About Mesa del Sol

Albuquerque is arguably the city with the greatest potential in all of America for growth, development and sustainable living. And there is one area of our city that is particularly suited to realize and sustain that potential: Mesa del Sol. The 16,000 acre mixed-use, master-planned community in Albuquerque's southeast corner is now an area with active commercial and residential growth, active construction of new, modern homes, and incredible development progress.

Located south of the Albuquerque Sunport, Mesa del Sol is home to Netflix ABQ Studios, the University of New Mexico's Film & Digital Arts Department, the Isleta Amphitheater, and the New Mexico United multi-sport facilities.

Netflix purchased the former Albuquerque Studios in 2018 and has recently announced plans to expand its existing campus by an additional 300 acres, making its North American headquarters in Albuquerque one of the largest high tech and sustainable film production facilities in the world. The expansion will create an estimated 1,000 new jobs and more than double production capacity with the addition of 10 new sound stages to supplement the 8 existing stages. By the end of 2024, there will be an estimated 500 - 1,000 residential lots added and developed.

New Mexico United has a long term plan for a 32 field, multi-sport facility. Currently, there are eight fields established in the 180 acre complex as well as New Mexico United's practice facility.

In the Mesa del Sol Aperture Center, the University of New Mexico holds classes for its Film & Digital Arts Department. The center houses a 100-seat theatre for film screenings and instruction as well as a flex space, computer labs, and project rooms designed for faculty and students to produce creative work for class and research.

Mesa del Sol Master Plan

Albuquerque | NM

Often referred to as the Duke City, Albuquerque is an economically robust city that has met the challenges of growth and provides a wealth of amenities – all while sticking to its budget and managing prudently. As a result, the City has maintained high bond ratings. It has also drawn favorable notice in rankings of Kiplinger's Personal Finance, Site Selection magazine, and Forbes. Studies generally cite affordable labor, housing, and real estate; work force quality; incentives; and ease of working with local officials. Top industries in Albuquerque, NM include aerospace and defense, energy technology including solar energy, and semiconductor and computer chip manufacturing. Major employers in the Albuquerque area include Kirtland Air Force Base, Sandia National Laboratory and Intel Corp. The flagship campus of the 25,000-student University of New Mexico is in Albuquerque, as is Central New Mexico Community College, providing hundreds of jobs to educators.

Centrally-located at the intersection of I-25 and I-40, Albuquerque is the most populous city in New Mexico with an estimated metropolitan population of 967,000 in 2024. The city serves as a southwestern commercial hub, with BNSF Railroads rail service, air cargo shipped from the Albuquerque International Sunport, as well as the commuter train, the Rail Runner, spanning from Belen to Santa Fe. Albuquerque's economic environment is experiencing growth due in part to the city being the center of the New Mexico Technology Corridor. The largest employers located in Albuquerque include Kirtland Air Force Base, the University of New Mexico and Sandia National Laboratories. Recent economic news includes the openings of the Facebook Data Center, Keter Plastic, Safelite Autoglass Contact Center, and Lowe's Home Improvement customer support center; BendixKing's Honeywell Aerospace headquartering in Albuquerque with 140 quality jobs; Netflix selecting Albuquerque for its billion dollar U.S. production hub studio, and NBCUniversal's 100 million dollar production studio deal; and expansions of Intel, TaskUs, Carenet Healthcare Services, Kevothermal, Bunzl Distribution USA, and ANM. These business developments, Albuquerque's great quality of life, and its healthy environment led Forbes Magazine to name Albuquerque #1 in its survey of the Best Places in the USA for Business and Careers in 2018.
