within approximately 0.5 miles of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/03/2024 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 10 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 6 UST FINDER sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D006
Waste Description:	Cadmium
Waste Code:	D008
Waste Description:	Lead
Waste Code:	D018
Waste Description:	Benzene
Waste Code:	D039
Waste Description:	Tetrachloroethylene
Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F004

KENNY KENT AUTOPLAZA (Continued) **1000510877**

Waste Description: The Following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
Indiana's Tools For Environmental Management and Protection Organizations (IN-TEMPO) is Indiana's integrated environmental management system.
The Indiana Department of Environmental Management (IDEM) implemented the Indiana Facility Registry System (I-FRS), which provides an interface and processes to link facility data monitored by multiple state and EPA program systems. In addition, I-FRS enables IDEM to reconcile environmental data and exchange it with EPA FRS using the electronic data exchange over the network node.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
Indiana's Tools For Environmental Management and Protection Organizations (IN-TEMPO) is Indiana's integrated environmental management system.
The Indiana Department of Environmental Management (IDEM) implemented the Indiana Facility Registry System (I-FRS), which provides an interface and processes to link facility data monitored by multiple state and EPA program systems. In addition, I-FRS enables IDEM to reconcile environmental data and exchange it with EPA FRS using the electronic data exchange over the network node.

SRG GLOBAL TRIM, LLC (Continued) **1000463837**

Waste Code:	D008
Waste Description:	Lead
Waste Code:	D009
Waste Description:	Mercury
Waste Code:	D018
Waste Description:	Benzene
Waste Code:	D035
Waste Description:	Methyl Ethyl Ketone
Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F006
Waste Description:	Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.
Waste Code:	F007
Waste Description:	Spent Cyanide Plating Bath Solutions From Electroplating Operations.
Waste Code:	F008

SRG GLOBAL TRIM, LLC (Continued) **1000463837**

Waste Description: Plating Bath Residues From The Bottom Of Plating Baths From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Description: Spent Stripping And Cleaning Bath Solutions From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: F017
Waste Description: Not Defined

Waste Code: F018
Waste Description: Not Defined

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U220
Waste Description: Benzene, Methyl- (Or) Toluene

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

City,State,Zip: EVANSVILLE, IN 47716
Facility ID: 199106174
Incident Date: 06/21/1991
Report Date: 06/21/1991
Material: "Chromiun, Nickel, Copper"
Spill Source: Industrial
Recovered Amount: 0
Recovered Units: Gallons
Spilled Amount: 0
Spilled Units: Gallons
Contained: Y
Water Affected: Ground
Spill Type: Spill
Area Affected: Undetermined
Fish Killed: 0
Water Supply Affected: Not reported
Public Intake: N
Incident Status: Not reported

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain

SRG GLOBAL TRIM, LLC (Continued) **1000463837**

enforcement data with a single repository for that information.
Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
Indiana's Tools For Environmental Management and Protection Organizations (IN-TEMPO) is Indiana's integrated environmental management system.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Indiana Department of Environmental Management (IDEM) implemented the Indiana Facility Registry System (I-FRS), which provides an interface and processes to link facility data monitored by multiple state and EPA program systems. In addition, I-FRS enables IDEM to reconcile environmental data and exchange it with EPA FRS using the electronic data exchange over the network node.
CEDRI is a web application used by EPA programs and various stakeholders to manage environmental data transmitted to EPA in order to meet EPA's reporting requirements.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/25/2024

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 06/07/2024

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

SHWS: List of Hazardous Waste Response Sites Scored Using the Indiana Scoring Model

List of hazardous waste response sites scored utilizing the Indiana Scoring Model. The Indiana Scoring Model is a method of prioritizing, for state response actions, those hazardous substances response sites which are not on the National Priorities List. The ISM serves as the Commissioners management tool to address those sites which pose the most significant threat to human health and the environment in addition to assuring the departments resources are allocated accordingly.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

SPILLS 80: SPILLS80 data from FirstSearch
Spills 80 includes those spill and release records available from FirstSearch databases prior to 1990. Typically, they may include chemical, oil and/or hazardous substance spills recorded before 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 80.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/05/2024
Date Data Arrived at EDR: 08/06/2024

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Version Date:	2022
Southwest Map:	50023336 EVANSVILLE SOUTH, IN
Version Date:	2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

