Re: Leaking Petroleum Storage Tank (LPST) Case Closure of Hydrocarbon Contamination at the Saenz Service Station, 102 N. Main St., Tivoli, Refugio County, Texas
Regulated Entity Number RN101823672; Customer Number CN600991475
LPST ID No. 120814 - Priority 4.1 - Facility ID No. 9964; R - 14

Dear Mr. Saenz:

The Texas Commission on Environmental Quality (TCEQ) has reviewed the corrective action information submitted in relation to the release incident at the above-referenced facility. Provided that the documentation was accurate and representative of site conditions, it appears that the closure requirements of Title 30, Texas Administrative Code (TAC), Chapter 334, (30 TAC 334)—and applicable program guidance—have been met. Therefore, the site meets the Petroleum Storage Tank (PST) Program closure requirements and no further corrective action is necessary.

Please note that case closure is based on identified exposure pathways. Any contamination remaining at the site should be re-evaluated if future soil excavation or construction activities are conducted. Please ensure that any wastes generated from such activities are handled in compliance with all applicable regulations.

All monitoring wells which are not now in use and/or will not be used in the next 180 days must be properly plugged and abandoned in accordance with the requirements of the Texas Department of Licensing and Regulation (TDLR).

Any new or existing underground or above-ground storage tanks remaining at this site continue to be subject to TCEQ tank registration, self-certification, financial assurance, and technical standards provisions. Please reference the LPST and facility ID numbers on future correspondence regarding this site. Should you have any questions, please contact Reagan Stephens, the Project Manager, at (512) 239-6598. Your cooperation in this matter has been appreciated.

Sincerely,
