Re: Notice of No Further Action
15A NCAC 2L .0407(d)
Risk-based Assessment and Corrective Action
for Petroleum Underground Storage Tanks

Metro Screen
406 East Second Avenue, Gastonia
Gaston County
Incident Number: 40239
Risk Classification: Low

Dear Mr. Ballard:

The Initial Abatement Action Report, received by the UST Section, Mooresville Regional Office on July 2, 2013, has been reviewed. The review indicates that after soil excavation, soil contamination does not exceed the lower of the soil-to-groundwater or residential maximum soil contaminant concentrations (MSCCs), established in Title 15A NCAC 2L .0411.

The UST Section determines that no further action is warranted for this incident. This determination shall apply unless the UST Section later finds that the discharge or release poses an unacceptable risk or a potentially unacceptable risk to human health or the environment. Pursuant to Title 15A NCAC 2L .0407(a) you have a continuing obligation to notify the Department of any changes that might affect the risk or land use classifications that have been assigned. This No Further Action determination applies only to the subject incident; for any other incidents at the subject site, the responsible party must continue to address contamination as required. If you have any questions regarding this notice, please contact me at the address or telephone number listed below.

Sincerely,

Brad C. Newton, P.G.
Hydrogeologist II