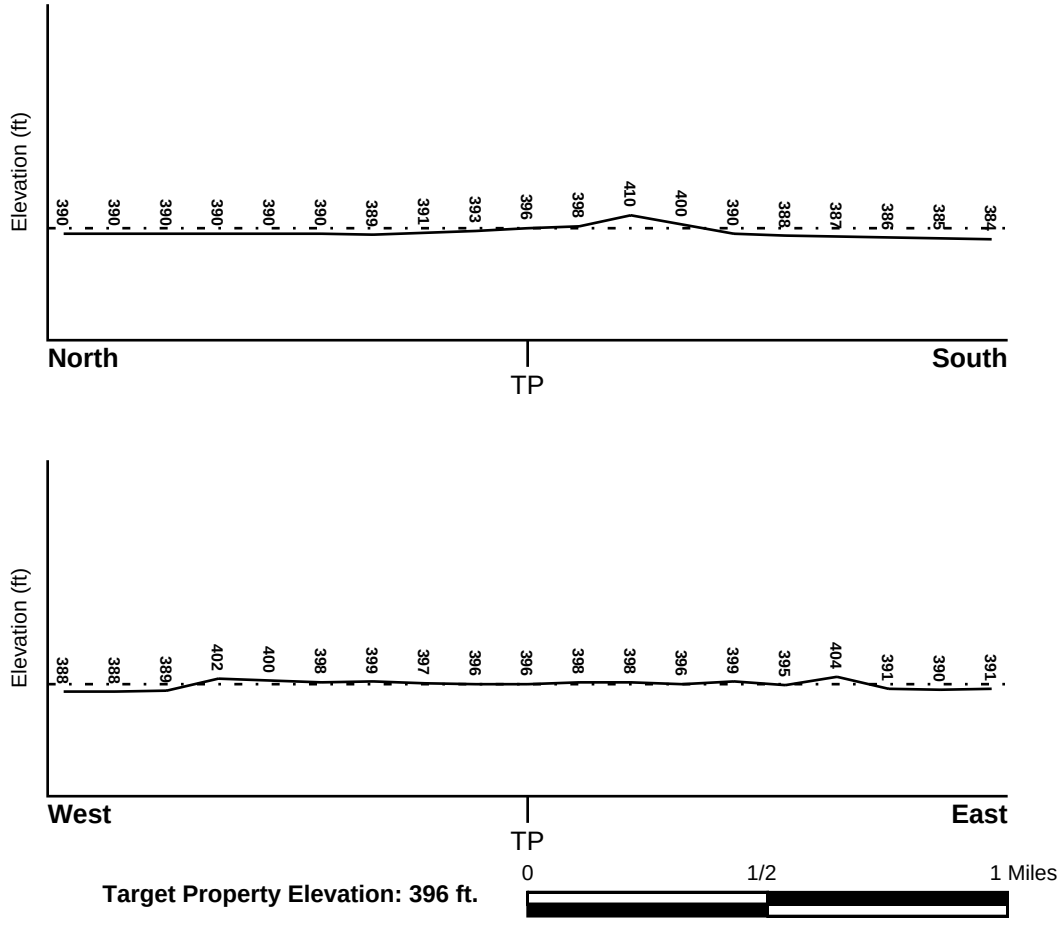

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
21101C0105E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
18163C0182D	FEMA FIRM Flood data
18163C0185D	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NEWBURGH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Ragsdale

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 5 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14.11 Min: 4.23	Max: 8.4 Min: 7.4
2	9 inches	20 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14.11 Min: 4.23	Max: 8.4 Min: 7.4
3	20 inches	55 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14.11 Min: 4.23	Max: 8.4 Min: 7.4

Soil Layer Information

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	22 inches	38 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4.23 Min: 1.41	Max: 8.4 Min: 7.4
2	0 inches	9 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4.23 Min: 1.41	Max: 8.4 Min: 7.4
3	9 inches	22 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4.23 Min: 1.41	Max: 8.4 Min: 7.4
4	38 inches	57 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4.23 Min: 1.41	Max: 8.4 Min: 7.4
5	57 inches	70 inches	stratified silt loam to silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4.23 Min: 1.41	Max: 8.4 Min: 7.4

Soil Map ID: 6

Soil Component Name: Muren

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 46 inches

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: US Fish & Wildlife Service
Telephone: 703-358-2171

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Cash Waggner & Associates, PC were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

ABOUT

As a Senior Project Manager, Brian has over 19 years' experience encompassing a variety of projects in the State of Indiana, Illinois, Kentucky, and Tennessee. Project expertise includes EPA and IFA Brownfield management through community partnerships, Phase I Environmental Site Assessments (ESAs), Phase II subsurface investigations, soil and groundwater remediation, underground storage tank (UST) closure, and building sciences. Brian has investigated a wide variety of projects related to industrial/commercial properties, schools, hospitals, gasoline stations, refineries, and many blighted properties. Other experience in variable fields includes sinkhole remediation, geotechnical consulting services, construction materials testing, and soils and concrete lab testing with respect to ASTM and AASHTO guidelines. Brian has demonstrated the ability to provide solutions to projects while maintaining client costs.

EXPERIENCE

Brownfield Site Assessments and Remediation, Indiana Finance Authority and U.S. EPA, Indiana

Brian has extensive experience with various brownfield grants and projects utilizing State and Federal funding sources. Duties include grant writing assistance, managing grant funds and project schedules as well as completing Quality Assurance Project Plans (QAPPs), sampling and analysis plans (SAPs), remediation work plans, and providing client assistance for necessary grant reporting requirements. Brian has provided technical and planning assistance to local governments, regional planning districts, and the general public regarding local brownfield efforts. Brian has provided project management duties for the completion of many brownfield projects that included Phase I ESAs, Phase II site investigations, UST closures, building evaluations, and supplemental services. Types of brownfield projects have included (but not limited to) old schools, hospitals, jails, abandoned manufacturing facilities, oil refineries, dry-cleaning facilities, gasoline stations, and various commercial/industrial buildings. Brian has helped author many successful U.S. EPA Brownfield Grant Applications for assessment and cleanup for various governments throughout Indiana. Brian has always been proactive in presenting potential brownfield sites to local governments for establishing and maintaining and inventory.

BRIAN L. KLEEMAN, LPG

Senior Project Manager

Phase I ESA and Phase II Subsurface and Hydrogeologic Investigations, Confidential Clients, Indiana, Illinois, and Kentucky

Brian has performed 100s of Phase I ESAs all across the U.S. and is well-versed with the current ASTM E1527-21 Standard, All Appropriate Inquiry (AAI) Final Rule (40 CFR Part 312), CERCLA liability protection guidelines, site investigation, regulatory review, historical and background research, environmental lien research, and developing reports to meet client needs. Site investigations include searching for *recognized environmental conditions* and inclusion of ASTM Non-Scope Conditions including potential asbestos, lead-based paint, mold, and emergency contaminants, (i.e., PFAs, PFOS, etc.) that are client-driven. Brian has performed and managed various Phase II subsurface investigation activities that included: health and safety plan overview, subsurface utility planning, well surveying, subsurface boring logs, soil classification and field screening, monitoring well installation and development, soil gas testing, and soil and groundwater sampling. Brian has worked with many laboratories for various analytical methods, and follows appropriate chain of custody protocols to meet quality assurance requirements.

Site Remediation, Confidential Clients, Indiana and Kentucky

Brian has worked with complex remediation projects and has worked with regulators, remediation contractors to ensure appropriate corrective measures are being implemented to facilitate cleanup of contaminated soils and groundwater. Brian has worked on several technologies including the following corrective active measures:

- In-Situ Chemical Oxidation (ISCO)
- Soil Vapor Extraction (SVE) and Air Sparge Remediation Systems
- Ex-Situ Soil Excavation and Disposal
- UST Closure

Groundwater Monitoring, Confidential Clients, Indiana and Kentucky

Brian has performed groundwater sampling activities using various sampling techniques for a wide variety of sites in Indiana, Illinois and Kentucky. Monitoring activities include checking groundwater parameters (temperature, pH, dissolved oxygen, oxidation reduction potential, etc.) using a multi-meter and sample collection using dedicated disposable bailers and low flow methodologies, bladder pumps, and peristaltic pumps.

Asbestos Investigation and Abatement Oversight, Confidential Clients, Indiana, Kentucky, and Illinois

Brian is a licensed asbestos building inspection in Indiana and Illinois, and has performed various asbestos investigations on several project types including brownfield sites, residential, commercial, and industrial facilities. Duties included the identification and sampling of suspect asbestos-containing materials (ACMs), determination of homogeneous areas (HAs), and sample collection for analysis using appropriate chain of custody documentation, and report writing.

BRIAN L. KLEEMAN, LPG

Senior Project Manager

Vapor Evaluation and IAQ Monitoring, U.S. EPA and Indiana Brownfields and Confidential Clients, Southern Indiana

Brian has implemented vapor intrusion evaluations for many of his projects in Indiana and Kentucky. Soil gas testing using exterior soil gas ports, the collection of sub-slab samples, and indoor air quality (IAQ) surveys for businesses, brownfield sites, and residences. Brian has been on the forefront with communicating site access agreements and results to property owners. Brian has also conducted employee monitoring for a barge off-loading facility that specialized in the offloading of silicon and metal alloys, including personnel air sampling (i.e., pumps, rotameter, etc.) around employee work zones in order to determine exposure levels of the on-site airborne dust. Brian has completed hazardous safety and prevention workplans regarding exposure scenarios, permissible time limits and required personal protective equipment for the employer.

Landfill Operations, Confidential Clients, Indiana

Performed quality control inspections associated with landfill operations. Duties included oversight and permeability testing to determine appropriate density/moisture values for clay liner construction for municipality landfills and ash pond basins. Brian has also attributed to long-term groundwater monitoring and planning regarding active landfills, and post-closure monitoring to maintaining existing landfill caps, vegetation, and erosion control design.

Geotechnical Services, Confidential Clients, Kentucky and Tennessee

Performed oversight of drill crews involved with interstate and highway projects. Project management of drill crews included boring layout, surveying, soil and rock core sampling, logging the subsurface, rock quality designation, and interpretation of highway profiles, site grading plans, boring layout, and cross-section analysis. Other duties included geotechnical exploration, electrical resistivity operations, and report writing for in Kentucky and Tennessee including restaurants and other commercial facilities.

Drilled Shaft Inspection, INDOT I-69, Southern Indiana

Brian has extensive experience in drilled shaft inspection for Interstate I-69 for the bridge over Patoka River Floodplain near Oakland City, Indiana. Brian worked closely with INDOT and bridge contractors to monitor caisson drilling activities, soil classification, drilled shaft installation, concrete placement procedures, and interpretation of shaft details and profiles.

Construction Materials Testing, Confidential Clients, Indiana, Illinois, Kentucky, and Tennessee

Performed concrete inspection and testing, footing inspection, reinforcement steel inspection, masonry inspection, proof-rolling, and density testing of construction materials. Project types inspected include industrial facilities, vocational and public schools, commercial buildings, highways, and parking lots. Project types also included the development of berms and slopes.

ABOUT

Tristan is a geology graduate from the University of Southern Indiana. During her time with Cash Waggner & Associates, PC (CWA), Tristan has been responsible for Phase I Environmental Site Assessments (ESAs), Phase II subsurface investigations, underground storage tank closure/removal soil and groundwater sampling, soil classification, utility location and redirection, asbestos surveys, lead inspections, and technical report writing. Tristan has received passing scores on the National Association of State Boards of Geology (ASBOG) Fundamentals of Geology (FG) and Practice of Geology (PG) exams and intends to apply for licensure following the acquisition of the required amount of experience.

BACKGROUND

Education and Research

Tristan earned a B.S. in Geology from the University of Southern Indiana (USI) in May of 2023. During her time at USI, she completed coursework in hydrogeology, mineralogy, soils, sedimentology and stratigraphy, igneous and metamorphic petrology, earth structure, paleontology, AcrGIS, meteorology, and advanced environmental geology. Tristan's capstone project focused on the environmental consequences of bituminous coal mining in southwestern Indiana, and its effect on the health and safety of those living there. She was also an Endeavor Grant recipient for research completed in the Pacific Northwest. Grant funds were utilized primarily for carbon dating charcoal samples collected from the research area. Tristan presented the abstract titled "Seize the Day: Opportunistic Undergraduate Research of Volcaniclastics Collected During a Field Trip to Crater Lake National Park, Oregon" at the University of Southern Indiana's Endeavor Symposium. The abstract was also presented at the Geological Society of America's 2024 Joint Cordilleran/Rocky Mountain Section Meeting in Spokane, Washington by Dr. Jim Durbin.

EXPERIENCE

Brownfield Site Inventory, Assessment, and Remediation, Indiana Finance Authority and U.S. EPA, Indiana

Tristan has performed, or provided oversite for, the completion of many

TRISTAN J. NORMAN, GIT

Field Geologist

Brownfields projects including Phase I ESAs, Phase II site investigations, UST closures, asbestos surveys, lead inspections, and remediation activities. Brownfields site types have included (but are not limited to) abandoned manufacturing facilities, hospitals, gas stations, dry cleaning facilities, and commercial buildings. Tristan is also experienced in identifying potential Brownfield sites through community search, providing inventory for sites which may be eligible for subsequent assessment and remediation.

Phase I Environmental Site Assessments, Indiana, Illinois, and Michigan

Tristan has completed many Phase I ESAs in compliance with current ASTM E1527-21 standards. She has conducted site investigations, historical and background research, regulatory review, and environmental lien search, and written the accompanying Phase I reports to meet the needs of clients. Site investigations include searching for *recognized environmental conditions* and ASTM Non-Scope Conditions including potential asbestos, lead based paint, and mold.

Phase II Subsurface and Hydrogeologic Investigations, Indiana and Kentucky

Tristan has been responsible for Phase II subsurface investigation activities including oversight of utility location, soil boring placement, oversight of soil borings/temporary groundwater well installation, soil and groundwater sampling, soil classification, hydrogeologic investigations, soil gas testing, soil boring logs, and UST closures. Tristan has worked with laboratories using appropriate chain of custody protocols to acquire various laboratory values. Following investigations, Tristan has worked on reports to provide effective communication of results.

Groundwater Monitoring, Indiana and Michigan

Tristan has performed groundwater monitoring and sampling activities for various sites including Indiana Brownfield sites and U.S. Forest Service sites. Monitoring activities include measuring groundwater parameters (temperature, total dissolved solids, total dissolved oxygen, pH, etc.), use of a multi-meter, and desiccant tube replacement and software maintenance on wells with electronic monitors. When sampling is necessary, sampling activities have included collection using dedicated disposable bailers and low flow equipment.

Site Remediation, Indiana

Tristan has worked with abatement contractors during remediation activities related to asbestos and contaminated soils. Tristan has worked on corrective action measures including asbestos abatement, ex-situ soil excavation and disposal, application of oxygen reducing compound (ORC), UST closure/removal, and PCB removal.

Vapor Evaluation, Indiana and Illinois

Tristan has implemented vapor intrusion evaluations for many projects in Indiana and Illinois. Vapor evaluations have included soil gas using exterior soil has ports, sub-slab vapor evaluation using vapor pin systems, and indoor air quality for businesses and brownfield sites.

CONSULTING ▪ ENGINEERING ▪ SURVEYING
ECOLOGICAL ▪ ENVIRONMENTAL

TRISTAN J. NORMAN, GIT

Field Geologist

Asbestos Investigation, Indiana

Tristan is an Indiana licensed asbestos inspector and has completed asbestos investigations related to Brownfield sites and commercial facilities. Duties included identification and sampling of suspect asbestos-containing materials (ACMs), determination of homogeneous areas (HAs), sample collection for analysis using appropriate chain of custody documentation, and punctual and effective technical report writing. Tristan has also provided oversite for clearance sampling of outdoor air following remediation.

Lead Investigation, Indiana

Tristan is an Indiana licensed lead inspector and lead risk assessor. She is qualified to inspect, assess, and suggest remediation activities for HUD properties, child occupied facilities, and other target housing in addition to commercial properties. Tristan has completed multiple investigations using a portable XRF to evaluate the presence of lead based paint at sites.

United States Department of Agriculture

NRCS

Natural Resources Conservation Service

A product of the National Cooperative Soil Survey, a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local participants

Custom Soil Resource Report for Vanderburgh County, Indiana

November 15, 2024

Preface

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (https://offices.sc.egov.usda.gov/locator/app?agency=nrcs) or your NRCS State Soil Scientist (http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2_053951).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require

alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

How Soil Surveys Are Made

Soil surveys are made to provide information about the soils and miscellaneous areas in a specific area. They include a description of the soils and miscellaneous areas and their location on the landscape and tables that show soil properties and limitations affecting various uses. Soil scientists observed the steepness, length, and shape of the slopes; the general pattern of drainage; the kinds of crops and native plants; and the kinds of bedrock. They observed and described many soil profiles. A soil profile is the sequence of natural layers, or horizons, in a soil. The profile extends from the surface down into the unconsolidated material in which the soil formed or from the surface down to bedrock. The unconsolidated material is devoid of roots and other living organisms and has not been changed by other biological activity.

Currently, soils are mapped according to the boundaries of major land resource areas (MLRAs). MLRAs are geographically associated land resource units that share common characteristics related to physiography, geology, climate, water resources, soils, biological resources, and land uses (USDA, 2006). Soil survey areas typically consist of parts of one or more MLRA.

The soils and miscellaneous areas in a survey area occur in an orderly pattern that is related to the geology, landforms, relief, climate, and natural vegetation of the area. Each kind of soil and miscellaneous area is associated with a particular kind of landform or with a segment of the landform. By observing the soils and miscellaneous areas in the survey area and relating their position to specific segments of the landform, a soil scientist develops a concept, or model, of how they were formed. Thus, during mapping, this model enables the soil scientist to predict with a considerable degree of accuracy the kind of soil or miscellaneous area at a specific location on the landscape.

Commonly, individual soils on the landscape merge into one another as their characteristics gradually change. To construct an accurate soil map, however, soil scientists must determine the boundaries between the soils. They can observe only a limited number of soil profiles. Nevertheless, these observations, supplemented by an understanding of the soil-vegetation-landscape relationship, are sufficient to verify predictions of the kinds of soil in an area and to determine the boundaries.

Soil scientists recorded the characteristics of the soil profiles that they studied. They noted soil color, texture, size and shape of soil aggregates, kind and amount of rock fragments, distribution of plant roots, reaction, and other features that enable them to identify soils. After describing the soils in the survey area and determining their properties, the soil scientists assigned the soils to taxonomic classes (units). Taxonomic classes are concepts. Each taxonomic class has a set of soil characteristics with precisely defined limits. The classes are used as a basis for comparison to classify soils systematically. Soil taxonomy, the system of taxonomic classification used in the United States, is based mainly on the kind and character of soil properties and the arrangement of horizons within the profile. After the soil

scientists classified and named the soils in the survey area, they compared the individual soils with similar soils in the same taxonomic class in other areas so that they could confirm data and assemble additional data based on experience and research.

The objective of soil mapping is not to delineate pure map unit components; the objective is to separate the landscape into landforms or landform segments that have similar use and management requirements. Each map unit is defined by a unique combination of soil components and/or miscellaneous areas in predictable proportions. Some components may be highly contrasting to the other components of the map unit. The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The delineation of such landforms and landform segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, onsite investigation is needed to define and locate the soils and miscellaneous areas.

Soil scientists make many field observations in the process of producing a soil map. The frequency of observation is dependent upon several factors, including scale of mapping, intensity of mapping, design of map units, complexity of the landscape, and experience of the soil scientist. Observations are made to test and refine the soil-landscape model and predictions and to verify the classification of the soils at specific locations. Once the soil-landscape model is refined, a significantly smaller number of measurements of individual soil properties are made and recorded. These measurements may include field measurements, such as those for color, depth to bedrock, and texture, and laboratory measurements, such as those for content of sand, silt, clay, salt, and other components. Properties of each soil typically vary from one point to another across the landscape.

Observations for map unit components are aggregated to develop ranges of characteristics for the components. The aggregated values are presented. Direct measurements do not exist for every property presented for every map unit component. Values for some properties are estimated from combinations of other properties.

While a soil survey is in progress, samples of some of the soils in the area generally are collected for laboratory analyses and for engineering tests. Soil scientists interpret the data from these analyses and tests as well as the field-observed characteristics and the soil properties to determine the expected behavior of the soils under different uses. Interpretations for all of the soils are field tested through observation of the soils in different uses and under different levels of management. Some interpretations are modified to fit local conditions, and some new interpretations are developed to meet local needs. Data are assembled from other sources, such as research information, production records, and field experience of specialists. For example, data on crop yields under defined levels of management are assembled from farm records and from field or plot experiments on the same kinds of soil.

Predictions about soil behavior are based not only on soil properties but also on such variables as climate and biological activity. Soil conditions are predictable over long periods of time, but they are not predictable from year to year. For example, soil scientists can predict with a fairly high degree of accuracy that a given soil will have a high water table within certain depths in most years, but they cannot predict that a high water table will always be at a specific level in the soil on a specific date.

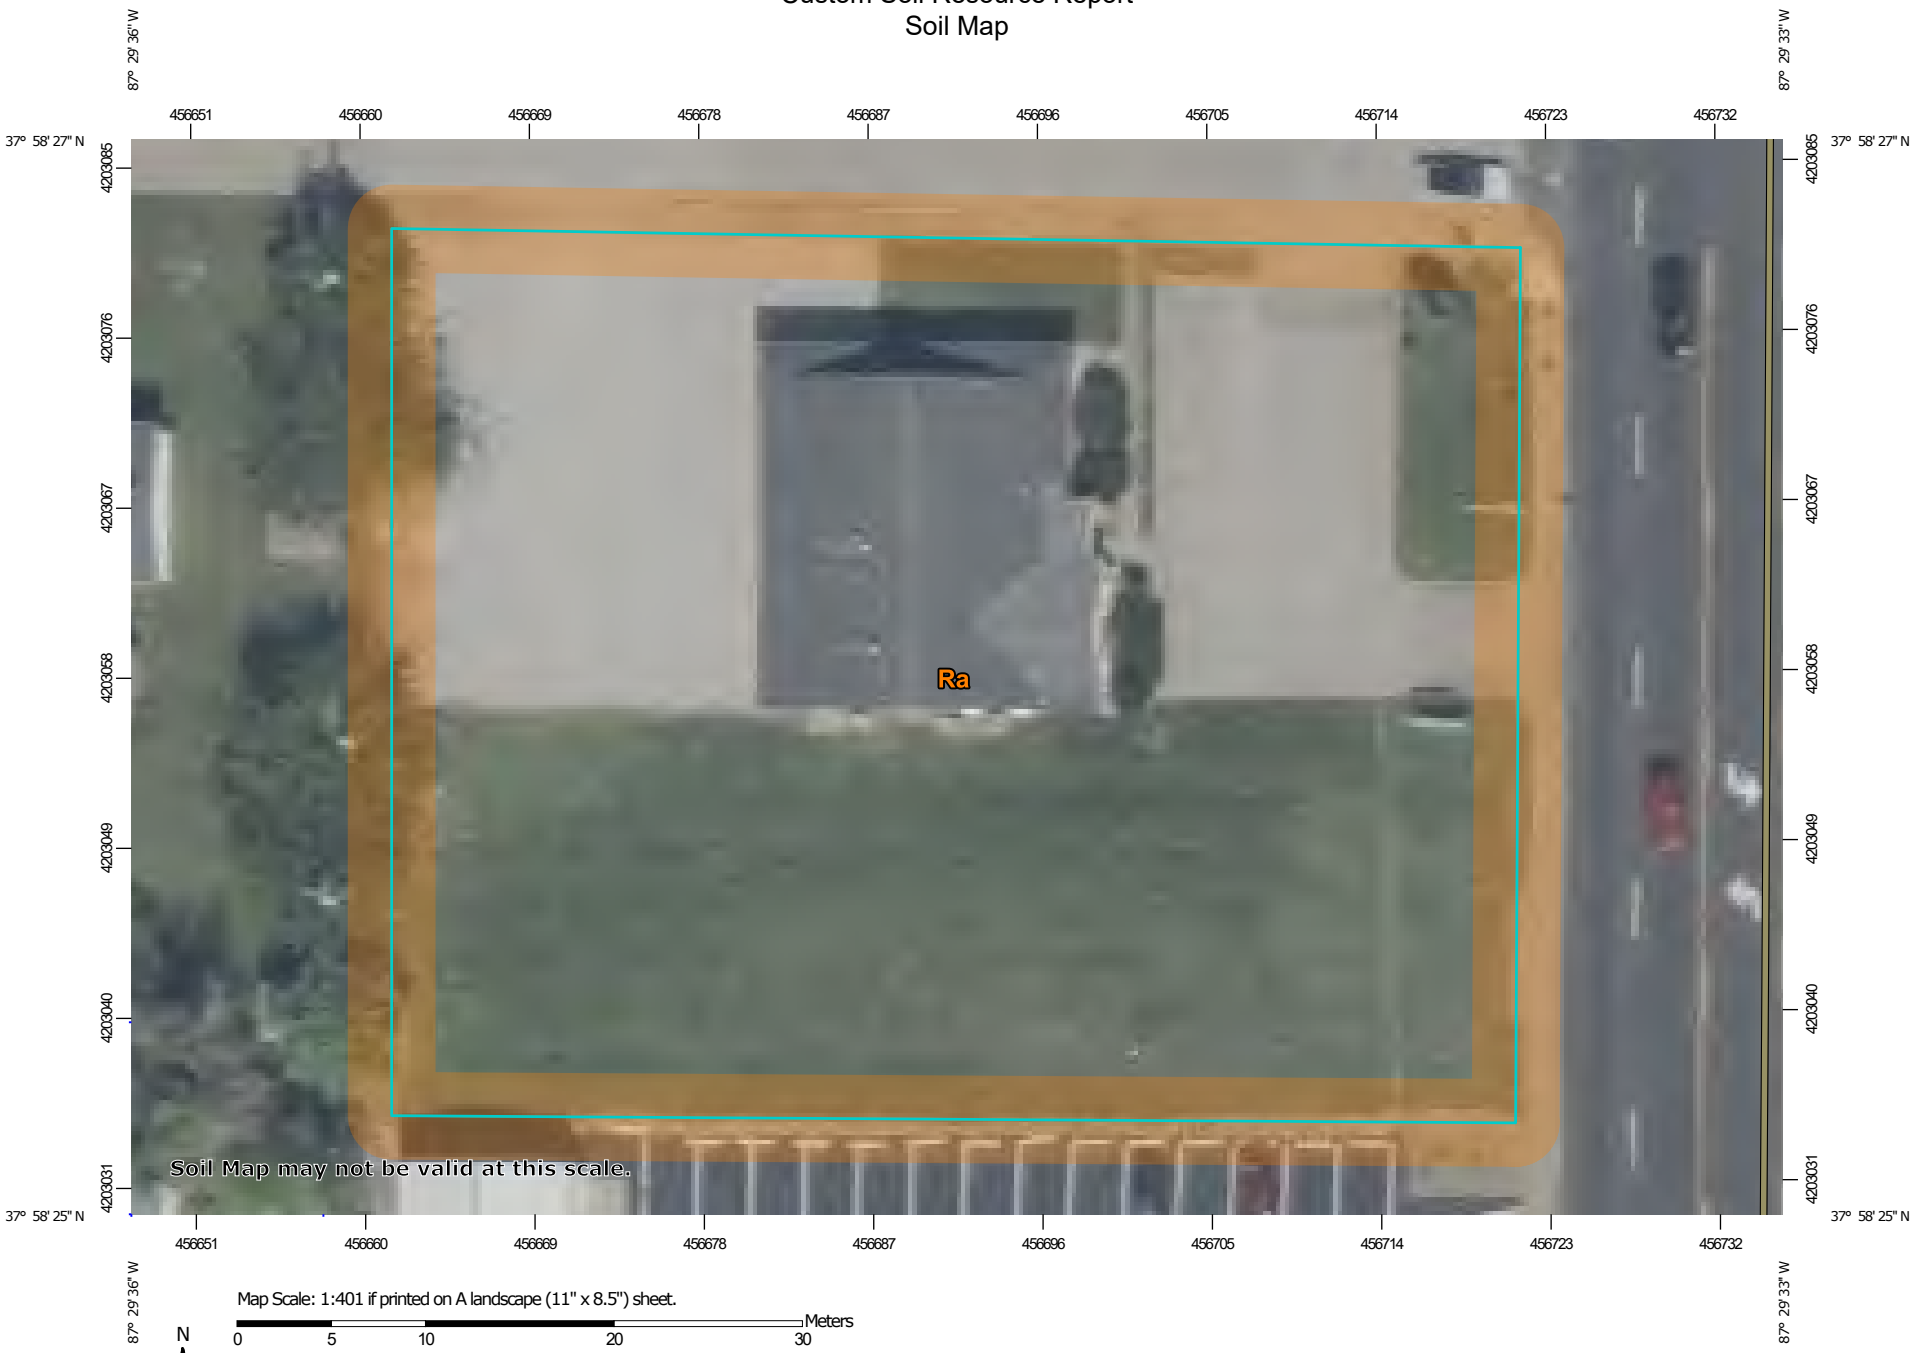

After soil scientists located and identified the significant natural bodies of soil in the survey area, they drew the boundaries of these bodies on aerial photographs and

identified each as a specific map unit. Aerial photographs show trees, buildings, fields, roads, and rivers, all of which help in locating boundaries accurately.

Soil Map

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Vanderburgh County, Indiana
Survey Area Data: Version 24, Aug 23, 2024

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Apr 10, 2023—Oct 10, 2023

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

National map unit symbol: 5gcf
Elevation: 340 to 700 feet
Mean annual precipitation: 40 to 46 inches
Mean annual air temperature: 52 to 57 degrees F
Frost-free period: 170 to 210 days
Farmland classification: Prime farmland if drained

Map Unit Composition

Ragsdale and similar soils: 100 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Ragsdale

Setting

Landform: Depressions on lake plains
Landform position (two-dimensional): Summit
Landform position (three-dimensional): Dip
Down-slope shape: Concave
Across-slope shape: Linear
Parent material: Loess

Typical profile

Ap - 0 to 9 inches: silt loam
A - 9 to 20 inches: silt loam
Bt - 20 to 56 inches: silty clay loam
C - 56 to 60 inches: silt loam

Properties and qualities

Slope: 0 to 2 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Poorly drained
Runoff class: Negligible
Capacity of the most limiting layer to transmit water (Ksat): Moderately high to high (0.60 to 2.00 in/hr)
Depth to water table: About 0 to 6 inches
Frequency of flooding: None
Frequency of ponding: Frequent
Calcium carbonate, maximum content: 20 percent
Available water supply, 0 to 60 inches: Very high (about 12.5 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 2w
Hydrologic Soil Group: B/D
Ecological site: F115XA011IL - Wet Loamy Terrace
Hydric soil rating: Yes

Your Message *

Good morning,
I am performing a Phase I Environmental Site Assessment on the vacant lot located at 207 and 211 S. Green River Road, Evansville, IN 47715. I am inquiring about any records the Vanderburgh County Health department may have on file pertaining to the site, especially related to environmental concerns, complaints, known releases, etc.

Thank you,
Tristan Norman

(812) 435-6235 · FAX: (812) 435-6248 · TDD/Hearing Impaired: (812) 436-4925

Date: 11/21/24

To: Tristan Norman, Field Geologist Cash Waggner

Subject: Phase 1 Environmental Site Assessment for 207, 211 S. Green River Rd., Evansville, IN.

Our office received a Phase 1 Environmental Assessment request for the referenced address. Our National Fire Incident Reporting System (NFIRS) records from 2013 to present. Our records indicate the Evansville Fire Department did not respond to the referenced addresses for any hazardous materials incidents. As to underground storage tanks within your request, please contact the Indiana Department of Environmental Management – 888-672-8323.

Effective 10/01/09 the Evansville Fire Department was the Authority Having Jurisdiction (AHJ) via an annexation agreement. The previous AHJ was the Knight Township Fire Department (Knight South/East).

Effective 04/01/11 the Evansville Fire Department was the AHJ via an annexation agreement. The previous AHJ was the Knight Township Fire Department (Knight North).

Sincerely,

Nick Raber
Battalion Chief, Special Operations
